DEPARTMENT OF THE INTERIOR

Bituminous Coal Division

OAKLAND COAL COMPANY

[Docket No. B-15]

MEMORANDUM OPINION AND ORDER OF THE DIRECTOR

On May 28, 1943, after due notice and hearing, W. A. Cuff, a duly designated Examiner of the Division, submitted a report in which he found that respondent, Oakland Coal Company, a registered distributor (Registration No. 6934), in accepting distributor's discounts on coal resold to Gallant Lumber and Coal Company, had not wilfully violated paragraphs (c), (d), (e) or (g) of its agreement by Registered Distributor, paragraphs 11 and 12 of section 4 II (i) of the Bituminous Coal Act or Rules 11 and 12 of section XIII of the Marketing Rules and Regulations. The Examiner recommended that an Order be entered in accord with these findings.

Upon full consideration I have determined that the proposed findings of fact and proposed conclusions of law of the Examiner adequately and correctly reflect the record and are fully supported by the evidence. No exceptions thereto having been filed, I believe that the proposed findings of fact and proposed conclusions of law of the Examiner should be approved and adopted as the findings of fact and conclusions of law of the Director;

Accordingly, It is ordered, That the proposed findings of fact and proposed conclusions of law of the Examiner are approved and adopted as the findings of fact and conclusions of law of the Director.

It is further ordered and determined, That Oakland Coal Company, a registered distributor (Registration No. 6934), in the acceptance and retention of distributor's discounts on the sale of coal to Gallant Lumber and Coal Company, as set forth in the notice of and order for hearing, has not wilfully violated paragraphs (c), (d), (e) or (g) of the Agreement by Registered Distributor executed by it, paragraphs 11 and 12 of section 4 II (i) of the Bituminous Coal Act of 1937, or Rules 11 and 12 of section XIII of the marketing rules and regulations;

It is further ordered, That the proceeding is dismissed.

Dated: July 15, 1943.

B. F. GOODRICH COMPANY

MEMORANDUM OPINION AND ORDER GRANTING EXEMPTION

In the matter of the application of the B. F. Goodrich Company for exemption.

On May 11, 1943, after notice and hearing, Travis Williams, a duly designated Examiner of the Division, submitted a Report in which he found that coal produced since June 22, 1942 at the coal mining properties located in Tuscarawas County, Ohio, owned by The B. F. Goodrich Company, has been produced by The B. F. Goodrich Company and has been transported by The B. F. Goodrich Company to itself for consumption by it. The Examiner found that for a period of some months prior to June 22, 1942, coal had been produced at the coal mining properties involved by an independent contractor, not by applicant for exemption, The B. F. Goodrich Company, but that, since June 22, 1942, The B. F. Goodrich Company has been engaged in the business of mining coal at the mining properties owned by it and has been consuming the coal so produced. The Examiner concluded that the transactions in coal covered by the application for exemption are exempt from section 4 of the Act by reason of the provisions of sections 4 II (1) and 4-A. He recommended that the application for exemption should be granted, effective as of June 22, 1942, but further recommended that the order granting exemption should be conditioned upon the annual filing by applicant of a verified statement indicating what changes, if any, have been effected in its coal mine activities in Tuscarawas County, Ohio.

Opportunity was afforded all parties to file exceptions to the Report of the Examiner. No exceptions have been filed.

I have considered the report of the Examiner and I find that it accurately reflects the evidence disclosed in the record. Upon the basis of the proposed findings of fact, proposed conclusions of law, and recommendation set forth in the Report, and upon the entire record in this proceeding;

It is hereby ordered, That the proposed findings of fact and the proposed conclusions of law of the Examiner are approved and adopted as the findings of fact and conclusions of law of the Director.

It is further ordered, That, effective as of June 22, 1942, the application of The B. F. Goodrich Company is granted; *Provided, however*, That the exemption granted by this order shall be deemed automatically terminated if The B. F. Goodrich Company fails to file annually from the date of issuance of this order a verified statement indicating what changes, if any, have been effected in its coal mining activities in Tuscarawas County, Ohio.

Dated: July 15, 1943.

WAGE FIXING PROCEDURES, FIELD EMPLOYEES, GRAZING SERVICE, DEPARTMENT OF THE INTERIOR

For the purpose of determining the prevailing rate of wages to be paid certain classes of field employees of the Grazing Service and to enable the payment to such employees of time and one-half for work in excess of 40 hours per week the following procedure is established:

I. *Wage Board.* A Wage Board, composed of three representatives of the Department, is hereby established to determine prevailing wages for similar work in the locality of their employment for persons employed by the Government in the various trades and occupations excluding employees whose wages are fixed on an annual basis pursuant to the Classification Act of 1923, as amended, and to make recommendations with respect to such wages to the Secretary of the Interior.

II. *Procedure to be Followed by Board.* In determining the prevailing wages of various trades and occupations being considered by the Board, the Board shall procure evidence of the wages and compensation being paid to and perquisites received by those employed in these trades and occupations from local contractors, Federal agencies (including wage scales currently being paid pursuant to minima established pursuant to the Davis-Bacon Act), private industrial employers, and others employing labor in the locality, whether pursuant to union agreements or otherwise. Hearings for the purpose of adducing evidence of wages paid in the locality may be held when, in the judgment of the Board, this is required in order to determine the prevailing rates of wages.

Based on the evidence procured as to prevailing wages and the perquisites of employment in the locality in the classifications under consideration by the Wage Board, the Board shall make its recommendations to the Secretary of the Interior as to the rates of wages to be paid to the Government employees of the classes above specified. The wages recommended shall become effective upon May 1, 1943, unless otherwise directed by the Secretary of the Interior: *Provided*, That the Secretary of the Interior may direct the Board to reconsider any recommendation in whole or in part when, in his judgment, the recommended wage does not accord with the evidence procured as to the prevailing wage in the locality or when there is insufficient evidence to support the wage recommended.

III. *Effective Period of Approved Wage Determinations.* Any wage rate fixed in the manner above provided shall remain in effect until that rate has been supplanted by a different rate determined by the Wage Board with the approval of the Secretary of the Interior. Unless directed by the Secretary of the Interior to do so at other intervals, the Wage Board shall review wage rates at six-month intervals, beginning with the effective date of the first schedule of wages made in accordance with the procedure herein provided; *Provided*, That the Secretary of the Interior may direct a review at any other time when, in his judgment, this is desirable.

Unless otherwise ordered, the Board shall be composed of these departmental representatives:

Duncan Campbell, who shall act as Chairman of the Board, and Guy W. Numbers, selected from the Office of the Secretary of the Interior,

Archie D. Ryan, selected from the Grazing Service.

FEDERAL POWER COMMISSION.

[Docket No. IT-5837]

JERSEY CENTRAL POWER AND LIGHT CO.

ORDER SUSPENDING SUPPLEMENTAL RATE SCHEDULES AND FIXING DATE FOR HEARING

JULY 15, 1943.

It appearing to the Commission that:

(a) Jersey Central Power & Light Company on March 24, 1931, entered into a formal agreement with Public Service Electric & Gas Company providing for the interchange of emergency power and service under terms and conditions therein specified; that this emergency interchange agreement has been designated in the files of the Commission as Jersey Central Power & Light Company Rate Schedule FPC No. 1.

(b) At approximately the same time Jersey Central and Public Service entered into an arrangement for the interchange of economy energy and service by means of the interconnection facilities provided under the agreement specified in (a) above; that such arrangement, when reduced to writing and filed with the Commission in accordance with the Commission's Order No. 36, will be designated in the files of the Commission as Jersey Central Power & Light Company Rate Schedule FPC No. 2.

(c) On May 3, 1943, the Supreme Court of the United States in Jersey Central Power & Light Co. *v.* Federal Power Commission, and New Jersey Power & Light Co. *v.* Federal Power Commission, Nos. 299 and 329, Oct. Term, 1942, upheld the Commission's determination In the Matter of New Jersey Power & Light Co., and Jersey Central Power & Light Co., Docket No. IT-5818, that Jersey Central was a "public utility" within the meaning of that term as used in the Federal Power Act, upon the basis of its ownership and operation of facilities for the transmission of electric energy in interstate commerce pursuant to the arrangements described in paragraphs (a) and (b), above.

(d) On June 15, 1943, the Commission received a copy of a letter written by Jersey Central Power & Light Company to Public Service Electric & Gas Company giving formal notice of its intention to terminate by Jersey Central Power & Light Company the agreement for the emergency interchange of power and service between the parties as provided for in the agreement of March 24, 1931; that this notice providing for the termination of emergency service has been designated in the files of the Commission as Supplement No. 1 to Jersey Central Power & Light Company Rate Schedule FPC No. 1.

(e) On June 26, 1943, the Commission received a letter from Jersey Central Power & Light Company advising that 30 days from date the arrangement with Public Service Electric & Gas Company for the interchange of economy energy and service was to be terminated and at that time switches would be opened on the interconnection between Jersey Central and Public Service extending from South Amboy to Perth Amboy, New Jersey; that this notice has been designated in the files of the Commission as Supplement No. 1 to Jersey Central Power & Light Company Rate Schedule FPC No. 2.

(f) Jersey Central Power & Light Company proposes to open switches on the interconnection facilities between South Amboy and Perth Amboy, thereby endangering the continuity of service upon its own system as well as the system of Public Service Electric & Gas Company in case of an emergency.

(g) Unless suspended by order of the Commission, Supplement No. 1 to Jersey Central Power & Light Company Rate Schedule FPC No. 1 and Supplement No. 1 to Jersey Central Power & Light Company Rate Schedule FPC No. 2 will permit Jersey Central Power & Light Company to alter and amend the arrangement for the supply of emergency power and service with Public Service Electric & Gas Company so that in every case of emergency it will be necessary to close the disconnect switches and bring the Jersey Central system and Public Service system into synchronism before the interchange of emergency power is possible, thereby endangering the continuity of customer service which the emergency interchange agreement is designed to safeguard; that necessary and resulting changes in operations on the system of Jersey Central and Public Service may and probably will result in higher costs in providing adequate generating reserves as a guarantee against service interruption in case of an emergency on either system, which increased costs must be borne by the ultimate consumer.

(h) Unless suspended by order of the Commission, Supplement No. 1 to Jersey Central Power & Light Company Rate Schedule FPC No. 2 would permit Jersey Central Power & Light Company to terminate the existing arrangement for the interchange of economy energy and service with Public Service Electric & Gas Company, resulting in the necessary use of higher cost generating facilities, waste of critical natural resources, and consequent higher costs, which must be borne by the consuming public; that the termination of the existing arrangement which has been operative since 1931 appears to be contrary to the public interest.

The Commission finds that:

It is necessary and appropriate in the public interest that the Commission enter upon a hearing concerning the lawfulness of the proposed changes in existing rate schedules providing for emergency interchange of electric energy and service and the interchange of economy energy and service and that the said supplements to existing rate schedules be suspended pending such hearing and the decision thereon.

The Commission, upon its own motion, Orders That:

(A) A public hearing be held on September 1, 1943, beginning at 10:00 a. m., in the Hearing Room of the Federal Power Commission, 1800 Pennsylvania Avenue, N. W., Washington, D. C., concerning the lawfulness of the proposed changes in service which will result if Supplement No. 1 to Jersey Central Power & Light Company Rate Schedule FPC No. 1 and Supplement No. 1 to Jersey Central Power & Light Company Rate Schedule FPC No. 2 become effective.

(B) Pending such hearing and decision thereon, the changes in service provided for in Supplement No. 1 to Jersey Central Power & Light Company Rate Schedule FPC No. 1, as well as the changes in service provided for in Supplement No. 1 to Jersey Central Power & Light Company Rate Schedule FPC No. 2, be and they are hereby suspended until December 15, 1943, and until such time thereafter as such schedules shall be made effective in the matter provided by the Federal Power Act under rules and regulations prescribed.

(C) During such period of suspension, the rates, charges, and service relating to the interchange of emergency energy and service, as well as interchange of economy energy and service as provided for, and as such service has been supplied in the past, under the arrangements embodied in Jersey Central Power & Light Company Rate Schedule FPC No. 1 and Jersey Central Power & Light Company Rate Schedule FPC No. 2 shall continue in full force and effect.

(D) At the hearing, the burden of proof to show the lawfulness of the proposed changes in service shall be upon Jersey Central Power & Light Company.

(E) Interested state commissions may participate in said hearing as provided in § 39.4 of the Rules of Practice and Regulations under the Federal Power Act.

By the Commission.

[SEAL] LEON M. FUQUAY,
Secretary.

NATIONAL LABOR RELATIONS BOARD.

POLICY AS TO RUN-OFF ELECTIONS

NOTICE OF OPEN HEARING

The Board now has under consideration a change in policy with respect to run-off elections. Before adopting a new policy, the Board wishes to have the criticisms and suggestions of labor organizations and employers.

An open hearing to discuss the recommended run-off policy will be held on Tuesday, August 3, 1943, at 2:00 p. m. in the Hearing Room on the first floor, Rochambeau Building, 815 Connecticut Avenue, Washington, D. C. All persons interested are invited to notify the Board by July 31, 1943, of their desire to appear at this hearing. Anyone unable to attend may present his views in writing. The Board will be glad to receive briefs from any interested parties, which are due not later than August 3, 1943.

The present policy of the National Labor Relations Board as to when run-off elections are ordered after inconclusive elections, and the form of the ballot, has been in effect for more than 3 years. The Board sets out here, briefly, the present policy and the plan which it is considering adopting.

Present policy. 1. Run-offs are ordered on request of any union on the ballot in the first ordered election, when the total of the votes for all unions constitutes a majority, unless the vote for "neither" is the largest, or unless two unions are tied, with no votes for "neither."

2. The run-off ballot carries the names of the two unions and drops the "neither."

3. In inconclusive elections involving three unions or more, a run-off keeps all the organizations on the ballot, dropping "none." If the run-off is inconclusive, a farther run-off is ordered, eliminating the organization with the lowest number of votes.

4. Petitions are dismissed when "neither" receives a majority or plurality, and when votes are equally divided between two unions with no votes for "neither," or between one union and "neither" or "none."

Proposed policy. 1. That run-off elections be ordered automatically wherever none of the choices on the ballot has received a majority, but a majority have voted for union representation.

2. That the interest receiving the lowest vote be dropped, whether it is a union or "neither," and that the run-off ballot carry the two choices with the larger votes, i. e., either the two unions with the larger votes, or only the union with the largest vote where "neither" had the largest or the second largest vote.

3. That in inconclusive elections involving three unions or more, only the two interests with the largest votes be carried on the run-off ballot, unless the third interest is a union with more than 25 percent of the votes. (Or alternatively that the one lowest interest, whatever it is, be dropped, and successive run-offs, if necessary, be directed until one interest receives a majority.)

4. That petitions be dismissed (a) in the event that "neither" receives a majority; and (b) where there is a tie between two unions or between one union and "none," there being no other valid votes.

5. That the original Direction of Election authorize the Regional Director to direct a run-off forthwith, in accordance with established policy.

The form of run-off ballot under present policy, and under the proposed policy, for various types of distribution of votes in the first election, is as follows:

Votes in first election	Present policy	Proposed policy
Two unions first and second in number of votes, "neither" third.	Choice between two unions.	Choice between two unions.
"Neither" the second interest	Choice between two unions.	Vote for or against union with largest vote.
"Neither" the largest vote, but not a majority.	No run-off, dismiss	Vote for or against union with largest vote.
"Neither" a majority	No run-off, dismiss	No run-off, dismiss.
Three unions, with the "none" vote second or lower.	Choice among three unions.	Choice between two largest interests, either two unions or top union and "none".
Three unions, where third interest is union with more than 25 percent of the votes.	Choice among three unions.	Choice between three top interests.
Two unions tie, a few votes for "neither"	Choice between two unions.	Choice between two unions
"Neither" tied with union with largest vote, and another union with smaller vote.	(No precedent)	Vote for or against union with largest vote.
"Neither" tied with union with smaller vote, another union having larger vote.	(No precedent)	Vote for or gainst union with largest vote.
"Neither" the largest vote but less than majority, two unions tie with smaller number of votes.	No run-off, dismiss	Repeat election using same ballot as in first.

Dated Washington, D. C., July 16, 1943.
By direction of the Board.

Executive Secretary.

ADJUSTMENT OF MAXIMUM PRICES

For the reasons set forth in an opinion issued simultaneously herewith, and in accordance with § 1499.19a of the General Maximum Price Regulation, *It is ordered:*

(a) *Maximum prices for distribution yard sales of hardwood lumber.* The maximum prices for distribution yard sales of hardwood lumber, shall be the seller's present maximum prices as established under the General Maximum Price Regulation, *Provided*, That the seller may agree with the buyer to deliver at prices to be adjusted upward in accordance with action taken by the Office of Price Administration after delivery.

(b) *Definition of distribution yard sale of hardwood lumber.* For the purposes of this order, a "distribution yard sale of hardwood lumber" is any sale of hardwood lumber which is not a "sale for direct mill shipment" or a sale "where shipment originates at the mill", as those terms are used in the hardwood lumber regulation applying in the region where the particular lumber was produced. Where the origin of the particular lumber is unknown or is in an area not covered by specific hardwood lumber regulation, the lumber may be considered as having originated from the nearest hardwood lumber producing area covered by specific regulation.

PURCHASERS OF LOGGING SERVICES AND STUMPAGE

REQUEST FOR APPROVAL OF PROGRAM INVOLVING JOINT ACTION

JULY 3, 1943.

The CHAIRMAN, WAR PRODUCTION BOARD:

In order for the Office of Price Administration adequately to discharge its duties under the Emergency Price Control Act of 1942, as amended, and Executive Orders 9250 and 9328, it is necessary that buyers of logging services and stumpage, who are subject to Supplementary Services Regulation No. 16 (8 F.R. 8750) under Maximum Price Regulation 165, as amended—Services, and to Maximum Price Regulation 348, as amended—Logs and Bolts (8 F.R. 3670, 5163, 5565, 6356, 8751), act together in a manner proper to the preparation of joint petitions for area pricing.

Section 1499.666 of Supplementary Services Regulation No. 16 under Maximum Price Regulation 165 reads as follows:

§ 1499.666 *Logging services and stumpage.*—(a) *Maximum prices on certain logging services.* The maximum prices established by Maximum Price Regulation No. 165—Services, for logging services are modified in the following respects:

(1) When a proposal for dollars-and-cents maximum prices on contract logging is filed under section 9 of Maximum Price Regulation No. 348—Logs and Bolts, the maximum prices for those services may be suspended by the Lumber Branch, Office of Price Administration, under the following conditions:

(i) In the case of any petition filed under section 9 of Maximum Price Regulation No. 348, filed before July 15, 1943, the petitioners may have the operation of their ceiling prices on the logging services they purchase suspended during the forty-five days immediately following the filings. The privilege can be used only by those who join in the petition.

(ii) Petitioners who, in good faith, are preparing petitions may start the forty-five day period of suspension running before the completion of the petition by filing, instead of the petition, a letter stating that the petition is in preparaion and giving an outline of the proposed area and plan. In such cases the total exemption period will not be more than forty-five days from the filing of the letter.

(iii) The letter or petition must establish that the supply of the service is required to meet military or essential civilian needs and cannot be obtained at the March 1942 level of prices; that it is impracticable to adjust the maximum price for the service under the adjustment provisions of Maximum Price Regulation No. 165; and that the need is so urgent, action cannot be delayed pending preparation and consideration of the proposal.

(2) At the conclusion of the suspension period the maximum prices on contract logging services for the particular area involved shall be the dollars-and-cents prices set forth in an appropriate appendix to this regulation or, if no dollars-and-cents prices have been established, the maximum price shall be that established for the supplier under the first applicable paragraph of §§ 1499.102 and 1499.103 of Maximum Price Regulation No. 165.

(b) *Definition.* As used in this Supplementary Services Regulation, the term "logging services" means services in connection with the production of logs, bolts, cordwood and other primary forest products (including all operations in connection therewith, such as felling, bucking, cutting, skidding, yarding, peeling, loading, and reloading, et cetera).

A new paragraph (f) has been added to section 9 of Maximum Price Regulation 348—Logs and Bolts, to read as follows:

(f) *Inclusion of contract logging and stumpage proposals in petition.* A petition for area pricing may include a proposal for a ceiling price system for contract logging and stumpage. When this is done, temporary suspension of ceiling prices set out in the preced-

ing paragraph (e) may be granted by the Lumber Branch, Office of Price Administration, on the ceiling prices on contract logging established by any regulation, provided conditions of paragraph (e) are met and the following conditions are established by the letter of intent or petition:

(1) The supply of the service is required to meet military or essential civilian needs and cannot be obtained at the March 1942 level of prices.

(2) It is impracticable to adjust the maximum price for the service under the adjustment provisions of Maximum Price Regulation No. 165.

(3) The need is so urgent that action cannot be delayed pending preparation and consideration of the proposal.

An area pricing petition may be submitted for contract logging or stumpage apart from log purchases, in any case in which the petitioners show that they do not buy logs. The petition must be filed not later than July 15, 1943, to obtain the benefit of the suspension. Since pulpwood is not subject to this regulation, proposals on contract logging of pulpwood may be filed under this section only where the pulpwood is cut in conjunction with some other forest products.

Notwithstanding the above provisions, contract logging services remains subject to Maximum Price Regulation No. 165 and the proposal will be processed under that Regulation or Supplementary Service Regulation No. 16.

Under date of April 21, 1943, this Office requested your approval of a program involving joint action by purchasers of logs and bolts. The request appears in 8 F.R. 5577. Certificate 56 approving such program was issued by your Office April 24, 1943 and appears in 8 F.R. 5578. The amendment to Maximum Price Regulation 348 and Supplementary Services Regulation No. 16 under Maximum Price Regulation 165 are to be administered in conjunction with the program approved in the foregoing Certificate 56. The original program related to area pricing covering the purchase of logs and bolts; this request will permit purchasers of logging services and stumpage to discuss in meetings or in correspondence the following additional matters in connection with proposals for area pricing:

1. Prices of services in connection with the production of logs, bolts, cordwood and other primary forest products, including all operations in connection therewith, such as felling, bucking, cutting, skidding, yarding, peeling, loading, reloading, etc.; contract logging in connection therewith.

2. Stumpage prices.

All joint actions and discussions contemplated by these regulations are to relate directly, and are restricted, to the proper preparation of petitions for area pricing under section 9 of Maximum Price Regulation 348 and Supplementary Services Regulation No. 16 under Maximum Price Regulation 165. If the actions or discussions in concert go beyond this limitation, the entire course of joint conduct shall be considered improper and subject to the restrictions of law which would apply in the absence of any certification by you pursuant to this recommendation. Specifically, but not exclusively, the following actions or discussions shall be deemed to be improper:

1. Discussions relating to products made from logs and bolts, including matters of prices, costs of production, and trade practices, or the like.

2. Discussions relating to allocations of contract loggers, of territories within a given area, to allocations to particular buyers of sellers or of products.

3. The use of any coercion, direct or indirect, to secure participation of any individual or group in the permissible discussions or the petitions. Coercive practices include the imposition of any condition or prerequisites to participation, such as requiring the joining of an association, grading bureau, or the like.

4. Interfering with, or preventing, the communication to the Office of Price Administration, of the separate views or expressions of any affected individual or group. This includes preventing a person from joining in the petition with reservations or conditions.

WILLIAM R. CARVER

FINDINGS AND ORDER SUSPENDING REGISTRATION

At a regular session of the Securities and Exchange Commission held at its office in the City of Philadelphia, Pennsylvania, on the 16th day of July, A. D. 1943.

In the matter of William R. Carver, 120 East Washington Street, Syracuse, New York.

1. William R. Carver (the "registrant") is registered as a dealer pursuant to section 15 of the Securities Exchange Act of 1934.

2. The Commission, on the basis of facts reported to it, ordered a hearing pursuant to section 15 (b) of the Securities Exchange Act to determine whether or not the allegations of fact set out in said order are true and whether or not said registration should be revoked or suspended pending final determination. The facts alleged, if true, tend to show that the registrant is permanently enjoined by a decree of the Supreme Court of the State of New York, held in and for the County of Onondaga, entered on or about February 19, 1943, from engaging in and continuing certain conduct and practices in connection with the sale of securities.

3. Notice of the proceeding was sent by registered mail to the registrant at the address designated by him in his application for registration as amended. The notice was returned unclaimed. The registrant did not appear and was not represented at the hearing.

4. The trial examiner filed an advisory report, a copy of which was mailed to the registrant and returned unclaimed.

5. On an independent review of the record, we find that registrant is permanently enjoined by a decree of the Supreme Court of the State of New York from selling securities within the State of New York unless and until he meets certain conditions prescribed in said decree.

Because notice of our proceeding was not received by the registrant, we do not decide at this time whether or not his registration should be revoked. However, in view of the injunction described above, we find that it is necessary in the public interest and for the protection of investors that Carver's registration be suspended pending final determination of whether or not his registration should be revoked, which matter will be determined when he comes in to be heard or notice is received by him. *It is, therefore, ordered*, Pursuant to section 15 (b) of the Securities Exchange Act of 1934, that the registration of William R. Carver be, and it hereby is, suspended until further order.

By the Commission.

PATRICK H. MCCLELLAN

FINDINGS AND ORDER REVOKING REGISTRATION

At a regular session of the Securities and Exchange Commission held at its office in the City of Philadelphia, Pennsylvania on the 16th day of July 1943.

In the matter of Patrick H. McClellan, 125 Burnet Avenue, Syracuse, New York.

1. Patrick H. McClellan (hereinafter referred to as the registrant) is registered as a broker and dealer pursuant to section 15 of the Securities Exchange Act of 1934

2. The Commission, on the basis of facts reported to it, instituted a proceeding pursuant to section 15 (b) of the Securities Exchange Act of 1934 to determine whether or not the registration of the registrant should be revoked.

3. After due notice a hearing was held. The registrant did not appear and was not represented at the hearing.

4. The Trial Examiner filed an advisory report in which he found that on April 14, 1943, a judgment was entered in the Supreme Court of the State of New York permanently enjoining the registrant, among other things, from engaging in the sale of securities.

5. On an independent review of the record, we adopt the Trial Examiner's findings and find further that revocation of the registration of Patrick H. McClellan as a broker and dealer is in the public interest. On the basis of the foregoing, and pursuant to section 15 (b) of the Securities Exchange Act of 1934;

It is ordered, That the registration of Patrick H. McClellan as a broker and dealer be, and it hereby is, revoked.

By the Commission.

(23) Establishing a protective sod lining in ditches used for removing excess water from systems of contour cultivation, ditching, or terracing: $0.25 per 100 square feet of ditch surface.

(24) Constructing a sufficient amount of continuous terrace to give adequate protection against erosion. No credit will be given for more than 500 feet of terrace per acre: $1.00 per one hundred linear feet of terrace.

(25) Constructing and maintaining check dams in gullies: $0.10 per linear foot.

(e) *Schedule of production practices for Puerto Rico.* (Minimum performance under this practice is a prerequisite to any payment under the 1943 Agricultural Conservation Program for Puerto Rico.)

(1) Planting of food crops for human consumption on an acreage equal to 30 percent of the cropland on the farm (excluding sugarcane and orchards) with a minimum requirement of ¼ acre and a maximum requirement of 50 acres devoted to this practice during the calendar year of 1943: *Provided*, That the food crops planted are of the types specified by the regional director and are planted in the proportions specified by him.—$5.00 per acre for the first 10 acres and $4.00 per acre for the next 40 acres (within 30 percent of the cropland), with a minimum of $5.00 and maximum of $210.00. No credit will be given for farms having more than 500 acres of cropland; and no credit will be given for acreages planted to foodstuffs to meet the condition included in Sugar Determination No. 156.

§ 702.402 *Rice*—(a) *State allotment.* The State allotment of rice for Hawaii is 900 acres.

(b) *Farm allotments.* The State office shall establish rice acreage allotments in accordance with the provisions of this subsection and instructions issued by the Agricultural Adjustment Agency.

(1) A rice acreage allotment shall be determined for each producer who is participating in the production of rice in 1943 and who participated in the production of rice in one or more of the five years 1938 to 1942, inclusive, on the basis of his past production of rice adjusted to the available acreage adapted to the production of rice, taking into consideration crop-rotation practices, soil fertility and other physical factors affecting the production of rice, including the labor and equipment available to him for the production of rice.

(2) An acreage not to exceed 3 percent of the State rice acreage allotment shall be apportioned among producers who are participating in the production of rice in 1943 for the first time since 1937 on the basis of the applicable standards of apportionment set forth under subparagraph (1) of this paragraph (b); Except, that the rice acreage allotment to any producer who is participating in the production of rice in 1943 for the first time since 1937 shall not exceed 75 percent of the rice acreage allotment that would have been made to him had he participated in the production of rice in one or more of the five years 1938 to 1942, inclusive.

(3) The farm rice acreage allotment will be the sum of the allotments established for all producers participating in the production of rice on the farm. The sum of the farm allotments shall not exceed the State allotment.

(c) *Normal yield.* The State office shall determine for each farm participating in the 1943 program in the State a normal yield for rice in accordance with the provisions of this subsection and instructions issued by the Agricultural Adjustment Agency.

(1) Where reliable records of the actual yield of rice per acre for the five years 1938 to 1942, inclusive, are presented by the farmer or are available to the State office, the normal yield of rice for the farm shall be the average of these yields.

(2) If for any year of this five-year period records of the actual yield are not available or there was no actual yield because rice was not planted on the farm in that year, the State office shall ascertain from all the available facts, including the yield customarily made on the farm, weather conditions, type of soil, drainage, production practices, and general fertility of the land, the yield which was or could reasonably have been expected on the farm for that year, and the yield so determined shall be used as the actual yield for that year under subparagraph (1) of this paragraph (c).

(3) If the average of the normal yields for all farms participating in the 1943 program in the State (weighted by the rice acreage allotments therein) exceeds the average yield per acre for the State during the five years 1938 to 1942, inclusive, established by the Administrator, the normal yields for these farms, determined under subparagraphs (1) and (2) of this paragraph (c), shall be reduced pro rata so that the average of the normal yields shall not exceed the State average yield.

(d) *Payment in connection with rice acreage allotment.* Payments will be made at the rate of 2.0 cents per 100 pounds (rough rice) of the normal yield of the farm for each acre in the rice acreage allotment.

(e) *Deduction in connection with rice acreage allotment.* The payment computed for any farm under §§ 702.401 and 702.402 shall be subject to a deduction of ten times the payment rate for each acre by which the acreage of rice planted is less than its rice allotment, but not to exceed the maximum rice payment computed for the producer on that farm.

§ 702.403 *Tobacco*—(a) *State allotment.* The State allotment of tobacco for Puerto Rico will be established by the Administrator.

(b) *Farm allotments.* The State office shall establish tobacco acreage allotments in accordance with the provisions of this subsection and instructions issued by the Agricultural Adjustment Agency.

(1) A tobacco acreage allotment for the 1943–44 crop shall be determined for each farm for which a tobacco acreage allotment was, or could have been, established under the 1942 Agricultural Conservation Program on the basis of the tobacco acreage allotment which was, or could have been, established for the farm under the 1942 Agricultural Conservation Program, the land, labor, and equipment available for the production of tobacco, crop-rotation practices, and the soil and other physical factors affecting the production of tobacco.

(2) The tobacco acreage allotment for any farm on which tobacco is produced in the 1943–44 tobacco season for which no allotment can be established under subparagraph (1) of this paragraph (b) shall be determined on the basis of the land, labor, and equipment available for the production of tobacco, crop-rotation practices, and the soil and other physical factors affecting the production of tobacco.

(3) The sum of the farm acreage allotments shall not exceed the State allotment.

(c) *Normal yield.* The State office shall determine for each farm for which an acreage allotment is established under subsection (b) of this section a normal yield for tobacco in accordance with instructions issued by the Agricultural Adjustment Agency.

(1) If the average of the normal yields established for all farms (weighted by the tobacco acreage allotments therein) exceeds the adjusted average yield (farm weight) per acre for the State during the five crop years 1938–1939 to 1942–43, inclusive, the normal yields for these farms shall be reduced pro rata so that the average of the normal yields shall not exceed this figure. The adjusted average yield will be established by the Administrator prior to the 1943–44 tobacco season.

(d) *Payment in connection with tobacco acreage allotment.* Payment will be made on the basis of the normal yield (farm weight) of the farm for each acre in the tobacco acreage allotment: *Provided*, That, where the tobacco acreage allotment for the farm has not been planted in full, no payment will be made unless an acreage equal to the tobacco acreage allotment or the unplanted part thereof (in addition to the minimum requirement under Practice No. 1) has been planted to one or more of the food crops specified by the regional director under § 702.401 (e) (1). (Minimum performance under Practice No. 1 for Puerto Rico is a prerequisite to any payment under the tobacco provision of the 1943 Agricultural Conservation Program for Puerto Rico.)

(e) *Deduction for excess tobacco acreage.* The payment computed for any farm under §§ 702.401 and 702.403 shall be subject to a deduction based on the normal yield (farm weight) of the farm for each acre planted to tobacco in excess of the tobacco acreage allotment established for the farm. The rate of deduction will be established by the Administrator prior to the beginning of the 1943–44 tobacco season.

§ 702.404 *Division of payments and deductions*—(a) *Payments in connection with production practices.* The amount of payment earned in connection with production practices carried out on the farm shall be made to the landlord, tenant, or sharecropper who carried out the production practices thereon. If more than one such person contributes to the carrying-out of production practices on the farm in 1943, the payment shall be divided in proportion to the contribution made by each person contributing to the practices carried out on the farm in 1943. All persons contributing to any practice carried out on a particular acreage shall be deemed to have contributed equally to the carrying out of that practice unless they establish to the satisfaction of the State office that their respective contributions thereto were not in equal proportion, in which event the participation shall be determined by the proportion which the State office finds each person contributed thereto. Contribution of land shall not be considered as contributing to the carrying out of a practice.

(b) *Payments and deductions in connection with rice and tobacco acreage allotments.* The net payment or net deduction computed for any farm with respect to the rice or tobacco acreage allotment shall be divided among the landlords, tenants, and sharecroppers in the same proportion (as indicated by their acreage shares expressed in terms of either acreages or percentages) that these persons are entitled at the time of harvest to share in the proceeds (other than a fixed commodity payment) of the rice crop grown on the farm in 1943 or the tobacco crop grown on the farm in the 1943–44 tobacco season: *Provided*, That, if rice is not grown on the farm in 1943 or tobacco is not grown on the farm in the 1943–44 tobacco season, the net payment or net deduction shall be divided among the landlords, tenants, and sharecroppers in the proportion that the State office determines that these persons would have shared in the proceeds of the rice or tobacco crop if the entire acreage in the rice or tobacco acreage allotment had been planted and harvested, for rice, in 1943, or, for tobacco, in the 1943–44 tobacco season: *Provided further*, That, if because of crop failure the harvested acreage of tobacco is less than the planted acreage of the crop and the State office finds, in accordance with instructions issued by the Agricultural Adjustment Agency, that use of the harvested acreage as a basis for the division of the net payment or net deduction would result in a materially different division from that which would result from the use of the planted acreage, the net payment or net deduction shall be divided among the landlords, tenants, and sharecroppers in the proportion that the State office determines that these persons would have shared in the proceeds of the tobacco crop if the entire acreage planted to the crop in the 1943–44 tobacco season had been harvested: *Provided further*, That in cases where landlords, tenants, or sharecroppers, after planting but prior to harvest, lose their interest in a rice or tobacco crop by reason of acquisition of title to or lease of the farm for use in connection with the national war effort, the net payment (less any compensation for the loss of payment) or the net deduction computed with respect to the crop shall be divided among such persons in the same proportion that the State office determines that such persons would have been entitled, as of the time of harvest, to share in the proceeds of the crop except for such acquisition of title or lease.

(c) *Proration of net deductions.* If the sum of the net payments computed for all persons on a farm exceeds the sum of the net deductions computed for all persons on the farm, the sum of the net deductions computed for all persons on the farm shall be prorated among the persons on the farm for whom a net payment is computed, on the basis of the computed net payments. If the sum of the net deductions computed for all persons on a farm equals or exceeds the sum of the net payments computed for all persons on the farm, no payment will be made with respect to this farm and the amount of the net deductions in excess of the net payments shall be prorated among the persons on the farm for whom a net deduction is computed, on the basis of the computed net deductions.

§ 702.405 *Increase in small payments.* The total payment computed under §§ 702.401 to 702.403, inclusive, for any person with respect to any farm shall be increased as follows:

(a) Any payment amounting to 71 cents or less shall be increased to $1.00;

§ 702.406 *Payments limited to $10,000.* The total of all payments made in connection with programs for 1943 under section 8 of the Soil Conservation and Domestic Allotment Act to any individual, partnership, or estate with respect to farms, ranching units, and turpentine places located within a single State, Territory, or possession, shall not exceed the sum of $10,000. The total of all payments made in connection with such program to any person other than an individual, partnership, or estate with respect to farms, ranching units, and turpentine places in the United States (including Alaska, Hawaii, and Puerto Rico) shall not exceed the sum of $10,000.

All or any part of any payment which has been or otherwise would be made to any person under the 1943 program may

be withheld or required to be returned if he has adopted or participated in adopting any scheme or device, including the dissolution, reorganization, revival, or formation of any corporation, partnership, estate, trust, or any other means, which was designed to evade, or would have the effect of evading, the provisions of this section.

§ 702.407 *Deductions incurred on other farms.* If the deductions computed under §§ 702.402 and 702.403 with respect to any farm exceed the payment computed under §§ 702.401, 702.402, and 702.403 for full performance on the farm, a landlord's or tenant's share of the amount by which the deduction exceeds the payment shall be deducted from the payments which would otherwise be made to him with respect to any other farms in Hawaii or Puerto Rico (considering only farms located in the same one of these areas) if the State office concerned finds that the crops grown and practices adopted on the farm or farms with respect to which the deductions are computed substantially offset the contribution to the program made on the other farms.

§ 702.408 *General provisions relating to payments*—(a) *Payment restricted to effectuation of purposes of the program.* All or any part of any payment which is made or otherwise would be made to any person under the 1943 program may be withheld or required to be returned (1) if he adopts or had adopted any practice which tends to defeat any of the purposes of the 1943 or previous agricultural conservation programs, (2) if, by means of any corporation, partnership, estate, trust, or any other device, or in any manner whatsoever, he has offset, or has participated in offsetting, in whole or in part, the performance for which the payment is otherwise authorized, or (3) if, with respect to grazing land, forest land, or woodland owned or controlled by him, he adopts or has adopted any practice which the regional director finds is contrary to sound conservation practices.

Payments other than payments in connection with production practices will be made only with respect to farms which are being operated in 1943.

(b) *Payment computed and made without regard to claims.* Any payment or share of payment shall be computed and made without regard to questions of title under Territorial law, or the laws of Puerto Rico, without deduction of claims for advances (except as provided in paragraph (d) of this § 702.408 and for indebtedness to the United States subject to setoff under orders issued by the Administrator) and without regard to any claim or lien against any crop, or proceeds thereof, in favor of the owner or any other creditor.

(c) *Changes in leasing and cropping agreements, reduction in number of tenants, and other devices.* If on any farm in 1943 any change of the arrangements which existed on the farm in 1942 is made between the landlord or operator and the tenants or sharecroppers and this change would cause a greater proportion of the payments to be made to the landlord or operator under the 1943 program than would have been made to him for performance on the farm under the 1942 program, payments to the landlord or operator under the 1943 program with respect to the farm shall not be greater than the amount that would have been paid to him if the arrangements which existed on the farm in 1942 had been continued in 1943, unless the State office certifies that the change is justified and approves it.

If on any farm the number of sharecroppers or share tenants in 1943 is less than the average number on the farm during the years 1940 to 1942, inclusive, and the reduction would increase the payments that would otherwise be made to the landlord or operator, payments to the landlord or operator shall not be greater than the amount that would otherwise be made, unless the State office certifies that the reduction is justified and approves it.

If the State office finds that any person who files an application for payment pursuant to the provisions of the 1943 program has employed any other scheme or device (including coercion, fraud, or misrepresentation), the effect of which would be or has been to deprive any other person of any payment under any agricultural conservation program to which the latter would normally be entitled, the Administrator may withhold in whole or in part, from the person participating in or employing such a scheme or device, or require him to refund, in whole or in part, the amount of any payment which has been or would otherwise be made to him in connection with the 1943 program.

(d) *Assignments.* Any person who may be entitled to any payment in connection with the 1943 program may assign his interest in the payment, in whole or in part, as security for cash loaned or advances made for the purpose of financing the making of a crop in 1943. No assignment of this kind will be recognized unless it is made in writing on Form ACP-69 in accordance with the instructions (ACP-70-Revised) issued by the Agricultural Adjustment Agency and unless such assignment is entitled to priority as determined under the instructions governing the recording of such assignments issued by the Agricultural Adjustment Agency.

Nothing contained in this paragraph (d) shall be construed to give an assignee a right to any payment other than that to which the farmer is entitled nor shall the Administrator or any disbursing agent be subject to any suit or liability if payment is made to the farmer without regard to the existence of an assignment.

(e) *Deductions in case of erroneous notice of acreage allotment.* Notwithstanding the deduction provisions of §§ 702.403 and 702.404, in any case where, through error in a State office, the producer was officially notified of an allotment for a commodity larger than the finally approved allotment for that commodity and the State office involved finds that the producer, acting upon information contained in the erroneous notice, planted an acreage to the commodity in excess of the finally approved allotment, the producer will not be considered to have exceeded the allotment for such commodity unless he planted an acreage to the commodity in excess of the acreage stated in the notice erroneously issued, and the deduction for excess acreage will be made only with respect to the acreage in excess of that stated in the notice erroneously issued.

§ 702.409 *Application for payment*—(a) *Persons eligible to file applications.* An application for payment with respect to a farm may be made by any person for whom, under the provisions of § 702.404, a share in the payment with respect to the farm may be computed and (1) who at the time of harvest is entitled to the whole of or a share in any of the crops grown, or its proceeds, or livestock produced on the farm under a lease or operating agreement or as owner-operator, or (2) who is owner or operator of the farm and participates thereon in 1943 in carrying out approved production practices.

(b) *Time and manner of filing application and information required.* Payment will be made only upon application submitted through the respective State offices on or before March 31, 1944, except that the timely filing of an application by one person on a farm shall constitute a timely filing on behalf of all persons on that farm. Payment may be withheld from any person who fails to file any form or furnish any information required with respect to any farm which he is operating or renting to another person for a share of the crops grown thereon or for cash or standing rent. Any application for payment may be rejected if any form or information required is not submitted to the State office within the time fixed by the regional director. At least two weeks' notice to the public shall be given of the expiration of a time limit for filing prescribed forms or required information, any time limit to be such as affords a full and fair opportunity to those eligible to file the form or information within the period prescribed. Notice shall be given by mailing it to the office of each county agricultural extension agent and making copies of it available to the press.

(c) *Application for other farms.* If a person has the right to receive all or a portion of the crops, or proceeds therefrom, produced on more than one farm in Alaska, Hawaii, or Puerto Rico (considering only farms located in one of these areas) and makes application for payment with respect to one of these farms, he must make application for payment with respect to all these farms which he operates or rents to other persons and on which rice is planted in 1943 or tobacco is planted in the 1943-44 tobacco season and a deduction is computed.

(d) All calculations involving land area in Puerto Rico will be made on the basis that one cuerda equals 0.97 acre.

§ 702.410 *Appeals.* Any person may, within fifteen days after notice thereof is forwarded to or made available to him, request the State office in writing to reconsider its recommendation or determination with respect to any of the

following matters affecting any farm in which he has an interest: (a) eligibility to file an application for payment; (b) acreage allotment or normal yield of rice or tobacco; measurement; or production practice allowance; (c) the division of payment; or (d) any other matter affecting the right to or the amount of his payment with respect to the farm. The State office shall notify him of its decision in writing within fifteen days after receipt of a written request for reconsideration. If he is dissatisfied with the decision of the State office, he may within fifteen days after the decision is forwarded to or made available to him, request the regional director to review the decision of the State office.

As an adjustment for participation, the rates of payment and deduction with respect to any commodity or item of payment may be increased or decreased from the rates set forth herein by as much as 10 percent.

(c) *Applicability.* The provisions of the 1943 program contained herein, except where the context otherwise indicates, are applicable only to the Territories of Alaska and Hawaii and to Puerto Rico. They do not apply to any department or bureau of the United States Government or any corporation wholly owned by the United States, or to lands owned by the United States which were acquired or reserved for conservation purposes or which are to be retained permanently under Government ownership.

The program is applicable to land owned by corporations which are only partly owned by the United States, such as Federal Land Banks and Production Credit Associations.

The program is also applicable to land owned by the United States or by corporations wholly owned by the United States which is farmed by private persons if such land is to be temporarily under such Government or corporation ownership and was not acquired or reserved for conservation purposes. Such land shall include only that administered by the Farm Security Administration, the Reconstruction Finance Corporation, the Home Owners' Loan Corporation, or the Federal Farm Mortgage Corporation, unless the Agricultural Adjustment Agency finds that land administered by other agencies complies with all of the foregoing provisions for eligibility.

Chapter XI—War Food Administration

[FDO 55, Amdt. 1]

PART 1405—FRUITS AND VEGETABLES

CALIFORNIA PLUMS

Food Distribution Order No. 55, § 1405.7, issued by the War Food Administrator on June 7, 1943 (8 F.R. 7626) is amended as follows:

1. By deleting from (a) (3) thereof the words "in the current of interstate or foreign commerce, or so as directly to burden, obstruct, or affect such commerce" and inserting in lieu thereof the words "from a point within the State of California to a point outside said State."

2. By inserting in (b) (2), immediately following the words "Branch Office, War Food Administration, 331 Federal Building, P. O. Box 230, Sacramento, California," the words "or to the program manager at such place as he shall designate and of which he shall give public notice."

3. By relettering paragraphs (c), (d), (e), (f), (g), (h), and (i) of said section as paragraphs (d), (e), (f), (g), (h), (i), and (j), respectively.

4. By inserting as paragraph (c) of said section the following:

(c) *Administration.* (1) The Director shall designate a person to act as "program manager" under this order, and shall fix the amount of his salary. Insofar as he performs functions for the United States, the program manager will act under his appointment as collaborator without compensation from the United States, which appointment will be otherwise provided. The program manager shall be subject to removal by the Director at any time, and all his acts shall be subject to the continuing right of the Director to disapprove of the same at any time. Upon such disapproval, his acts shall be deemed null and void except insofar as any other person has acted in reliance thereon or in compliance therewith prior to such disapproval. The program manager is authorized and directed to:

(i) Receive and examine the inspection certificates; compile records of shipments; assemble data with respect to the growing, shipping, and marketing conditions affecting plums; and furnish to the Director such available information as may be requested.

(ii) Keep books and records which will clearly reflect all of his acts and transactions, which books and records shall be subject at any time to examination by the Director.

(iii) Collect the assessments as provided in this order from those persons required by the order to pay such assessments.

(iv) Deliver to the Director promptly after his designation a bond, in an amount and with surety thereon satisfactory to the Director, conditioned upon the faithful performance of his duties under this order.

(v) Employ and fix the compensation of such persons as may be necessary to enable him to perform his duties hereunder.

(vi) Obtain a bond with reasonable surety thereon covering each employe of his office who handles funds under the order.

(vii) Investigate and report to the Director any violation of this order.

(viii) Submit to the Director for approval a budget of expenses hereunder of the program manager and the Advisory Committee.

(ix) Pay out of the funds collected by him as program manager the cost of his bond and of the bonds of his employees, his own compensation and that of his employees, the per diem allowance and traveling expenses of the Advisory Committee, and all other expenses necessarily incurred by him in the performance of his duties hereunder.

(x) Cause his books of account to be audited whenever requested by, and submit a copy of such audit to, the Director.

(2) The Director shall designate seven persons to act on an "Advisory Committee" and an alternate member for each of the members. Any such alternate shall act only in event that the member for whom he is alternate is unable to act. The program manager shall be an additional member ex officio and shall act as chairman of the Advisory Committee. Each member of the committee shall be subject to removal by the Director at any time. The Advisory Committee shall meet at the call of the chairman, or at the call of any four members thereof. The Committee members shall be paid their actual traveling expenses, and each member, except the Program Manager, shall be paid $5.00 for each day of attendance at a committee meeting. The Advisory Committee shall counsel with the program manager, and shall recommend to the Director such amendments to this order and such changes in the operation thereof as it deems advisable.

(3) Each person who ships plums shall pay to the program manager on demand made by the program manager from time to time the sum of one cent for each hundredweight of plums shipped by such person after May 1, 1943. Any money so collected and remaining in the possession of the program manager upon the termination of this order shall be distributed in such manner as the Director may order.

This amendment shall become effective the 21st day of July 1943.

[Suspension Order Docket No. FDA-NE-11]

PART 1590—SUSPENSION ORDERS

OLYMPIC CONFECTIONERY

Gust Psychos, an individual doing business as Olympic Confectionery, 103 North Main Street, Coudersport, Pennsylvania (hereinafter referred to as "respondent"), was duly served with a statement of charges and procedure, in which it was alleged that respondent had violated Food Distribution Order 13 (8 F.R. 2530), issued by the Secretary of Agriculture on February 2, 1943, and made effective by him on February 3, 1943, by selling and delivering cream, the milk fat content of which was in excess of 19 per cent. The respondent, in a letter which has been considered as his answer, admitted the commission of the violations alleged in the statement of charges and stated that he did not wish to be heard thereon. The respondent and his employee also executed sworn statements admitting the sales and deliveries of cream in violation of Food Distribution Order 13, as alleged in the statement of charges. Sworn statements executed by a special agent of the Compliance Branch, Food Distribution Administration, War Food Administration, and another investigator corroborate the admissions of the respondent and his employee. An analysis by a commercial testing laboratory of the cream involved in this matter revealed that the milk fat content thereof was 41 per cent.

Upon the basis of these sworn statements, the analysis, and the admissions contained in the answer, the War Food Administrator, acting under authority conferred upon him by Executive Order No. 9334 (8 F.R. 5423), hereby determines, that:

(a) Respondent is a producer as that term is defined in Food Distribution Order 13, doing business as Olympic Confectionery, at 103 North Main Street, Coudersport, Pennsylvania.

(b) Respondent sold and delivered cream, on or about May 2, 1943, at his place of business, known as Olympic Confectionery, 103 North Main Street, Coudersport, Pennsylvania, the milk fat content of which was 41 per cent, in violation of said Food Distribution Order 13, which provides that no producer may deliver cream having a milk fat content in excess of 19 per cent.

Because of the great scarcity of dairy products, including cream, in the normal channels of distribution for the fulfillment of the requirements of the United States for defense, for private account, and for export, and because of the importance of having dairy products, including cream, distributed in a manner to assure an adequate supply and efficient distribution thereof for war and essential civilian needs, the aforesaid violation by the respondent has impeded the war effort and has, therefore, been contrary to public interest. It also appears that further violations by the respondent are likely unless appropriate action is taken.

It is therefore ordered, That:

§ 1590.2 *Suspension order against Gust Psychos, an individual doing business as Olympic Confectionery.* (a) The respondent, his agents, successors, or assigns shall not, in any manner, either directly or indirectly, (1) deliver cream to any person; or (2) accept delivery of cream from any person.

(b) No person shall, in any manner, directly or indirectly, deliver cream to the respondent, his agents, successors, or assigns.

(c) Nothing contained in this order shall be deemed to relieve the respondent, his agent, successors, or assigns from any restriction, prohibition or provision contained in any order or regulation of the War Food Administrator, except insofar as the same may be inconsistent with the provisions hereof.

(d) The term "person", as used in this order, means any individual, partnership, association, business trust, corporation, or any organized group of persons whether incorporated or not.

(e) Any terms used in this order which are defined in Food Distribution Order 13 (8 F.R. 2530), issued by the Secretary of Agriculture on February 2, 1943, and made effective by him on February 3, 1943, shall have the meaning therein given to them, unless otherwise distinctly expressed or manifestly incompatible with the intent thereof.

(f) This order shall become effective 12:01 a. m., e. w. t., July 29 1943, and, unless sooner terminated, shall expire 11:59 p. m., e. w. t., August 27, 1943.

Issued this 19th day of July 1943.

[Docket No. A-1548, Part II]

PART 333—MINIMUM PRICE SCHEDULE, DISTRICT NO. 13

MEMORANDUM OPINION AND ORDER OF DIRECTOR

Memorandum opinion and order of the Director in the matter of the petition of District Board No. 13 for the establishment of price classifications and minimum prices for the coals of the Carr No. 2 Mine (Mine Index No. 1273) of W. C. Carr, and for the coals of the Tennessee Valley Mine (Mine Index No. 276) of R. D. Campbell for all shipments except truck.

This proceeding was instituted upon a petition [1] filed with the Bituminous Coal Division on July 22, 1942, by District Board 13, pursuant to section 4 II (d) of the Bituminous Coal Act of 1937, requesting the establishment of price classifications and minimum prices for the coals of certain mines in District No. 13 for which classifications and effective minimum prices have not previously been established. The petition herein proposes the establishment of price classifications and minimum prices for the coals of the Carr No. 2 Mine (Mine Index No. 1273), of W. C. Carr,[2] and the Tennessee Valley Mine (Mine Index No. 276), of R. D. Campbell, for all shipments except truck.

Pursuant to appropriate order, and after notice to interested persons, a hearing in this matter was held on September 29, 1942, before Travis Williams, a duly designated Examiner of the Division, at a hearing room thereof in Washington, D. C. Interested persons were afforded an opportunity to be present, adduce evidence, cross-examine witnesses, and otherwise be heard. District Board 13 appeared. The parties waived the preparation and filing of a Report by the Examiner and the record was thereupon submitted to me for consideration.

The Carr No. 2 Mine [3] is a small mine recently opened, producing approximately 50 tons daily, and operating in the Wadsworth Seam in St. Clair County, Alabama. Its coal moves to the southeastern market areas of central Tennessee, north Alabama and northwest Georgia. According to N. E. Cross, Secretary of District Board 13, and the only witness at the hearing, there are no other mines in St. Clair County operating in the Wadsworth Seam which ship by rail. There are, however, certain mines in Shelby County, operating in the Wadsworth Seam, which ship by rail,[4] and the price classifications and minimum prices proposed for the Carr No. 2 Mine are the same as those previously established for the Shelby County mines operating in the Wadsworth Seam. The record further discloses that the Wadsworth Seam in St. Clair County is approximately of the same quality as the Wadsworth Seam in Shelby County.[5] The witness maintained that the differential between truck and rail prices in Size Groups 13 and 23 as proposed for the Carr No. 2 Mine is the same as that heretofore established for the Shelby County mines operating in the Wadsworth Seam. Finally, the witness testified that the Carr No. 2 Mine is located about six miles from Odenville, the Odenville, the proposed shipping point, which was established as the point of origin by the Interstate Commerce Commission,[6] and that the prices proposed for railroad locomotive fuel were the same as those established for the Brookston Mine (Mine Index No. 55) in St. Clair County, which is the only other mine connected with the Seaboard railroad.[7]

The uncontroverted evidence establishes that the coals of the Carr No. 2 Mine of St. Clair County are of similar quality and analytical content, move to similar market areas, and enjoy similar market acceptability as do the coals of the Shelby County mines operating in the Wadsworth Seam referred to above. I find, therefore, that the price classifications and minimum prices for the Carr No. 2 Mine should be correlated with the price classifications and minimum prices of these Shelby County mines.

The petition also requests price classifications and minimum prices for the coals of the Tennessee Valley Mine (Mine Index No. 276) of R. D. Campbell, located in Jackson County, Alabama.[8] This mine produces approximately 25,000 tons annually, and is located near the Tennessee-Alabama borderline. Originally it was coordinated in price for

[1] By an order dated August 20, 1942, granting temporary relief and conditionally providing for final relief, petitioner was granted the relief requested for all mines, except, among others, the Carr No. 2 Mine (Mine Index No. 1273) and the Tennessee Valley Mine (Mine Index No. 276) for which this proceeding was severed and scheduled for hearing.

[2] The schedules of effective minimum prices for District No. 13 refer to the code member as W. C. Carr (Carr Coal Co.).

[3] Also referred to in the record as the Gillison Coal Company Mine.

[4] Ann Blair Mine (Mine Index No. 134) of Neill Coal Company, and Pen's Wadsworth and Pen's Wadsworth #2 Mines (Mine Index Nos. 514 and 1424) of the Pen Coal Company.

[5] The foregoing is confirmed by the fact that proximate analyses of mine run coal of the Carr No. 2 Mine in St. Clair County and that of the Pen Coal Company's Mine in Shelby County indicate these following similarities, i. e., in moisture (1.40 and 1.17), volatile (33.60 and 35.95), fixed carbon (57.50 and 56.20), and ash (7.50 and 7.67). Although sulphur content and B. t. u.'s were not available for the Pen Coal Company's Mine, the witness asserted that the coals of the respective mines were also similar in these qualities.

[6] Supplement No. 29 to I.C.C., A8010.

[7] Prices for vessel fuel were proposed to equal those of the Cahaba mines, such as Mine Index Nos. 9, 11, 12, 17, 58 and 69.

[8] The schedule of effective minimum prices for District No. 13 refers to this mine as the Tenn. Valley Mine (Mine Index No. 270) of R. D. Campbell (Tennessee Valley Coal Co.). Although originally designated as operating in the Talley Seam, it has since been ascertained that this mine operates in the Battle Creek Seam.

FEDERAL REGISTER, *Wednesday, July 21, 1943*

truck shipment with Subdistrict 2 truck mines in the same vicinity. The proposal to classify this mine for rail shipment depends on different factors. The record discloses that the coals of this mine are produced from the seam generally mined in Subdistrict 3. It appears further that these coals move over the N. C. & St. L. Railroad which connects the principal mines of Subdistrict 3, the Tennessee-Georgia area of District 13, and that freight rates from Bass, the principal shipping point, to the probable destination of this coal, are substantially similar to the freight rates of these Subdistrict 3 mines.[9] Inasmuch as the coals of the Tenn. Valley Mine will come into competition with the coals of the Subdistrict 3 mines rather than with those of the Subdistrict 1 mines, it was proposed that the Tenn. Valley Mine be classified for rail shipment the same as the Subdistrict 3 mines operating in the same seam. In the opinion of the witness, the requested relief will not disturb the coordinated relationship of District 13 coals. In the circumstances thus disclosed, I find that the Tenn. Valley Mine should be classified for rail shipment the same as Subdistrict 3 mines operating in the Battle Creek Seam.

In order, therefore, to reflect, as nearly as possible, the true value of the coals of the Carr No. 2 Mine and the Tenn. Valley Mine, and to preserve, as nearly as may be, existing fair competitive opportunities of producers in District 13, I find (1) that price classifications and minimum prices for the coals of the Carr No. 2 Mine should be established to equal those of similarly sized coals of Shelby County mines operating in the Wadsworth Seam; and (2) that the price classifications and minimum prices of the coals of the Tenn. Valley Mine should be established to equal those of similarly sized coals of Subdistrict 3 mines operating in the Battle Creek Seam. I find further that the foregoing price classifications and minimum prices comply with the standards set forth in sections 4 II (a) and (b) of the Act, and are required to effectuate the purposes thereof.

Upon the basis of the above findings of fact, and upon the entire record in this proceeding,

It is hereby ordered, That effective fifteen (15) days from the date hereof, § 333.6 (*General prices*), § 333.7 (*Special prices*—(a) *Prices for shipment to all railroads and for exclusive use of railroads*), § 333.7 (*Special prices*—(c) *Prices for shipment by railroad, applicable to all coal sold for steamship vessel fuel*) and § 333.25 (*Special prices*—(b) *Prices for shipment to all railroads for locomotive fuel, station heating, power plants and other uses*) in the schedule of effective minimum prices for District No. 13 for all shipments except truck is amended to include the price classifications and minimum prices for the coals of the Carr No. 2 Mine (Mine Index No. 1273) of W. C. Carr (Carr Coal Co.), St. Clair County, Alabama, and of the Tenn. Valley Mine (Mine Index No. 276) of R. D. Campbell (Tennessee Valley Coal Co.), Jackson County, Alabama, as set forth in Supplements R–I, II, III and IV, which supplements are hereinafter set forth and hereby made a part hereof.[10]

Dated: July 13, 1943.

PART 335—MINIMUM PRICE SCHEDULE, DISTRICT NO. 15

MEMORANDUM OPINION AND ORDER MODIFYING ORDER

Memorandum opinion and order modifying order dated May 13, 1943, in the matter of the petition of District Board No. 15 for revision of the effective minimum prices for certain coals produced in District No. 15.

On June 7, 1943 the petitioner herein filed an application for modification of the order issued in this docket on May 13, 1943, 8 F.R. 6921. Said application alleged that said order failed to give consideration to a change in the base price on certain sizes that became effective on October 1, 1942 in General Docket No. 21; that it failed to give consideration to the order dated July 29, 1942, 7 F.R. 6253, and the order dated August 22, 1942, 7 F.R. 6931, in Docket No. A–1533; that it failed to apply the freight rates made effective by order of Interstate Commerce Commission and Ex Parte No. 148 to minimum prices heretofore established; that it disturbed classification and coordination between and among minimum prices on coals for Marketing Area No. 75; petitioner requested that the order dated May 13, 1943 be modified to provide prices for Market Area No. 75 in accordance with "Appendix A" attached to said application.

It appearing that a reasonable showing of necessity has been made for the granting of temporary relief in the manner hereinafter set forth; and

No petition of intervention having been filed with the Division in the above-entitled matter; and

The following action being deemed necessary in order to effectuate the purposes of the Act;

It is ordered, That effective June 12, 1943 and pending final disposition of the above-entitled matter temporary relief is granted as follows: § 335.7 (*General prices; domestic, commercial and industrial coal schedule*) is amended by adding thereto Supplement R, which supplement is hereinafter set forth and hereby made a part hereof.

It is further ordered, That pleadings in opposition to the original petition in the above-entitled matter and applications to stay, terminate or modify the temporary relief herein granted may be filed with the Division within forty-five (45) days from the date of this order, pursuant to the rules and regulations governing practice and procedure before the Bituminous Coal Division in proceedings instituted pursuant to section 4 II (d) of the Bituminous Coal Act of 1937.

It is further ordered, That the relief herein granted shall become final sixty (60) days from the date of this order, unless it shall otherwise be ordered.

Dated: July 7, 1943.

AUTHORITY: Regulations in this subchapter issued under P.D. Reg. 1, as amended, 6 F.R. 6680; W.P.B. Reg. 1, 7 F.R. 561; E.O. 9024, 7 F.R. 329; E.O. 9040, 7 F.R. 527; E.O. 9125, 7 F.R. 2719; sec. 2 (a), 54 Stat. 676, as amended by 55 Stat. 236 and 56 Stat. 176.

PART 944—REGULATIONS APPLICABLE TO THE OPERATION OF THE PRIORITIES SYSTEM

[Priorities Reg. 13 as Amended July 19, 1943]

Section 944.34 *Priorities Regulation 13* is hereby amended to read as follows:

§ 944.34 *Priorities Regulation No. 13*—(a) *Purpose of this regulation.* This regulation, in general, describes the rules under which materials may be sold by persons who are not in the regular business of selling such materials. While most sales of this kind will be sales of frozen, idle, or extra materials, the regulation is broader in its scope. For example, a person who has idle materials on hand because his business has been converted to war work, or because the business he used to carry on has been stopped or limited by War Production Board orders, or whose contract has been cancelled or changed, may sell off the idle or excess materials only under the rules in this regulation and, if he follows this regulation, he does not have to look to any other order or regulation except in a few cases which are described below. This regulation also controls liquidation sales, bankruptcy sales, general auction sales, and other sales which are not considered sales in the regular course of business.

(b) *Special definitions used in this regulation.* This regulation deals only

[1] Form filed as part of the original document.

with "special sales" of "industrial materials." As used in the regulation, those terms have the following meanings:

(1) "Special sale" means a sale of material by a person who does not, in the regular course of his business, sell that material in that form. A sale by a retailer or a wholesaler of items from his stocks is not a special sale because that is what the retailer or wholesaler makes a regular business of doing. For the same reason, a sale by a manufacturer of the product he makes is not a special sale. But if a manufacturer sells the raw material he has bought to use in making his regular product, it is a special sale because selling raw material is not his regular business. Or if a contractor has bought material to build a building and cannot finish it and sells off the materials, that is a special sale because his business is building houses, not selling lumber and nails and pipe. Liquidation sales by trustees in bankdators (unless they are continuing to operate a business) and general auctioneers are special sales as they are considered not to be regularly in the business of selling any particular products.

(2) "Industrial material" means the kind of material products are made out of, or which are put together to make other products. The definition includes simple material forms like pipe, metal sheet and rod, wire, lumber, chemicals and yarn. It includes both new and used materials. It does not include assembled parts or products, like motors, valves or drums or anything which has already been put together so that it is no longer in a simple form. Also, the definition does not cover any of the following:

(i) *Scrap.* There are special orders covering certain types of scrap and, except in those cases, scrap may be sold to a scrap dealer.

(ii) *Foods for humans or animals, medicines, tobacco, oils and fats.* These products are regulated by the War Food Administration or are rationed by another government agency and so the orders of the War Production Board do not apply.

(iii) *Tools.* This regulation does not cover cutting tools, hand tools or any other tools. There are special orders covering such items.

(iv) *Finished products of the kind that are sold at retail and that are bought to be used just as they are, and not to be used in making something else.* For example, an ash tray, or a towel or sheet, or a metal sign or a lightning rod is used just as it is and is not used to make another product. But nails or wire or pipe or chemicals or a bolt of cloth are bought to be used in making something else and to be put together with other things, and they are covered by the regulation.

(c) *Kinds of special sales of industrial materials which may be made.* If a person wants to make a special sale (as described above) of an industrial material (as described above), the rules in this regulation apply and only these rules. There is no need to look at any other order or regulation, and these rules must be followed, no matter how the material was bought, and no matter what any other order or regulation provides. The only exceptions to this rule are stated in paragraph (f) (2). The types of special sales which may be made are the following:

(1) *Steel and Iron reported to Steel Recovery Corporation.* If the industrial material is iron or steel that has been reported as idle or excess inventory to the War Production Board, in care of the Steel Recovery Corporation in Pittsburgh, it may not be sold without permission from a regional office of the War Production Board or from the War Production Board office at Steel Recovery Corporation. Each regional office can only give permission to sell iron and steel which is located in that region, so, if application is made to a regional office, it must be made to the head office of the region in which the iron or steel is located. Either the buyer or the seller may apply for permission, in person, or by writing or telephoning. The permission can be given only if the person applying gives exact details of the proposed sale, including the names of the buyer and seller, the serial number and item number on the seller's report form, and an exact description of the weight, size, analysis, finish and form of the material and, if the buyer is using a CMP allotment to buy the material, the CMP symbol and number which he will use. The application should also tell what the iron or steel will be used for. It is necessary to keep close track of these sales so that the master record of idle and excess iron and steel can be kept up to date and material will not be listed as available if it has already been sold.

(2) *Materials on List A.* If the industrial material that the seller wants to sell is one of the materials listed on List A attached to this regulation or is made out of one or more of those materials (and is not iron or steel which has been reported as idle or excess inventory as described in subparagraph (1) of this paragraph), the following are the only kinds of sales that can be made, and if the sale is permitted under any one of the following subparagraphs, it may be made:

(i) A holder may sell freely to one of the following Government corporations, or to anyone buying as agent for one of them: Commodity Credit Corporation, Defense Supplies Corporation, Metals Reserve Company, or Rubber Reserve Company.

(ii) A holder may sell if he has been given permission by the War Production Board to make the particular sale. This kind of permission can usually be given only by the War Production Board in Washington. Requests should be addressed to the Redistribution Division of the War Production Board and form WPB–1161 (PD–470) should be used in making the request. That form shows the kind of information which is needed before permission can be given. Copies of the form can be obtained in district or regional offices of the War Production Board.

(iii) A holder may sell freely to anyone if he has a total of less than $100 worth of the particular material sold, unless it is one of the materials listed on the attached List B. In deciding whether the holder has $100 worth, he must count all material of the same type and composition. For example, all bare copper wire, or all cattle hides, or all cotton duck. This paragraph does not mean that a person may sell freely lots worth less than $100 if he has more than that amount. It only allows the sale if all he has of that kind of material is worth less than $100

(iv) If the material is copper, copper base alloy, aluminum or steel in a form described as a "controlled material" in CMP Regulation 1, the holder may sell it to fill an authorized controlled material order or to a buyer who gives him an order bearing a CMP allotment symbol and number and this certification:

> The undersigned certifies that he is entitled under CMP regulations to place an authorized controlled material order for the above material.
>
> ----------

Or the certification may be the optional form set out in CMP Regulation 7.

(v) Sales may be made in accordance with List A. That list has four columns showing classes of buyers who might want to buy materials. Opposite each material on the list in each column is shown whether, and under what conditions, sales can be made to the class of buyer described in the heading of the column.

(3) *Special orders.* If the War Production Board, by an order or in any other way, has ruled that all persons engaged in a particular business may sell or exchange materials between themselves, they can do so (unless the material is iron or steel covered by paragraph (c) (1)) and the other parts of this regulation do not forbid it.

(4) *Materials not on List A.* If the holder's industrial material is not on List A, he may sell freely to anyone.

(d) *Transfers within a company.* If a company wants to move material from one branch or subsidiary to another, but the transfer is not a sale because no money changes hands, the company should determine whether the branch or subsidiary which holds the material could sell it to the other for cash under this regulation. If so, the transfer may be made under this regulation even though it is not a sale.

(e) *Replacing material sold.* If a person sells material under this regulation to someone who gives him a priority rating or a CMP allotment symbol or number, the seller cannot use the rating or allotment to replace the material he has sold. The effect of the rating or symbol or number stops when the seller receives it.

(f) *Sales not covered by this regulation.* (1) If a sale is not a "special sale" (as described in paragraph (b) (1)) or if the item to be sold is not an "industrial material" (as described in paragraph (b) (2)), this regulation does not govern the sale and any other orders or regulations apply. There are special orders which deal with some kinds of equipment, and there are general rules in § 944.11 of Priorities Regulation No. 1. Any field office of the War Production Board can give information about these orders.

(2) If another order or regulation expressly mentions Priorities Regulation No. 13 and says that this regulation does not apply to a particular type of sale, then that order or regulation takes the place of this regulation. There are very few of those orders, principally relating to chemicals, and there are special rules which have been laid down for certain aircraft materials. Otherwise, there is no necessity of referring to any other order or regulation if the making of a special sale of an industrial material is involved. If any seller is allowed to make a sale under this regulation, the buyer is permitted to buy and accept delivery, except that:

(i) The buyer may not violate any regulation or order controlling the quantity of material which he may have or buy or receive or the amount of any product he may make or the use that he may make of any particular material. All the prohibitions in orders against the use of materials for particular purposes remain in effect.

(ii) If any order or regulation provides that a buyer of material must make any report or furnish any information either to the War Production Board or to the seller, this regulation does not excuse him from these requirements.

(iii) If any holder of material knows that a person who wants to buy it will use it for a prohibited purpose or would have more of the material than he is permitted to have, the sale cannot be made.

(g) *What records and reports must be kept and made.* (1) Anyone who has reported copper or copper base alloy to the War Production Board, care of Copper Recovery Corporation, New York, and who sells or transfers an item that he has reported must immediately tell Copper Recovery Corporation about the sale so that its records can be kept accurate by taking that item off its list of available material. The report should show clearly the item or lot number on the form on which the seller reported the material. A simple way of giving notice is to send a copy of the invoice of sale.

(2) Any person making a sale under this regulation must keep sufficient records so that he can show that the sale was permitted under this regulation, but no reports of sales need be made except for copper and copper base alloys under the paragraph above, or unless List A has a note requiring reports.

(h) *Listing materials with the War Production Board.* If anyone has any extra, idle or frozen material that he wants to sell, he should tell his nearest War Production Board office about the material and they will try to help him.

(i) *Letters and questions.* Any letters or questions about this regulation should be sent either to the Redistribution Division of the War Production Board in Washington, marked "Ref: P. R. 13", or to any of the field offices of the War Production Board, marked for the attention of the Redistribution Manager.

(j) The reporting requirements in this regulation have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

Issued this 19th day of July 1943.

WAR PRODUCTION BOARD,

Recording Secretary.

LIST A

NOTE: Schedule A redesignated List A; introductory explanation amended; items "Aluminum," "Copper," "Iron," "Steel and Wrought Iron" in Part I amended; items "Ethyl acetate," "Isopropyl acetate" in Part II amended; items "Acetaldehyde," "Alcohols, denaturants," "Congo Copal," "Methyl isobutyl ketone," "Staybelite," "Tapioca flour," added to Part II; items "Nitrocellulose, soluble," "Paraffin, chlorinated" revoked from Part II; items "Jewel bearing material," "Kapok (new)" amended in Part III; items "Broom corn," "Coir fiber and products," "Horse mane hair" added to Part III; July 19, 1943.

Explanation. This list is described in paragraph (c) (2) (v) of the regulation. In column (1) are listed the scarce materials that are restricted under the regulation. Columns (2), (3), (4) and (5) each applies to a type of possible buyer. Opposite each material in each column is shown the conditions under which a special sale of the particular material may be made to the person described in the heading of the column.

Column (2) applies to persons who make or produce material in the form in which the holder bought it. If the holder bought copper wire, column (2) refers to a wire mill, which makes copper wire. If he bought a chemical, it refers to a company who makes or produces that kind of chemical.

Column (3) refers to persons who have a permitted use for the kind of material the holder has. If the holder has some leather to sell, column (3) would cover anyone else who has a permitted use for that kind of leather in making a product.

Column (4) refers to persons who buy new or used, rejected or second-grade materials and who rework them or make them over into something that is as good as new or can be used as if it were new. If the holder has some solvent that he has used until it is dirty or no longer usable, and some other person is in the business of cleaning the solvent so as to make it usable again, that other person would be a "reprocessor". Also, a secondary smelter who melted metal into alloy forms would be a reprocessor in column (4).

Column (5) relates to persons who are wholesalers dealing in the material the holder has, like a wholesaler in chemicals or textiles. Column (6) contains notes which should be read whenever a star (*) shows on the list.

If the list shows "No", it means that the holder cannot sell to the class of person mentioned in the column head without special permission of the War Production Board except when a note in Column (6) allows certain kinds of sales. Paragraph (c) (2) (ii) of the body of the regulation tells how to get permission.

If the list shows "PR" followed by a letter and number, like "PR AA-5", it means that the holder can sell to anyone who can give him an AA-5 priority rating for the sale, or a higher rating.

If the list shows "W.O.P.", it means the holder can sell to the person at the head of the column without any priority rating or allocation.

If the list shows "X", it means that there are no persons who fall in the description at the top of the column so far as that particular material is concerned.

As pointed out in the body of the regulation, no one may buy if in doing so he would break any rule about the amount of a material he may have, and no buyer may use material for a forbidden use. Also, the buyer must make any reports that are required by any order.

PART 1010—SUSPENSION ORDERS

[Amdt. 1 to Suspension Order S-318]

THE MAY COMPANY

The May Company has appealed from the provisions of Suspension Order S-318, issued May 12, 1943. After the respondent had presented its appeal and argument in person, including presentation of additional evidence, the Chief Compliance Commissioner, after reviewing the case, has denied the appeal, except that he has directed that paragraph (a) of the suspension order be modified so as to remove maintenance and repair items from the prohibitive terms of the order.

In view of the foregoing, paragraph (a) of § 1010.318, Suspension Order S-318, issued May 12, 1943, is hereby amended to read as follows:

(a) Neither The May Company, its successors or assigns, nor any other person, shall order, purchase, accept delivery of, withdraw from inventory or in any manner secure or use material or construction plant in order to begin construction or to continue construction on the premises situated at Eighth and Broadway in Los Angeles, California, operated by The May Company as a department store, except as specifically authorized in writing by the War Production Board.

Issued this 19th day of July 1943.

PART 1010—SUSPENSION ORDERS

[Suspension Order S-366]

RICHTER METALCRAFT CORPORATION

The respondent, Richter Metalcraft Corporation, a New York corporation, now located at 160 East First Street, Mount Vernon, New York, is a manufacturer of electrical items, primarily desk lamps and lighting fixtures.

During the period from November 14, 1942 to January 8, 1943, the respondent produced approximately 418 electric heaters to fill orders or contracts having a preference rating lower than A-2. This constituted a violation of Order L-65 as amended September 30, 1942.

As a result of having been engaged for ten years in the manufacture of lighting fixtures, and of the wide publicity given to restrictions on the production of electrical equipment and appliances for nonessential uses, the Richter Metalcraft Corporation must be considered as having known of the restrictions of Order L-65 on the manufacture of electric heaters.

The respondent's actions have hampered and impeded the war effort of the United States by diverting scarce materials to uses not authorized by the War Production Board. In view of the foregoing; *It is hereby ordered*, That:

§ 1010.366 *Suspension Order S-366.* (a) Deliveries of material to Richter Metalcraft Corporation, its successors or assigns, shall not be accorded priority over deliveries under any other contract or order, and no preference ratings shall be assigned, applied or extended to such deliveries by means of preference rating certificates, preference rating orders, general preference orders or any other orders or regulations of the War Production Board, unless hereafter specifically authorized in writing by the War Production Board.

(b) No allocation or allotment shall be made to Richter Metalcraft Corporation, its successors or assigns, of any material or product, the supply or distribution of which is governed by any order of the War Production Board, unless hereafter specifically authorized in writing by the War Production Board.

(c) Nothing contained in this order shall be deemed to relieve Richter Metalcraft Corporation, its successors or assigns, from any restriction, prohibition or provision contained in any other order or regulation of the War Production Board, except in so far as the same may be inconsistent with the provisions hereof.

(d) This order shall take effect on July 20, 1943 and expire on October 20, 1943.

Issued this 13th day of July 1943.

[Revocation of General Preference Order M-118]

§ 1150.1 *General Preference Order M-118, as amended,* is hereby revoked, the said order having been superseded by Food Distribution Order 47, War Food Administration. This action shall not be construed to affect in any way any liability or penalty accrued or incurred under said Order M-118.

Issued this 20th day of July 1943.

The order title "General Preference Order M-244" is hereby amended to read "Allocation Order M-244".

Section 3100.1 is hereby amended to read as follows:

The fulfillment of the requirements for the defense of the United States has created a shortage in the supply of furnace type carbon black for defense, for private account and for export; and the following order is deemed necessary in the public interest and to promote the national defense:

§ 3100.1 (*Allocation Order M-244*)—(a) *Definitions.* (1) "Furnace type carbon black" means the black produced by the thermal decomposition of hydrocarbons and includes the soft and semi-reinforcing blacks, but excludes the channel carbon blacks and lamp blacks.

(2) "Supplier" means any person who produces furnace type carbon black, or who purchases furnace type carbon black for resale as furnace type carbon black.

(b) *Restrictions on delivery and acceptance of delivery.* (1) No supplier shall deliver furnace type carbon black to any other person, or divert furnace type carbon black to his own use, except as specifically authorized in writing by the War Production Board, upon application pursuant to Appendix A annexed.

(2) No person shall accept delivery of 5,000 pounds or more of furnace type carbon black in the aggregate from all suppliers during any calendar month, except as specifically authorized in writing by the War Production Board, upon application pursuant to Appendix B.

(3) No person shall accept delivery of between 100 and 5,000 pounds of furnace type carbon black in the aggregate from all suppliers during any calendar month, or place any purchase order for such delivery, unless and until he shall have furnished each supplier with a use certificate pursuant to Appendix C annexed.

(c) *Restrictions on use.* No person shall use furnace type carbon black, except as follows:

(1) In compounding rubber; or

(2) As specifically authorized in writing by the War Production Board, upon application pursuant to Appendix B annexed; or

(3) For any purpose, if the furnace type carbon black was in the user's inventory on October 16, 1942.

The use of furnace type carbon black in compounding rubber shall not be limited to the compounding of any particular type of rubber for any particular end use described in an application filed pursuant to Appendix B or C annexed, if, in view of changing circumstances, such limited use would not be practicable.

(d) *Special directions.* The War Production Board, at its discretion, may at any time issue special directions to any person with respect to:

(1) Use, delivery or acceptance of delivery of furnace type carbon black; or

(2) Production of furnace type carbon black; or

(3) Preparation and filing of forms and certificates required by Appendices A, B and C annexed.

(e) *Notification of customers.* Each supplier is requested to notify his regular customers as soon as possible of the requirements of this order, but failure to receive such notice shall not excuse any person from complying with the terms hereof.

(f) *Miscellaneous provisions.*—(1) *Applicability of regulations.* This order and all transactions affected hereby are subject to all applicable War Production Board regulations, as amended from time to time.

(2) *Intra-company deliveries.* The prohibitions and restrictions of this order with respect to deliveries shall apply only to deliveries to other persons, notwithstanding the provisions of Section 944.12 (intra-company deliveries) of Priorities Regulation No. 1, as amended, except in the case of suppliers diverting furnace type carbon black to their own use.

(3) *Approval of reporting requirements.* Forms WPB-2945 (formerly PD-600) and WPB-2947 (formerly PD-602) have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

(4) *Previous applications and allocations.* The amendment to this order on July 20, 1943, does not affect authorizations issued under this order prior to that date, and does not require renewal of applications filed previous to that date.

(5) *Violations.* Any person who wilfully violates any provision of this order, or who, in connection with this order, wilfully conceals a material fact or furnishes false information to any department or agency of the United States, is guilty of a crime and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using, material under priority control and may be deprived of priority assistance.

(6) *Communications.* All reports required to be filed hereunder, and all communications concerning this order shall, unless otherwise directed, be addressed to: War Production Board, Chemicals Division, Washington, D. C. Ref.: M-244.

Issued this 20th day of July 1943.

maple, birch, and beech flooring prevailing between October 1 and October 15, 1941, and has made adjustments for such relevant factors as he has determined and deemed to be of general applicability. So far as practicable, the Price Administrator has advised and consulted with representative members of the industry which will be affected by this regulation.

In the judgment of the Price Administrator, the maximum prices established by this regulation are and will be generally fair and equitable and will effectuate the purposes of the Emergency Price Control Act of 1942, as amended. § 1382.302 *Maximum prices for maple, birch and beech flooring.* Under the authority vested in the Price Administrator by the Emergency Price Control Act of 1942, as amended, and Executive Order No. 9250, Maximum Price Regulation No. 432 (Maple, Birch, and Beech Flooring) which is annexed hereto and made a part hereof, is hereby issued.

AUTHORITY: § 1382.302 issued under Pub. Laws 421 and 729, 77th Cong.; E.O. 9250, 7 F.R. 7871.

MAXIMUM PRICE REGULATION 432—MAPLE, BIRCH, AND BEECH FLOORING

Article I—Scope of the Regulation

SECTION 1. *Prices higher than ceiling prohibited.* (a) On and after July 24, 1943, regardless of any contract or other obligation, no person shall sell or deliver and no person shall buy or receive in the course of trade or business, any maple, birch, or beech flooring for direct-mill shipment at prices higher than the maximum prices fixed by this regulation, and no person shall agree, offer, or attempt to do any of these things.

(b) Prices lower than the maximum prices may, of course, be charged and paid.

SEC. 2. *What products, transactions, and persons are covered.* This regulation covers all direct-mill sales of maple, birch, and beech flooring graded as such under the effective Grading Rules of the Maple Flooring Manufacturers Association. The regulation applies regardless of the kind of mill or plant in which the flooring is produced, and regardless of whether the particular item is specifically priced in the price tables or not. Any person who makes a sale of this kind, for himself or others, is subject to this regulation.

Article II—Maximum Prices and Terms of Sale

SEC. 3. *Maximum f. o. b. mill prices.* (a) The maximum f. o. b. mill prices for maple, birch, and beech flooring are set forth in Article IV.

(b) *Small quantities.* The following additions per M' may be made when the purchaser (or purchasers in the case of a pool car) orders an item consisting of one species, thickness, and grade, in the following quantities:

Quantity ordered:	Addition per M'
3000 to 4000 feet	$1.00
2000 to 2999 feet	2.00
1000 to 1999 feet	2.50
999 feet or less	3.00

SEC. 4. *Delivered prices.* The general rule is that the maximum delivered price shall be a price not higher than the f. o. b. mill maximum price plus the actual transportation charges paid or incurred by the seller in making shipment directly from the mill to the point of delivery required by the purchaser. However, it is permissible to quote and charge delivered prices based on the rail rate times the estimated weight as given in the following table:

	Estimated weights per M'BM
Tongued and grooved flooring:	Weight pounds
3/8 x 1½"	1000
3/8 x 2"	1000
½ x 1½"	1400
½ x 2"	1400
½ x 2¼"	1400
5/8 x 1½"	1600
5/8 x 2"	1600
5/8 x 2¼"	1600
25/32 x 1½"	2000
25/32 x 2"	2000
25/32 x 2¼"	2000
25/32 x 3¼"	2250
33/32 x 2"	2250
33/32 x 2¼"	2400
33/32 x 3¼"	2500
33/32 x 4"	2500
41/32 x 2¼"	2560
41/32 x 3¼"	2700
Jointed flooring:	
25/32 x 2½"	2250
25/32 x 3½"	2400
33/32 x 2½"	2500
33/32 x 3½	2600

SEC. 5. *Grades, services, or extras not listed.* (a) If a seller wishes to sell a grade or item which is not specifically priced in the price tables, he must apply to the Lumber Branch, Office of Price Administration, Washington, D. C., for a maximum price. He must provide the following information:

(1) The requested price;

(2) A complete description of the item to be priced;

(3) The price differential between it and the most comparable item in the price tables, in October 1941, from the seller's own records, or if that is impossible, from experience of the trade. If no established price differential which can be used for comparison existed, a detailed analysis of the calculation of the requested price should be furnished.

(b) As soon as the request has been filed, quotations and deliveries may be made at the requested price, but the final payment may not be made until the price has been approved. Action on the request may be by letter or telegram.

Article III—Specific Duties and Privileges and Prohibited Practices

SEC. 6. *Adjustable pricing.* Any person may agree to sell at a price which can be increased up to the maximum price in effect at the time of delivery; but no person may, unless authorized by the Office of Price Administration, deliver or agree to deliver at prices to be adjusted upward in accordance with action taken by the Office of Price Administration after delivery. Such authorization may be given when a request for a change in the applicable maximum price is pending, but only if the authorization is necessary to promote distribution or production and if it will not interfere with the purposes of the Emergency Price Control Act of 1942, as amended. The authorization may be given by the Administrator or by any official of the Office of Price Administration to whom the authority to grant such authorization has been delegated. The authorization will be given by order, except that it may be given by letter or telegram when the contemplated revision will be the granting of an individual application for adjustment.

SEC. 7. *Petitions for adjustment or amendment.*—(a) *Government contracts.* (1) The term "Government contract" is here used to include any contract with the United States or any of its agencies or with the government or any governmental agency of any country whose defense the President deems vital to the defense of the United States under the terms of the Act of March 11, 1941, entitled "An Act to promote the Defense of the United States." The term also includes any subcontract under this kind of contract.

(2) Any person who has entered into or proposes to enter into a "Government contract", who believes that the maximum prices established by this regulation impede or threaten to impede production of maple, birch, or beech flooring essential to the war program, may file an application for adjustment in accordance with Procedural Regulation No. 6,[1] as amended, by the Office of Price Administration. As soon as the application is filed, contracts, deliveries, and payments may be made at the requested price, subject to refund if the requested price is disapproved or lowered. The seller must notify the buyer that the delivery is made subject to this refund.

(b) *Petitions for amendment.* Any person seeking an amendment of any provision of this regulation may file a petition for amendment in accordance with the provisions of Revised Procedural Regulation No. 1[2] issued by the Office of Price Administration.

SEC. 8. *Prohibited practices.* Any practice which is a device to get the effect of a higher-than-ceiling price without actually raising the dollars-and-cents price is as much a violation of this regulation as an outright over-ceiling price. This applies to changes in credit practices and cash discounts and to devices making use of commissions, services, transportation arrangements, premiums, special privileges, tying agreements, trade understandings and the like.

SEC. 9. *Records.* All sellers and all buyers of maple, birch, and beech flooring for direct-mill shipment must retain a copy of the invoice covering each transaction or maintain records in other form containing a complete description of the flooring, name and address of the other party to the transaction, date of sale, and the price paid, including any special addition for extra service, working, or specification. These records must be retained for two years, for inspection by the Office of Price Administration.

SEC. 10. *Enforcement.* Persons violating any provision of this regulation are subject to the criminal penalties, civil enforcement actions, suits for treble damages and proceedings for suspension of licenses provided for by the Emergency Price Control Act of 1942, as amended.

SEC. 11. *Imports.* The provisions of this regulation do not apply to the purchases, sales or deliveries of the commodities named in this regulation if they originate outside of and are imported into the continental United States. Sales, purchases and deliveries of such imported commodities are governed by the provisions of the General Maximum Price Regulation, and especially Revised Supplementary Regulation No. 12.

SEC. 12. *Relation to other regulations.* Any sale or delivery covered by this regulation is not subject to the General Maximum Price Regulation.[3]

SECTION 1. *Prohibition against dealing in used fruit and vegetable containers and parts thereof at prices above the maximum.* On and after July 26, 1943, regardless of any contract or other obligation, no person, other than a "farmers' cooperative" may sell or deliver, and no person may buy or receive any used fruit and vegetable containers or their component parts at prices higher than those contained in this regulation. No person shall agree, offer or attempt to do these things.

The provisions of this regulation shall not be applicable to sales or deliveries which, prior to the effective date of this regulation, have been received by a carrier, other than a carrier owned or controlled by the seller, for shipment to the purchaser.

SEC. 2. *Less than maximum prices.* Prices less than the maximum prices established by this regulation may, of course, be charged and paid.

SEC. 3. *To what products, transactions and persons this regulation applies*—(a) *Products covered.* This regulation, under the term "used fruit and vegetable containers" covers all used containers and component parts made of wood, solid fiber, or corrugated board or a combination of any of these materials used for packaging, handling, storing or shipping fresh fruits and vegetables. This regulation does not cover cooperage products and veneer or plywood drums.

(b) *Transactions covered.* This regulation covers all sales and purchases of used fruit and vegetable containers; except that sales to members by "farmers' cooperatives," as herein defined, and sales made in the states of Arizona, Utah, Nevada, California, Oregon and Washington are specifically exempt from the coverage of the regulation.

(c) *Persons covered.* This regulation extends to any person except a "farmers' cooperative," who makes a sale and any person who makes a purchase which is covered by the regulation.

Article II—Maximum Prices and Terms of Sale

SEC. 4. *Maximum prices.* The maximum prices, f. o. b. the seller's loading point, for used fruit and vegetable containers and parts are listed in the price tables of the Appendix (section 16) of this regulation.

SEC. 5. *Containers and parts not specifically priced.* Used fruit and vegetable containers and parts not specifically priced in this regulation are nevertheless subject to its terms. Any person desiring to buy or sell used fruit and vegetable containers not specifically priced herein shall make application to the Office of Price Administration, Washington, D. C., for approval of a price. The application shall contain a complete description of the container to be priced; the type of purchase or sale, that is, whether by an emptier, accumulator, dealer or the Army or Navy, and the requested price. The applicant may use the requested price, subject to adjustment upon the action of the Office of Price Administration, pending approval of the price. Approval may be by letter or telegram, and any requested price not disapproved within 15 days from receipt of application for approval shall be automatically approved until revoked or amended by the Office of Price Administration.

SEC. 6. *Additions for delivery.* On shipments by common or contract carriers the actual cost of transportation paid or incurred by the seller may be added to the maximum price, f. o. b. seller's loading plant. If shipment is by private truck owned or controlled by the seller, actual transportation costs may be added; except that in no case shall the addition exceed 80 percent of the common carrier truck charges for the same shipment.

SEC. 7. *What the invoice must contain.* All invoices must contain a sufficiently complete description of the containers or parts to show whether the price is proper or not. They must also show the name and address of the seller, the name and address of the purchaser, the quantity of each particular container, the origin and destination of the shipment, and any addition to the maximum price for delivery. In sales by dealers the invoice must also show the license number of the dealer.

SEC. 8. *Prohibited practices.* Any practice which is a device to get the effect of a higher-than-ceiling price without actually raising the dollars-and-cents price is as much a violation of this regulation as an outright over-ceiling price. This applies to devices making use of commissions, services, transportation arrangements, premiums, special privileges, tying-agreements, trade understandings, and the like.

Article III—Miscellaneous

SEC. 9. *Adjustable pricing.* Any person may agree to sell at a price which can be increased up to the maximum price in effect at the time of delivery; but no person may, unless authorized by the Office of Price Administration, deliver or agree to deliver at prices to be adjusted upward in accordance with action taken by the Office of Price Administration after delivery. Such authorization may be given when a request for a change in the applicable maximum price is pending, but only if the authorization is necessary to promote distribution or production and if it will not interfere with the purposes of the Emergency Price Control Act of 1942, as amended. The authorization may be given by the Administrator or by any official of the Office of Price Administration to whom the authority to grant such authorization has been delegated. The authorization will be given by order, except that it may be given by letter or telegram when the contemplated revision will be the granting of an individual application for adjustment.

SEC. 10. *Applications for adjustment and petitions for amendment*—(a) *Government contracts.* (1) The term "government contracts" is here used to include any contract with the United States or any of its agencies, or with the government or any governmental agency of any country whose defense the President deems vital to the defense of the United States under the terms of the Act of March 11, 1941, entitled "An Act to promote the defense of the United States". It also includes any subcontract under this kind of contract.

(2) Any person who has made or intends to make a "government contract" and who thinks that a maximum price established in this regulation is impeding or threatens distribution of used fruit and vegetable containers which are essential to the war program and which are or will be the subject of the contract, may file an application for adjustment in accordance with Procedural Regulation No. 6,[1] issued by the Office of Price Administration.

(b) *Petitions for amendment.* Any person seeking an amendment of any provision of this regulation may file a petition for amendment in accordance with the provisions of Revised Procedural Regulation No. 1,[2] issued by the Office of Price Administration.

SEC. 11. *Records and reports.* (a) All persons making sales covered by this regulation which amount to $50.00 or more in any one month must keep records which will show a complete description of the containers sold, the quantity, price, date of sale and the name and address of the buyer. Buyers must keep similar records including the name and address of the seller.

[2] 7 F.R. 8961; 8 F.R. 3313, 3533, 6173.

These records must be kept for two years for inspection by the Office of Price Administration.

(b) Any reports that the Office of Price Administration has required in the past, or requires from time to time must be submitted.

SEC. 12. *Enforcement.* (a) Persons violating any provision of this regulation are subject to the criminal penalties, civil enforcement actions, suits for treble damages, and proceedings for revocation of licenses provided for by the Emergency Price Control Act of 1942, as amended.

(b) War procurement agencies and their contracting or paying finance officers are not subject to any liability, civil or criminal, imposed by this regulation. "War procurement agencies" include the War Department, the Navy Department, the United States Maritime Commission and the Lend-Lease Section in the Procurement Division of the Treasury Department, or any of their agencies. Sales and purchases by such agencies are nevertheless subject to the terms of the regulation.

SEC. 13. *Licenses.* A license, as a condition of selling used fruit and vegetable containers or parts is required of every person covered by this regulation. Such license is hereby granted to all emptiers and accumulators. [Docket Nos. A-227, A-573, A-1734]

TRUAX-TRAER COAL COMPANY, ET AL.

MEMORANDUM OPINION AND ORDER OF THE DIRECTOR

In the matter of the petition of Truax-Traer Coal Company and United Electric Coal Companies on behalf of themselves and certain retail dealers in the Chicago Area requesting free alongside prices for the retail dealers, pursuant to section 4 II (d) of the Bituminous Coal Act of 1937; Docket No. A-227.

In the matter of the petition of Consumers' Counsel for free alongside prices from Districts 8 and 10 for the Hoskins Coal and Dock Corporation, pursuant to section 4 II (d) of the Bituminous Coal Act of 1937; Docket No. A-573.

In the matter of the petition of Central States Collieries, Inc., for the establishment of minimum prices for f. a. s. shipments to certain retail dealers in Chicago; Docket No. A-1734.

The above-entitled proceedings were instituted upon petitions filed pursuant to section 4 II (d) of the Bituminous Coal Act of 1937, by Truax-Traer Coal Company and United Electric Coal Companies (Docket No. A-227), Consumers' Counsel (Docket No. A-573), and Central States Collieries, Inc. (Docket No. A-1734), respectively, requesting the establishment of minimum prices for free alongside deliveries to specified retail coal dealers in the City of Chicago.

These three related proceedings raise questions involving the relationship of river and rail coals under the schedules of effective minimum prices established by the Bituminous Coal Division pursuant to the Bituminous Coal Act of 1937. The questions raised are complex and difficult and would justify extended investigation and analysis. I do not believe that this would be profitable, however, in view of the fact that the Act will expire August 24, 1943. The proceedings will accordingly become moot at that time. The record does not indicate that affected parties are being prejudiced by sales of coal under existing established prices and further relief for the short period remaining before the Act expires would not appear to be necessary or appropriate.

Accordingly, *It is ordered*, That the petitions filed in each of the above-entitled dockets, are severally dismissed, effective midnight, August 23, 1943.

Dated: July 19, 1943.

C. J. FANNON

MEMORANDUM OPINION AND ORDER TO CEASE AND DESIST

On June 1, 1943, after notice and hearing, Edward J. Hayes, a duly designated examiner of the Division, submitted a report in which he found that C. J. Fannon, operating the Blue Gem Mine, Mine Index No. 1648, near Barbourville, Kentucky, in District No. 8, wilfully violated the Bituminous Coal Code, the regulations thereunder and the order of the Director in General Docket No. 19, dated October 9, 1940, by selling and delivering on or about April 19, 1941 to J. R. Ketchum, approximately 150 tons of slack coals at a price of $1.00 per ton f. o. b. cars at Barbourville siding, Barbourville, Kentucky, although no minimum prices had been established for the coals produced for rail shipment at Mine Index No. 1648 at the time of the sale.

The examiner recommended that an order be entered requiring code member, C. J. Fannon, to cease and desist from selling coal in violation of the order of the Director in General Docket No. 19, dated October 9, 1940 or from otherwise violating the Code and the regulations thereunder.

Opportunity was afforded all parties to file exceptions to the examiner's report. No exceptions have been filed.

I have considered the report of the examiner and find that it adequately and accurately reflects the evidence disclosed in the record. Upon the basis of the proposed findings of fact, proposed conclusions of law, and recommendations set forth in the report, and upon the entire record in this proceeding:

It is hereby ordered, That the proposed findings of fact and proposed conclusions of law of the Examiner are approved and adopted as the findings of fact and conclusions of law of the Director;

It is further ordered, That C. J. Fannon, his agents, employees, representatives, heirs and assigns and all persons acting or claiming to act in his behalf, cease and desist from violation of the order of the Director, dated October 9, 1940, in General Docket No. 19 or from otherwise violating the Act, the code or orders, rules and regulations issued thereunder.

Notice is hereby given that upon failure or refusal to comply with this order, the Division may apply to a United States Circuit Court of Appeals for the enforcement thereof, or may otherwise proceed as authorized by the Act.

W. A. EDIE AND SON

MEMORANDUM OPINION AND ORDER TO CEASE AND DESIST

In the matter of W. A. Edie and Harold C. Edie, individually and as copartners, doing business as W. A. Edie & Son, code members, District No. 4.

On May 28, 1943, after notice and hearing, W. A. Cuff, a duly designated Examiner of the Division, submitted a report in which he found W. A. Edie and Harold C. Edie, individually and as copartners doing business as W. A. Edie & Son, operating the Edie Mine, Mine Index No. 1729, in Tuscarawas County, Ohio, Subdistrict No. 4 of District 4, wilfully violated section 4 II (e) of the Act and corresponding section of the code by selling and delivering to various persons during the period from January 1, 1941, through March 31, 1942, 445 tons of ¾" slack coal and during the period February 1 through November 30, 1942, 60 tons of ¾" lump coal at prices below the effective minima therefor established in the schedule of effective minimum prices for District No. 4 for truck shipments which were $1.80 and $2.25 per net ton f. o. b. the mine, respectively.

The examiner recommended that an order be entered requiring code members W. A. Edie and Harold C. Edie to cease and desist from selling coal at prices below the applicable minimum prices established by the Division or from otherwise violating the Act, the code, and orders, rules and regulations issued thereunder.

Opportunity was afforded all parties to file exceptions to the examiner's report. No exceptions have been filed.

I have considered the report of the examiner and find that it adequately and accurately reflects the evidence disclosed in the record. Upon the basis of the proposed findings of fact, proposed conclusions of law, and recommendations set forth in the Report, and upon the entire record in this proceeding;

It is hereby ordered, That the proposed findings of fact and proposed conclusions of law of the examiner are approved and adopted as the findings of fact and conclusions of law of the Director;

It is further ordered, That W. A. Edie and Harold C. Edie, individually and as copartners doing business as W. A. Edie & Son, a copartnership, their agents, employees, representatives, successors and assigns, and all persons acting or claiming to act in their behalf or interest cease and desist from violating section 4 II (e) of the Act, the corresponding section of the code, or from otherwise violating the Act, the code, or orders, rules and regulations issued thereunder.

Notice is hereby given that upon failure or refusal to comply with this order, the Division may apply to a United States Court of Appeals for the enforcement thereof, or may otherwise proceed as authorized by the Act.

The examiner recommended that an order be entered requiring code member, Charly Kolarich to cease and desist from violating the schedule of effective minimum prices for District No. 22 for all shipments or from otherwise violating the Act, the code and rules and regulations thereunder.

TAYLOR CABLE

MEMORANDUM OPINION AND ORDER OF THE DIRECTOR

In the matter of the petition of Taylor Cable, a code member in District No. 8, for revision of effective minimum prices for forked coal produced from the Cable Coal Mine (Mine Index No. 3299), for truck shipment pursuant to section 4 II (d) of the Bituminous Coal Act of 1937.

On June 17, 1943, after notice and hearing, Charles S. Mitchell, a duly designated examiner of the Bituminous Coal Division, filed a report in which he found that the effective minimum price for truck shipment of the forked coal (Size Group 3) produced at the Cable Mine (Mine Index No. 3299) of Taylor Cable, located in Wolfe County, Kentucky, Subdistrict 3, should not be reduced 35 cents per ton f. o. b. the mine, as requested in the petition herein, and recommended that an order be entered denying the petition.

An opportunity to file exceptions to the Report of the Examiner was afforded all interested parties. As of the date hereof, no such exceptions have been filed.

I have considered the entire record in this proceeding, including the report of the examiner, and I find that the examiner's proposed findings and conclusions are adequate and accurate and that his recommendation should be allowed. Accordingly, I have concluded to approve and adopt the proposed findings of fact and conclusions of law of the examiner as the findings of fact and conclusions of law of the Director.

Upon the basis of the entire record in this proceeding, and pursuant to section 4 II (d) and other provisions of the Bituminous Coal Act of 1937,

It is hereby ordered, That the proposed findings of fact and the proposed conclusions of law of the Examiner are approved and adopted as the findings of fact and conclusions of law of the Director;

It is further ordered, That the petition of Taylor Cable requesting a reduction of 35 cents per ton in the effective minimum price for the forked coal (Size Group 3) produced at the Cable Mine (Mine Index No. 3299) located in Wolfe County, Kentucky, Subdistrict 3 of District 10 is hereby denied.

[Region II Order G-1 Under Rev. MPR 122]

SOLID FUEL IN MIDDLESEX COUNTY, N. J.

Order No. G-1 Under § 1340.259 (a) (1) of Revised Maximum Price Regulation No. 122 (formerly Order No. 1).

It is the judgment of the Regional Administrator that there exists or threatens to exist in Middlesex County in the State of New Jersey, a shortage in the supply of a solid fuel which is essential to a standard of living consistent with the prosecution of the war; that such local shortage will be substantially reduced or eliminated by adjusting the maximum prices of dealers in Middlesex County for such solid fuel; and that such adjustment will not create or tend to create a shortage, or a need for increase in prices, in another locality, and will effectuate the purposes of the Emergency Price Control Act of 1942, as amended.

Accordingly, pursuant to the Emergency Price Control Act of 1942, as amended and § 1340.259 (a) (1) of Revised Maximum Price Regulation No. 122, and Revised Procedural Regulation No. 1, and for the reasons set forth in an opinion to be issued forthwith, *It is ordered*, That:

(a) On and after January 16, 1943, the maximum prices of dealers in Middlesex County, New Jersey, for the sale and delivery in Middlesex County of the sizes of anthracite coal set forth in the following schedules shall be the applicable adjusted maximum prices specified therein:

(1) *Maximum delivered prices.*

Size	Price per net ton delivered	Price per ½ net ton delivered
Egg, stove and nut	$12.60	$6.55
Pea	10.80	6.65
Buckwheat	9.00	4.75
Rice	8.00	4.25

(2) *Maximum prices at the dealer's yard.*

Size	Price per net ton	Price per net ½ ton	Price per cwt. for sales of 100 lbs. and over, but less than ½ ton	Price on cwt. basis for sales of less than 100 lbs.
Egg, stove, and nut	$10.60	$5.30	$.65	$.75
Pea	9.35	4.70	.60	.65
Buckwheat	7.70	3.85	.45	----------
Rice	6.70	3.35	.45	----------

(b) The foregoing adjusted maximum prices include the amount of the railroad freight rate increase incurred by dealers in Middlesex County as a result of the Interstate Commerce Commission's order in its Docket Ex Parte 148, effective March 18, 1942, and such railroad freight rate increase may not be added to the adjusted maximum prices, notwithstanding the provisions of § 1340.257 of Revised Maximum Price Regulation No. 122.

(c) Each dealer in Middlesex County may add to the adjusted maximum price for each size of fuel set forth in the above schedules any increase in his supplier's maximum price to him for the same fuel over such supplier's present maximum price to him for the same fuel; and may also add to such adjusted maximum price the amount authorized by Section 1340.265 of Revised Maximum Price Regulation No. 122 for taxes actually paid or payable by such dealer.

(d) The adjusted maximum prices prescribed herein shall not apply to sales and deliveries by dealers in Middlesex County to persons outside of such county.

(e) This order is subject to revocation or amendment by the Regional Administrator or by the Price Administrator at any time hereafter, either by special order or by price regulation issued hereafter, or in supplement or amendment hereafter issued as to any price regulation, the provisions of which may be contrary hereto.

(f) *Definition.* When used in this order:

(1) The size of anthracite coal described as egg, stove, nut, pea, buckwheat and rice shall refer to the same sizes of anthracite coal as were sold by the dealers in Middlesex County with such designation during December, 1941.

(2) The term "maximum delivered prices" used in paragraph (a) (1) hereof shall refer to the maximum prices for delivery to the purchaser's premises or to such other place in Middlesex County as the purchaser may designate.

(3) Unless the context otherwise requires, the definitions set forth in Revised Maximum Price Regulation No. 122 shall apply to terms used herein.

Issued January 16, 1943.

The Alabama-Georgia Syrup Company, Montgomery, Alabama, has made application under § 1499.3 (c) of General Maximum Price Regulation for determination of a maximum price for reconditioned used standard half barrels of approximately 35 gallons capacity, mainly of cypress construction used in the packaging of raw sugar cane syrup, and known to the trade as "syrup barrels." Due consideration has been given to the application, and an opinion in support of the Order has been issued simultaneously herewith. For the reasons set forth in the opinion under the authority vested in the Regional Administrator of the Office of Price Administration for Region IV by Administrative Order 25, (redesignated as General Order No. 32) issued and effective September 1, 1942, and in accordance with § 1499.3 (c) of General Maximum Price Regulation, *It is hereby ordered,* That:

I. *Authorization of a maximum price for reconditioned used syrup barrels for the Alabama-Georgia Syrup Company and other persons.* (1) On and after November 7, 1942, regardless of any contract or other obligation, the Alabama-Georgia Syrup Company may sell or deliver to any retail dealer for resale, and any retail dealer may, from the Alabama-Georgia Syrup Company, buy or receive for resale a reconditioned used syrup barrel at a price no higher than $2.60 per barrel.

(4) All credit terms, discounts, allowances and price differentials offered by the seller during the 1941 selling season shall be maintained.

II. *Requirements of marking.* All reconditioned used syrup barrels sold pursuant to this order shall be marked by the Alabama-Georgia Syrup Company prior to sale and delivery by branding, stencil, or other customary permanent means in such a manner that such unit shall be capable of immediate identification as an Alaga barrel.

III. *Requirements of notification and posting.* (1) The Alabama-Georgia Syrup Company shall on or before the effective date of this order, deliver a copy of such order to each retail dealer to whom deliveries of any reconditioned used syrup barrels have been made during the 1941 selling season, or during that portion of the 1942 selling season prior to the effective date hereof; and shall deliver a copy of such order to any other retail dealer on or before the first delivery of any such barrel to such other retail dealer after the effective date hereof.

(2) Every person making sales subject to this order shall post a copy of this order in a conspicuous place in his place of business, and shall make such order available during business hours for examination by any person requesting to see same.

IV. *Definitions.* For purposes of this order:

(1) "Retail dealer" shall mean any person who buys and receives reconditioned used syrup barrels for resale to the ultimate consumer.

(2) "Ultimate consumer" shall include any person who buys or receives reconditioned used syrup barrels for purposes of packaging raw sugar cane syrup at the place of production thereof, and such person for purposes of this regulation shall not be considered to be an industrial or commercial user.

(4) "Reconditioned used syrup barrel" shall mean a standard half barrel of approximately 35 gallons capacity, mainly of cypress construction, to which all operations of cleaning by steam, recooperage and of other reconditioning customary to the trade have been fully performed prior to the time of sale and delivery and which bears the marking required by paragraph II of this order.

(5) All other terms used, unless the context otherwise requires, shall be construed in accordance with § 1499.20 of General Maximum Price Regulation.

PART 1031—MOLASSES

[General Preference Order M–54 as Amended July 21, 1943]

The fulfillment of requirements for the defense of the United States has cre-

ated a shortage in the supply of molasses for defense, for private account and for export; and the following order is deemed necessary and appropriate in the public interest and to promote the national defense:

§ 1031.1 *General Preference Order M-54* — (a) *Definitions.* For the purposes of this order:

(1) "Molasses" means any molasses, sirup, sugar solution, or any form of fermentative sugar (derived from sugar cane or sugar beets) and hydrol (corn sugar molasses). The term does not, however, include sugar as defined in Rationing Order No. 3 or sugar intended for and used for manufacture into sugar as so defined, or edible molasses as defined in Food Distribution Order No. 51. Blackstrap molasses is any final molasses produced in the manufacture of sugar from sugar cane or from the refining of raw sugar and includes all beet molasses produced in the manufacture of sugar from sugar beets. Invert molasses is any molasses made from sugar cane without extraction of sugars. For the purpose of this order one gallon of invert molasses is to be construed as one and a half gallons of blackstrap molasses and one gallon of hydrol is to be construed as one gallon of blackstrap molasses.

(2) "Producer" means any person engaged in the production of molasses and includes any person who has molasses produced for him pursuant to toll agreement.

(3) "Importer" means any person who transports molasses in any manner into the continental United States. Release from the bonded custody of the United States Bureau of Customs shall be deemed a transportation.

(4) "Primary distributor" means any person, other than an importer or a producer, who sells molasses which he has acquired (other than as broker) from an importer or a producer.

(5) "Secondary distributor" means any person, other than an importer, producer or primary distributor, who sells molasses which he has acquired (other than as broker) from some person other than an importer or producer.

(6) A person may, at the same time, be an importer, a producer, a primary distributor and a secondary distributor. His classification, in a particular case, will be determined by the source of the molasses involved; i. e., with respect to molasses imported, he will be an importer, with respect to molasses acquired from a producer, he will be a primary distributor, etc.

(7) "Broker" means any person who buys and sells molasses on a fee basis as agent either for the buyer or the seller or both.

(8) "Class 1 purchaser" means any person who requires molasses in the manufacture of any one or more of the following products:

(i) Insecticides (except as provision is made therefor in paragraphs (a) (14) and (d) (3) hereof).

(ii) Lactic acid.

(iii) Graphite paste.

(iv) Printing rollers.

(v) Dye stuffs.

(vi) Ink.

(vii) Ephedrine.

(viii) Sugar for human consumption (produced from beet molasses).

(ix) Denatured rum for flavoring.

(x) Biological and pharmaceutical products for human and veterinary uses.

and any person who requires molasses for any one or more of the following purposes:

(xi) Dust extraction.

(xii) Leather tanning.

(9) "Class 2 purchaser" means any person who requires molasses in the manufacture (including custom grinding) of mixed feeds (including molasses treated beet pulp).

(10) "Class 3 purchaser" means any person who requires molasses in the manufacture of any one or more of the following products:

(i) Yeast.

(ii) Citric acid.

(12) "Class 5 purchaser" means any person who requires molasses in the manufacture (including blending and/or packaging) of any one or more of the following products:

(i) Molasses (edible).

(ii) Sirup (edible).

(13) "Class 6 purchaser" means any person who requires molasses in the manufacture of other products for human consumption (not specified above).

(14) "Class 7 purchaser" means any person who requires molasses for sale directly (without the intervention of any other handler) to persons who require the same for ensilage direct feed or insect control.

(15) "Calendar quarter" means the several three month periods of the year commencing January 1, April 1, July 1, and October 1.

(16) "Calendar quarterly supply" means a quantity of molasses not in excess of the quantity used by a purchaser listed above during a corresponding calendar quarter in the twelve month period ended June 30, 1941. Purchasers shall determine a calendar quarterly supply with respect to each use specified in the applicable subparagraph above. Quantity shall in all cases be computed on a blackstrap molasses basis.

(17) "30 day supply" means a quantity of molasses not in excess of one-twelfth of the quantity used by a purchaser listed above during the twelve month period ended June 30, 1941. Purchasers shall determine a 30 day supply with respect to each use specified in the applicable subparagraphs above. Quantity shall in all cases be computed on a blackstrap molasses basis.

SECTION 1. *Commodities and transactions covered by this regulation*—(a) *Transactions covered.* This regulation establishes maximum prices for all sales of second-hand machine tools and second-hand extras, and all rentals and leases of second-hand machine tools and extras by all persons. (For maximum prices for sales and rentals of new machine tools and extras, see Revised Price Schedule No. 67[2]—New Machine Tools.)

(b) *Definitions of second-hand machine tools and extras for the purposes of this regulation.* A "second-hand machine tool" is a machine tool which has been used. The term "machine tool" means all machines (except portable machine tools) for the cutting (except heat cutting), abrading, shaping, forming, straightening and forcing of metals. A "second-hand extra" means any used attachment for a machine tool which is standard supplementary equipment normally furnished by the manufacturer at additional cost to his price of the machine tool, any used attachment for a machine tool manufactured by a person other than the manufacturer of the machine tool to which it is to be attached, and all used attachments sold separately as replacements.

SEC. 2. *Prohibitions.* (a) On and after July 26, 1943, regardless of any contract or other obligation:

(1) No person shall sell, offer or agree to sell, negotiate the sale of, transfer, or deliver, and no person shall buy, offer or agree to buy, or accept transfer or delivery of, any second-hand machine tool or extra at a price higher than the maximum price established by this regulation.

(2) No person shall lease or rent or offer or agree to lease or rent any second-hand machine tool or extra at a rental price higher than the maximum rental price established by this regulation, and no person shall pay or receive a rental price for any second-hand machine tool or extra higher than the maximum rental price established by this regulation. However, nothing in this regulation shall require the reduction of the rental price specified in any lease or rental of second-hand machine tools or extras entered into before the effective date of this regulation at or below prices established by Maximum Price Regulation No. 136, as amended.

SEC. 3. *Maximum prices for sales*—(a) *Method of calculation.* Maximum prices for second-hand machine tools and second-hand extras f. o. b. wherever located, shall be the percentages set forth below of the March 1, 1941, price of the nearest equivalent new machine tool or extra having a price in effect on that date; except that prices arrived at by this computation may be adjusted upward to the nearest dollar. Attachments which are standard equipment normally furnished by the manufacturer at no additional cost above the price of the machine tool shall be considered part of the machine tool for the purpose of determining maximum prices and all such attachments must be included in order for the machine tool to be considered as rebuilt and guaranteed. Any attachments sold separately as replacements or in addition to equipment normally furnished at no additional cost, or manufactured by a person other than the manufacturer of the machine tool to which it is to be attached, shall be considered as extras. If an extra is sold separately, its age classification is determined by the date of its manufacture. If an extra is sold with a second-hand machine tool, the age classification of the extra is determined by the date of the manufacture of the machine tool with which it is sold.

CLASSIFICATION: *Age and condition*

Date of manufacture	1 Jan. 1 1936, and after	2 Jan. 1 1930, to Dec. 31, 1935	3 Jan. 1 1920, to Dec. 31, 1929	4 Before Jan. 1, 1920
	Percent	*Percent*	*Percent*	*Percent*
Rebuilt and guaranteed	95	90	80	70
Other condition	70	65	55	45

(b) *Determination of date of manufacture.* The date of manufacture can be determined from the serial number stamped on the machine by the manufacturer. Where the manufacturer's serial number and year of manufacture are not known to the seller or lessor the machine tool shall, for all purposes under this regulation, be deemed to have been manufactured prior to January 1, 1920. In all cases where the serial number is not known, and the seller or lessor contends that the machine tool was manufactured after January 1, 1920, all of the evidence upon which such contention is based must be submitted with the first report on such machine tool required by this regulation.

(c) *Meaning of the term "rebuilt and guaranteed".* A rebuilt machine tool is one in which worn or missing parts have been replaced or reworked, and which has been tested under power so as to prove that it has a substantially equivalent performance to that of the machine when new. The term "rebuilt and guaranteed" applies only to a machine tool which (1) has been rebuilt or is in equivalent condition to a rebuilt machine tool and is invoiced as such; (2) has been inspected, and tested under power so as to prove that it has a substantially equivalent performance to that of the machine when new; (3) carries a binding written guaranty of satisfactory performance for a period of not less than thirty days from date of shipment; *and* (4) is expressly invoiced as a rebuilt machine tool or its equivalent and as having been guaranteed for satisfactory operation for thirty days. In the event of a sale by a government agency, such agency may substitute for the warranty, the invoicing and the guaranty of satisfactory operation, a written certificate by a qualified person who is not engaged in the business of selling second-hand machine tools and who is approved by the purchaser, to the effect that (1) he has inspected the second-hand machine tool, that (2) all worn or missing parts have been replaced or reworked, and that (3) tested under power so as to prove that it has a substantially equivalent performance to that of the machine when new.

(d) *Determination of the nearest equivalent new machine tool and its March 1, 1941, price.* (1) Where for any second-hand machine tool an equivalent machine tool is named in "Prices of New Machine Tools as of March 1, 1941, Revised", set forth in Appendix A, that machine tool shall be considered the nearest equivalent new machine tool for all purposes under this regulation.

(2) Where for any machine tool a specific base price or a method of computing a specific base price is established in "Prices of New Machine Tools as of March 1, 1941, Revised", set forth in Appendix A, such base prices are to be deemed the March 1, 1941, price of the nearest equivalent new machine tool for all purposes under this regulation.

(3) Where a second-hand machine tool was first manufactured after March 1, 1941, and where a machine tool of new design is used as an equivalent and such machine tool was first manufactured after March 1, 1941, and did not have a price in effect on that date, the price of the first such machine tool manufactured shall be deemed to be the March 1, 1941, price of such machine tool for all purposes under this regulation.

(4) All prices stated in "Prices of New Machine Tools as of March 1, 1941, Revised", set forth in Appendix A are to be deemed prices in effect on March 1, 1941, for the machine tools, attachments, and extras opposite which they are set for all purposes under this regulation. All other data set forth in Appendix A is to be deemed correct for all purposes under this regulation.

(5) Where a geared head machine tool is used as an equivalent to a second-hand machine tool which is not a geared head machine tool, as defined in this regulation, the price of the equivalent new machine tool is determined by deducting 20% from the March 1, 1941, price of the new geared head machine tool.

(e) *Maximum prices for sales of part ownership in second-hand machine tools and extras.* The maximum price for a part ownership in a second-hand machine tool or second-hand extra shall be determined by multiplying the maximum price of the machine tool or extra by the percentage of the seller's ownership.

(f) *Dismantling and loading charges.* Maximum prices established by this regulation are for machine tools and extras f. o. b. wherever located. In the event the buyer elects to dismantle and load such machine tool, then the selling price plus the cost of dismantling and loading, not in excess of any maximum price established for such service, shall not exceed the maximum price established by this regulation.

(g) *Special packing charges.* If the buyer has required packing to his specifications, and such specifications involve an increase in cost over the cost of the packing normally furnished at no increase in price, the difference between the cost of the direct labor and materials used in such packing, and the cost of direct labor and materials used in standard packing may be added to the maximum price if billed or invoiced separately.

(h) *Financing charges.* Maximum prices established by this regulation shall not be increased by any charges for the extension of credit or any financing charge, unless (1) the seller during March 1941 required payment of an additional charge for the extension of credit to purchasers of the same class, and (2) the amount charged for financing the sale is separately stated and billed and is not in excess of the charge the seller had in effect during March 1941 for extension of credit involving the same amount and term.

(i) *Federal and State Taxes.* Any tax levied upon the sale of a second-hand machine tool or extra by any statute of the United States or statute or ordinance of any state or political subdivision thereof which does not prohibit payment of such tax by the purchaser may be collected by the seller in addition to the maximum price if such tax is stated and invoiced separately from the purchase price.

SEC. 4. *Sales by Defense Plant Corporation.* Notwithstanding any other provision of this regulation, the maximum price applicable to the sale by the Defense Plant Corporation of any second-hand machine tool or extra which was acquired by the Defense Plant Corporation for the purposes of rental shall be computed as provided in paragraphs (a) and (b) below:

(a) *Where the purchaser is the first lessee of the machine tool or extra under an agreement with the Defense Plant Corporation.* The maximum price shall be computed by adding the sum of the following:

(1) The cost of the machine tool or extra to the Defense Plant Corporation, f. o. b. the plant of the manufacturer of the machine tool or extra;

(2) The freight paid by the Defense Plant Corporation from the plant of the manufacturer of the machine tool or extra to the plant of the purchaser;

(3) The cost to the Defense Plant Corporation of unloading the machine tool or extra at the plant of the purchaser;

(4) The cost to the Defense Plant Corporation of the installation of the machine tool or extra in the plant of the purchaser;

(5) Interest on items in subparagraphs (1) to (4), inclusive, at the rate actually charged the purchaser under the agreement of lease between the Defense Plant Corporation and the purchaser, or if no interest rate was specified in such agreement the average rate charged by the Defense Plant Corporation to other lessees of comparable machine tools and extras, such interest to be computed from the date that each of such items was paid by the Defense Plant Corporation to the date of sale.

(6) Direct expenses actually incurred by Defense Plant Corporation and normally charged the purchaser under the agreement of lease between Defense Plant Corporation and the purchaser; or, if no provision for direct expense is specified in such agreement, direct expenses actually incurred by Defense Plant Corporation and normally charged by Defense Plant Corporation to other lessees of comparable machine tools and extras.

From the sum of items in subparagraphs (1) and (5), inclusive, *deduct* depreciation of the original total cost of acquisition by Defense Plant Corporation at the rate of eight per cent (8%) per annum from the date of initial use after acquisition by Defense Plant Corporation of such machine tool or extra to the date of sale, except that in the event of sale within ninety (90) days after such initial use no depreciation shall be deducted.

(b) *Where the purchaser is a person other than the first lessee of the machine tool or extra.* The maximum price delivered to the plant of the purchaser shall be computed by adding the sum of the following:

(1) The cost of the machine tool or extra to the Defense Plant Corporation, f. o. b. the plant of the manufacturer of the machine tool or extra;

(2) An allowance equal to the freight charge for the transportation of such machine tool or extra from the location of the machine tool or extra at the time of sale by Defense Plant Corporation to the plant of the purchaser. From the sum of paragraphs (1) and (2), *deduct* depreciation on the original total cost of acquisition by Defense Plant Corporation at the rate of eight per cent (8%) per annum from the date of initial use after acquisition by Defense Plant Corporation of such machine tool or extra to the date of sale, except that in the event of sale within ninety (90) days after such initial use no depreciation shall be deducted.

SEC. 5. *Adjustable pricing in Navy Department Emergency Plant Facilities Contracts.* Nothing in this regulation shall be construed to prevent the inclusion in any Navy Department Emergency Plant Facilities Contract of a provision for the sale of a second-hand machine tool or extra at a price not to exceed the maximum price at the time of delivery.

SEC. 6. *Maximum prices for leases*—(a) *Annual rental.* The maximum annual rental of any lease or rental entered into subsequent to the effective date of this regulation for a second-hand machine tool or extra shall be a sum equal to the maximum sale price multiplied by the applicable percentage rate set forth below:

	8-hour operation	16-hour operation	24-hour operation
	Percent	*Percent*	*Percent*
General use	25	30	35
Outdoor use of tools designed for indoor use	35	45	55

(b) *Less than annual rental.* The maximum daily rental shall be 1/200 of annual rental; the maximum monthly rental shall be 1/10 of annual rental.

(c) *Rates most favorable to lessee.* (1) Notwithstanding the provisions of paragraph (b) of this section, whenever a second-hand machine tool or extra rented or leased on a daily basis is used for so many days that the total rental at 1/200 of the annual rental price per day exceeds 1/10 of the annual rental, the maximum rental shall be the rental calculated in accordance with the provisions that apply to the monthly rentals. Whenever a second-hand machine tool or extra rented or leased on a monthly basis is used for so many months that the total rental at 1/10 of the annual rental per month exceeds the annual rental, the maximum rental shall be calculated at the annual rate.

(2) The total amount of rental payments received by a lessor or renter from any one person for the lease or rental of any second-hand machine tool or extra shall not exceed the maximum sale price of such machine tool or extra, calculated as of the date on which said machine tool or extra was first delivered to the person leasing or renting the machine tool. The preceding sentence shall be applicable even though such rental payments are made under distinct or successive leases or rentals of the same machine tool or extra. Rental payments shall be deemed to be between the parties to the original lease or rental of a second-hand machine

SEC. 7. *Less than maximum prices.* Selling or rental prices less than those set forth herein may be charged, demanded, paid, or offered.

It shall be a violation of this regulation for any person to pay a fee, commission, or other compensation for the finding or locating of, or for the services of anyone acting as a broker or dealer concerning a machine tool or extra if the total of any such charge and the selling or rental price charged that person for the machine tool exceeds the maximum price established by this regulation for the sale, lease, or rental of the machine tool.

Such reports shall be made according to instructions on said form, unless otherwise directed by the Office of Price Administration. Copies of Form 100:1, Revised, may be had upon request to the Regional Office of the Office of Price Administration. Form 100:1, Revised, may be reproduced by the seller, or printed on the reverse side of regular stock sheets if the style and content of the report is not changed and if the report is on 8½ x 11 inch paper.

(2) Each person making a report shall use a separate inventory number for each second-hand machine tool handled by him and shall use this number in making reports hereunder. All reports shall be signed by the owner or the person making the sale for the owner, or by a person authorized to sign for him.

(3) Where a person has acted as purchasing agent, auctioneer, or broker, he shall make a report on the second-hand machine tool as if it had been purchased and immediately sold by him (see paragraph (b) (2) herein) and shall report the amount paid by the purchaser, including any commission paid to him as purchasing agent, auctioneer, or broker. The making of a report as required by this subparagraph (3) relieves the owner of the necessity of filing a report on the same sale of the machine tool.

(4) For the purpose of reporting sales, the receipt of an order shall be reported as a sale. (If the order is later cancelled, the appropriate office of the Office of Price Administration is to be advised forthwith and the machine tool reported as added to inventory.)

(b) *Report of offering price or additions to stock*—(1) *Who shall file.* Any dealer who offers a second-hand machine tool for sale shall file, if he has not already reported such information, a separate report on each floor type second-hand machine tool and on each other type of second-hand machine tool (as defined in section 1 (b)) of any description which has an offering price of $100 or more in his stock or for sale through him as agent. If a second-hand machine tool is held in joint ownership, the inventory report shall be made by the person who has possession of the machine tool, or, if none of the owners has possession of it, by the person in whose name the machine tool was purchased.

(2) *Time of filing.* Reports required by paragraph (b) (1) of this section shall be filed not later than August 3, 1943, for each second-hand machine tool in stock as of July 26, 1943. A report for each second-hand machine tool added to stock after July 25, 1943, shall be filed not more than one week after the machine tool is purchased or otherwise acquired. When a second-hand machine tool is sold or otherwise disposed of within one week after acquisition and before the report of offering price or addition has been filed, such report shall not be required. In such case, however, the report of sale or other disposition (required by paragraph (c) or (d) of this section) shall note that no previous report on the machine tool has been filed. Failure to object to an offering price as disclosed by a report does not constitute approval of the price by this Office.

(3) *Reports of machine tools to be sold at auction.* An auctioneer proposing to sell at auction any second-hand machine tool or extra shall file with the Regional Office or District Office of the Office of Price Administration within whose jurisdiction the sale will be held, a complete inventory of all such items proposed to be offered for sale or sold at such auction sale. The maximum price applicable to such machine tool or extra must be set forth for each item. Such inventory shall be filed at least ten days prior to the date fixed for such sale. Unless such inventory is filed as aforesaid, no second-hand machine tool or extra can be sold or offered for sale at such auction. A second-hand machine tool or extra which is not listed on such inventory cannot be sold or offered for sale at such auction.

(c) *Reports of sale*—(1) *Who shall file.* Any person who sells or negotiates the sale of a second-hand machine tool or second-hand extra, except in the case of a sale by a person other than a dealer to a dealer, shall file a separate report, listing entries in all items from 1 through 22 on Form 100:1, Revised, on each floor type second-hand machine tool, or other type second-hand machine tool (as defined in section 1 (b)) sold for $100 or more, which is sold or otherwise disposed of by him or through him as agent, broker, or auctioneer. The machine tool and each extra must be itemized, described fully, given trade name, etc., and priced, in order as invoiced. When a second-hand machine tool that is held in joint ownership is sold, the person in whose name the sale is made shall report the sale, referring to the inventory number previously assigned to the machine tool.

(2) *Time of filing.* A report for each second-hand machine tool sold or otherwise disposed of shall be filed within one week after the transaction. Every report of sale or other disposition shall state the name and address of the purchaser and state, under Item 21 of Form 100:1, Revised, whether the purchaser is a dealer or the ultimate user. Information on the sale price need be noted only on the report of sale filed with the Office of Price Administration.

(d) *Reports of leases.* Any person who leases or rents out a second-hand machine tool, or disposes of it otherwise than by sale, shall file a separate report on Form 100:1, Revised.

(e) *Records.* (1) Records of each transaction involving the purchase, sale, lease, rental, or other disposition of a second-hand machine tool or extra shall be preserved by all persons subject to this regulation. One copy of each report required to be made by this regulation shall be preserved by the person making the report. Separate records of inventories of attachments and extras not listed in said reports shall be preserved.

(2) Invoices and sales slips. Any person subject to this regulation shall furnish to the person to whom he sells, leases, or rents a machine tool or extra such invoices, sales slips, or receipts as he has regularly furnished and as required by this regulation, and shall, in any event, upon request of the person to whom he sells, leases, or rents made at the time of delivery, give a signed invoice or slip showing the date of the transaction, the date of delivery, identification of the machine sold, leased, or rented, and the price charged therefor. Machine tools and extras sold, and all other allowable charges made, shall be itemized, and separately priced on invoices or sales slips.

(3) Requests may be made at any time by any Office of the Office of Price Administration for copies of invoices, of reports, or of other records, and for any other information relating to transactions involving second-hand machine tools or extras. Such copies and information must be furnished or made available for inspection as requested.

SEC. 10. *Definitions.* When used in this regulation, the term:

"Dealer" means any person engaged in the business of buying and selling second-hand machine tools as a principal or in the business of buying or selling such tools as agent, auctioneer, or broker.

A "geared head" machine means a machine in which the variations of the spindle speeds are selectively obtained through a series of gears operated by levers integral with the machine. The term "other than geared head" machine includes all machines in which variations of spindle speeds are obtained by the shifting of a belt running between stepped cone pulleys or with a belt running between single pulleys or equipped with any motor drive that is not integral with the machine.

"Government agency" includes the War Department, the Department of the Navy, the United States Maritime Commission, the Lend-Lease Section of the Department of the Treasury Department, and the following subsidiaries of the Reconstruction Finance Corporation: Rubber Reserve Corporation, Metals Reserve Corporation, Defense Plant Corporation, and Defense Supplies Corporation.

"Person" includes an individual, corporation, partnership, association, or any other organized group of persons, or legal successor or representative of any of the foregoing, and includes the United States or any agency thereof, or any other government, or any of its political subdivisions, or any agency of any of the foregoing.

"Portable machine tool" means a machine tool designed to be taken to the material on which it is to be used and to be moved and applied to such material as the work requires, as distinguished from a stationed tool to which the material is brought for processing.

"Stock" referring to second-hand machine tools, includes tools which are owned by the person in question, or on which he has obtained an option, or for which he has secured a selling agency.

"User" means any purchaser of a second-hand machine tool or extra, other than a dealer, broker, agent, or auctioneer in or for new machine tools.

"Worn part" means a part in such a condition that unless it is replaced or reworked the machine tool will not have a substantially equivalent performance to that of the machine when new.

SEC. 11. *Petitions for amendment.* Any person seeking modification of this regulation may file a petition for amendment in accordance with the provisions of Revised Procedural Regulation No. 1.

SEC. 12. *Licensing provisions.* (a) The provisions of Supplementary Order No. 20,[1] licensing, among others, dealers selling second-hand machine tools or extras, are applicable to every dealer selling second-hand machine tools or extras, for which maximum prices are established by this regulation. When used in this paragraph, the term "dealer" has the definition given to it by Supplementary Order No. 20.

SEC. 13. *Enforcement.* Persons violating any provisions of this regulation are subject to the criminal penalties, civil enforcement actions, license suspension proceedings, and suits for treble damages provided for by the Emergency Price Control Act of 1942, as amended.

GISHOLT LATHES

(Classification by types and dates of manufacture. Additional information of interest)

1. *Classification.*—Classification by date of manufacture wherein:
   "1" indicates lathes of 1936 and after.
   "2" indicates lathes of 1930–35, inclusive.
   "3" indicates lathes of 1920–29, inclusive.
   "4" indicates lathes of 1919 and before.
2. *Type.*—Symbol or number indicating specific type of lathe.
3. *Lot numbers.*—Lot numbers under which lathes were manufactured. (The serial number of any one machine is comprised of the lot from which the machine came and a number indicating the sequence of that machine in its lot.)
4. *Year.*—Years in which the various lots were authorized. In several cases manufacture of a lot was not completed until the following year, but such exceptions are not important enough to be noted.
5. *Size.*—Figures indicating capacity of machine in round bar stock, and in earlier machines, the spindle bore size.
6. *Current model of comparable size.*—Current model of comparable size gives reference to machines listed on the sheet entitled "Current Gisholt Prices." Particular attention should be called to the fact that manufacture of the earlier styles of lathes (Type "0," "1," "1," "J," and "K" especially) have long ago been discontinued, and modern lathes are of too advanced a nature to be considered at all comparable except in size.
7. *Weight.*—Approximate weight of machine. For earlier machines, these weights are only approximate.

Standard machine has flanges and bores 1¼ inches, so deduct price of 12-inch flanges ($27); then 10-inch flanges are not listed so take price of 8-inch ($120) and add to price of machine, making $1,068. Then add the price of 1 pair 12-inch adapters ($30) making the total price $1,113 without starter.

INSTRUCTIONS FOR PREPARING SECOND-HAND MACHINE TOOL REPORT

Note: A report is required on each floor type second-hand machine tool and on each other type of second-hand machine tool which has an offering or sale price of $100 or more.

PART I. REPORT OF OFFERING PRICE OR ADDITION TO STOCK

Note: Part I of this report is to be prepared by dealers, auctioneers and brokers when a machine tool is added to stock, and is to be sent in accordance with the "Important Instructions" on the front of this sheet. Use the check boxes to identify each copy. Other persons subject to this regulation, and dealers, auctioneers and brokers that have sold a machine tool within one week after it was acquired and before the report of addition to stock is sent, shall prepare Part I, "Report of Offering Price", and include it with Part II, "Report of Sale, Lease or Rental", in accordance with the "Important Instructions" to persons other than dealers, auctioneers and brokers on the front of this sheet.

Item 1. Inventory number of machine tool. In reporting this item, assign a separate number to each machine tool. The number which is carried on your books will serve this purpose. Use the number in referring to the machine tool in all correspondence with the Office of Price Administration or the War Production Board.

Item 2. Date inventory number assigned. Use the date March 15, 1941, for all machine tools in dealer's auctioneer's or broker's stock, or owned by other persons subject to this regulation on or before that date. Give the date of purchase for all machine tools added to stock or installed for use after that date.

Item 3. Description of machine tool. Care should be taken to give full details in part (d) as well as to (a) make (b) type, and (c) size, of the machine tool so that the report can be adequately compared with the description of an equivalent new machine tool as listed in Item 9 below. If machine is not currently built or is of special design, furnish complete details including illustrations or photographs to assist in determining proper equivalent machine or base price.

APPENDIX B—FORM FOR SECOND-HAND MACHINE TOOL REPORT—Continued

Item 4. Manufacturer's serial number. The serial number of the machine tool shall be reported for all machine tools reported in age Classes 1, 2, and 3. (See Instructions, Item 6, below.) The reporting of this item is not required for machine tools placed in Class 4, except where the insertion of the number will help to identify the machine.

Item 5. Drive. Check the original drive of the machine tool. Machine tools which were originally manufactured as pulley driven or stepped cone driven are not equivalent to geared head machines even though subsequently motorized, therefore, they *must* be reported as "other than geared head" machines.

Item 6. Age classification. Class 1, machine tools manufactured on January 1, 1936 and after; Class 2, machine tools manufactured from January 1, 1930 to December 31, 1935; Class 3, machine tools manufactured from January 1, 1920 to December 31, 1929; and Class 4, machine tools manufactured before January 1, 1920. Where the manufacturer's serial number and year of manufacture are not known, the machine must be placed in Class 4.

Item 7. Present condition of the machine tool. Check the present condition of the machine tool. A "rebuilt and guaranteed" machine tool is one in which worn or missing parts have been replaced or reworked, and which has been tested under power so as to prove that it has a substantially equivalent performance to that of the machine when new.

(a) *The term "rebuilt and guaranteed"* applies only to a machine tool which (1) has been rebuilt or is in equivalent condition to a rebuilt machine tool; (2) has been tested under power so as to prove that it has a substantially equivalent performance to that of the machine when new; (3) carries a binding written guaranty of satisfactory performance for a period of not less than 30 days from date of shipment; and (4) is expressly invoiced as a rebuilt machine tool or its equivalent and as guaranteed for satisfactory operation for 30 days.

(b) *The term "other condition"* applies to all machine tools other than those which meet the conditions in part (a) above. A machine reported in any other manner or form than rebuilt and guaranteed will be considered as in "other condition"

Item 8. Joint owners. If the machine tool is jointly owned, indicate by checking opposite "Yes", otherwise check opposite "No".

Item 9. Description of equivalent new machine tool. Enter the manufacturer's March 1, 1941 list price of an equivalent new machine tool which is substantially similar in design and construction to the second-hand machine tool reported in Item 9 above. In cases where a machine tool is "other than a geared head machine" and the equivalent new machine tool is a geared head machine, determine the price of the second-hand machine tool by deducting twenty percent (20%) from the March 1, 1941, manufacturer's list price of the equivalent geared head machine tool. (See Instructions, Item 5, above.)

Item 11. Offering price of machine tool and attachments only. The maximum prices of machine tools (exclusive of all extras) shall be in terms of percentages of the March 1, 1941, manufacturer's list prices of determined equivalent new machine tools according to the following age classes:

Machine tool condition classification	Machine tool age classification			
	Class 1 (Jan. 1, 1936, and after)	Class 2 (Jan. 1, 1930, to Dec. 31, 1935)	Class 3 (Jan. 1, 1920, to Dec. 31, 1929)	Class 4 (before Jan. 1, 1920)
(a) Rebuilt and guaranteed	*Percent* 95	*Percent* 90	*Percent* 80	*Percent* 70
(b) Other condition	70	65	55	45

Item 12. Offering price of extras only.

(a) Total. Show the total offering price of machine tool extras. Second-hand machine tool extras are subject to the same maximum price percentage that is applicable to the basic second-hand machine tool with which the extras are sold (See Instructions, Item 11, above.)

(b) Itemization and Prices. All extras must be separately itemized, and each offering price must be included. The total of the prices should equal the amount inserted in part (a) above.

APPENDIX B—FORM FOR SECOND-HAND MACHINE TOOL REPORT—Continued

PART II. REPORT OF SALE, LEASE OR RENTAL

Note: Part II of this report is to be prepared by all persons subject to this regulation and is to be sent in accordance with the "Important Instructions" on the front of this sheet, except under the following condition. When a machine tool user sells to a dealer, auctioneer, or broker for resale, this report is not required Dealers, auctioneers and brokers are to use copies three and four of the report, "Part I, Report of Addition to Stock," that was previously sent in accordance with the "Important Instructions" on the front of this sheet, using the check boxes to identify each copy. Part II of this report is to be prepared when a machine tool is ordered. If the order is later cancelled, please advise your Regional Office, Office of Price Administration, and the War Production Board, Tools Division, Washington, D. C.

Item 15. Nature of the disposition of the machine tool. Check the nature of the disposition of the machine tool as to sale, lease or rental.

Item 16. Sale, lease or rental price of machine tool and attachments only. Show the invoice price of the machine tool exclusive of all extras.

Annual rental basis for any lease or rental. The maximum annual rental for any lease or rental entered into subsequent to July 26, 1943, for a second-hand machine tool or extra, shall be computed by using the applicable rental percentage set forth in the following table as applied to the maximum sale price computed in accordance with Item 11, above.

Machine tool use classification	Hours of operation		
	8-hour operation	16-hour operation	24-hour operation
General use of machine tool	25%	30%	35%
Outdoor use of machine tool designed for indoor use	35%	45%	55%

Less than annual rental basis for any lease or rental. The maximum daily rental shall be 1/200 of the annual rental, the maximum monthly rental shall be 1/10 of the annual rental. See section 6 (c) of Maximum Price Regulation No. 1, for restrictions on use of daily or monthly rental rates.

Item 17. Hours of operation. Check the hours of operation of the machine tool if lease or rental.

Item 19. Price of extras when sold, leased or rented.

(a) *Total.* Show the total sale, lease or rental price of the extras. This amount must be shown on the invoice.

(b) *Itemization and prices.* All extras must be separately itemized and each price must be included. The total of the prices should equal the amount inserted in part (a) above. These items and prices must be shown on the invoice.

Item 20. To whom was machine tool sold, leased or rented. Show under parts (a), (b), and (c), the name and address of the purchaser, lessee or renter.

Item 21. Nature of purchaser's business. If the machine tool was purchased by a dealer for resale, indicate by checking opposite "Dealer", otherwise check opposite "Ultimate User".

Item 22. Has machine tool been previously reported as an addition to stock? Dealers, auctioneers and brokers are to check opposite "Yes" when a report "Part I, Report of Addition to Stock" has been filed at a previous date. Other persons subject to this regulation check opposite "No."

[MPR 440]

GEORGIA AND FLORIDA SHADE GROWN TOBACCO OF THE 1943 CROP

In the judgment of the Price Administrator, it is necessary and proper to establish maximum prices for Georgia and Florida shade grown tobacco of the 1943 crop by a specific maximum price regulation.

A statement of the considerations involved in the issuance of this regulation has been issued and filed with the Division of the Federal Register.*

In the judgment of the Price Administrator, the maximum prices established by this regulation are and will be generally fair and equitable and will effectuate the purposes of the Emergency Price Control Act of 1942, as amended, and Executive Orders 9250 and 9328. So far as practical the Price Administrator has advised and consulted with the members of the industry which will be affected by this regulation.

10. Petitions for amendment.
11. Adjustable pricing.

13. Definitions.

SECTION 1. *Explanation of regulation.* The purpose of this regulation is to establish maximum prices for purchases and sales of Georgia and Florida shade grown tobacco of the 1943 crop.

Any purchaser's weighted average purchase price for unsized and unsorted tobacco during each six weeks' period may not exceed $1.23 per pound green weight. Such purchases are usually made from growers, but may also be made from other sellers.

At the packer level, specific dollar-and-cents maximum prices are established for sale of listed grades of sized and sorted leaves fourteen inches or more in length, for listed grades of sorted and unsized tobacco, and for string grades. For sized and sorted leaves less than fourteen inches in length, the packer's weighted average selling price, computed from all sales made by him between the effective date of this regulation and any particular subsequent date, may not exceed $1.25 per pound selling weight. For unlisted grades of sized and sorted leaves fourteen inches or more in length, and for unlisted grades of sorted and unsized tobacco, the packer's maximum selling prices are established at the highest prices charged by the packer for the same tobacco of the 1942 crop, or, if no such prices are available, further pricing methods are provided.

At the jobber level, maximum prices are to be determined by adding to the jobber's net delivered cost for tobacco of the 1943 crop, the same dollar-and-cents

*Copies may be obtained from the Office of Price Administration.

margins that were added during the year 1942 to net delivered cost of corresponding tobacco of the 1942 crop.

These maximum prices are not applicable to any purchases of sales of Georgia and Florida shade grown tobacco of the 1942 crop.

SEC. 2 *Maximum prices for purchases of unsized and unsorted Georgia and Florida shade grown tobacco of the 1943 crop.* (a) During the period from July 20, 1943 to August 31, 1943, inclusive, and during each six weeks' period subsequent to August 31, 1943, the weighted average purchase price paid by any person for unsized and unsorted Georgia and Florida shade grown tobacco of the 1943 crop shall not exceed $1.23 per pound green weight. Any person may make a particular purchase of such tobacco at a price in excess of $1.23 per pound green weight: *Provided*, That the weighted average purchase price for all of such tobacco bought by any purchaser during each of these periods does not exceed $1.23 per pound green weight.

(b) As used in this section the term "weighted average purchase price" means the total purchase price paid by any person for all unsized and unsorted Georgia and Florida shade grown tobacco of the 1943 crop purchased by him in any particular period, divided by the number of pounds green weight of unsized and unsorted tobacco of that crop purchased by him during that period.

"Total purchase price": (1) Includes all commissions, fees or other compensation paid by the purchaser to another person at the seller's instance or request, and all profit or gain realized by a grower from a resale made by a purchaser.

(2) Excludes all prices or charges paid or computed by the purchaser for Georgia and Florida shade grown tobacco of the 1943 crop grown on a farm or plantation owned or operated by him.

(c) Within ten days after the expiration of each of the periods for which provision is made in (a), each person who purchases any unsized and unsorted Georgia and Florida shade grown tobacco of the 1943 crop shall file with the Office of Price Administration, in Washington, D. C., a statement setting forth the total number of pounds of such tobacco purchased by him during such period and the total purchase price paid therefor. This statement shall exclude both the tobacco for which prices or charges are excluded from total purchase price by (b) (2) and such prices or charges.

NOTE: Inability to make under-ceiling purchases will not be accepted as an excuse for exceeding the weighted average purchase price provided by this section. Each purchaser is warned not to exceed $1.23 per pound for any purchase without assurance of ability to make subsequent purchases during the applicable period at prices permitting him to maintain the prescribed weighted average purchase price during that period.

SEC. 3. *Maximum prices for sales of Georgia and Florida shade grown tobacco of the 1943 crop by packers*—(a) *Maximum prices for sales of sized and sorted leaves fourteen inches or more in length*—(1) *Listed grades.* The packer's maximum price per pound selling weight for sized and sorted leaves fourteen inches or more in length of Georgia and Florida shade grown tobacco of the 1943 crop, of a particular grade listed in Table I, shall be as follows:

TABLE I

Grade:	*Maximum price per pound selling weight*
Prime lights	$3.50
Light wrappers	2.75
L. L	2.25
No. 2 Lights (slightly torn)	2.00
L. C	1.75
K-2	.90
Bright and fleshy lights	2.25
"B" lights or medium lights	1.25

(2) *Grades not listed.* The packer's maximum price per pound selling weight for sized and sorted leaves fourteen inches or more in length of Georgia and Florida shade grown tobacco of the 1943 crop, of a particular grade not listed in Table I, shall be as follows:

(i) The highest price charged by such packer to a purchaser of the same class for the same size and grade of tobacco of the 1942 crop; or

(ii) If a packer's maximum price for any particular size and grade cannot be determined under (i), his maximum price therefor shall be the highest price charged by a seller of the same class to a purchaser of the same class for the same size and grade of tobacco of the 1942 crop; or

(iii) If a packer's maximum price for any particular size and grade cannot be determined under (i) or (ii), his maximum price therefor shall be the highest price charged by such packer to a purchaser of the same class for the most closely comparable size and grade of tobacco of the 1942 crop; or

(iv) If a packer's maximum price for any particular size and grade cannot be determined under (i), (ii) or (iii), his maximum price therefor shall be the highest price charged by a seller of the same class to a purchaser of the same class for the most closely comparable size and grade of tobacco of the 1942 crop.

(b) *Maximum prices for sales of sized and sorted leaves less than fourteen inches in length.* The weighted average selling price which a packer may charge for leaves less than fourteen inches in length of sized and sorted Georgia and Florida shade grown tobacco of the 1943 crop shall not exceed $1.25 per pound selling weight. Any packer may make a particular sale of such tobacco at a price in excess of $1.25 per pound selling weight: *Provided*, That on any particular date the weighted average selling price charged by any packer for all of such tobacco sold by him between July 20, 1943, and that date, both inclusive, shall not exceed $1.25 per pound selling weight.

As used in this section the term "weighted average selling price" means the gross dollar and cent amount charged by any packer for leaves less than fourteen inches in length of sized and sorted Georgia and Florida shade grown tobacco of the 1943 crop sold by him between July 20, 1943, and the particular date of calculation, both inclusive, divided by the total number of pounds of leaves less than fourteen inches in length of sized and sorted tobacco of the 1943 crop sold by him between July 20, 1943, and the particular date of calculation, both inclusive. In determining the gross dollar and cent amount charged, the packer shall include all commissions, fees or other compensation paid by or for the purchaser to another person at the packer's instance or request.

NOTE: Each packer is warned not to charge more than $1.25 per pound for any sale at any time if his weighted average selling price for all of this tobacco sold by him since July 20, 1943 equals $1.25 per pound. In other words, he must not exceed the ceiling unless he has previously sold enough of this tobacco at prices under the ceiling to maintain his weighted average selling price at the prescribed maximum.

Maximum prices for sales of sorted and unsized tobacco—(1) *Listed grades.* The packer's maximum price per pound selling weight for sorted and unsized Georgia and Florida shade grown tobacco of the 1943 crop, of a particular grade listed in Table II, shall be as follows:

TABLE II

Grade:	*Maximum price per pound*
XL	$0.75
Broken backs	1.35
Green lights	1.50
XL[2]	.25

(2) *Grades not listed.* The packer's maximum price per pound selling weight for sorted and unsized Georgia and Florida shade grown tobacco of the 1943 crop, of a particular grade not listed in Table II, shall be:

(i) The highest price charged by such packer to a purchaser of the same class for the same grade of unsized tobacco of the 1942 crop; or

(ii) If a packer's maximum price for a particular grade cannot be determined under (i), his maximum price therefor shall be the highest price charged by a seller of the same class to a purchaser of the same class for the same grade of unsized tobacco of the 1942 crop; or

(iii) If a packer's maximum price for any particular grade cannot be determined under (i) or (ii), his maximum price therefor shall be the highest price charged by such packer to a purchaser of the same class for the most closely comparable grade of unsized tobacco of the 1942 crop; or

(iv) If a packer's maximum price for any particular grade cannot be determined under (i), (ii) or (iii), his maximum price therefor shall be the highest price charged by a seller of the same class to a purchaser of the same class for the most closely comparable grade of unsized tobacco of the 1942 crop.

(d) *Maximum prices for sales of string grades.* The packer's maximum price per pound selling weight for string grades of Georgia and Florida shade grown tobacco of the 1943 crop shall be the price listed therefor in Table III, as follows:

(a) He shall:

(1) Determine the highest price per pound or other unit of sale charged by him for tobacco of the 1942 crop of the same grade, or of the same priming and condition, sold or delivered by him during the period January 1, 1942 through December 31, 1942. If he did not sell or deliver tobacco of the 1942 crop of the same grade, or of the same priming and conditioning, during that period, he shall determine the highest price per pound or other unit of sale charged by him during that period for the most closely comparable tobacco of the 1942 crop;

"Net delivered cost" means the amount the jobber pays for the particular tobacco delivered at his customary receiving point, less all discounts allowed him except the discount for prompt payment. No charges for local hauling or trucking shall be included.

(b) If a jobber's maximum price for any particular tobacco of the 1943 crop cannot be determined under (a), his maximum price therefor shall be the maximum price of the most closely competitive jobber for the same unit of sale for tobacco of the 1943 crop of the same grade, or of the same priming and condition.

SEC. 5. *Customary discounts and allowances.* Every packer and every jobber shall allow from his maximum selling prices established by this regulation for Georgia and Florida shade grown tobacco of the 1943 crop his customary discounts and allowances with respect to sales of the 1942 crop to the particular purchaser in question. However, lower prices than those established by this regulation may be charged, demanded, paid or offered.

(2) Specifically, but not exclusively, the following practices in the marketing of any of the 1943 crop of Georgia and Florida shade grown tobacco are prohibited:

(iv) In the case of a seller, in a sale made through a broker or agent, the elimination or reduction of commissions, fees, or other compensation customarily paid by the seller to a broker or agent with respect to similar sales of prior crops.

(c) *Enforcement.* Persons violating any of the provisions of this regulation are subject to the criminal penalties, civil enforcement actions and suits for treble damages provided for by the Emergency Price Control Act of 1942, as amended.

SEC. 10. *Petitions for amendment.* Any person seeking a general modification of this regulation may file a petition for amendment in accordance with the provisions of Revised Procedural Regulation No. 1,[2] issued by the Office of Price Administration.

SEC. 11. *Adjustable pricing.* Any person may agree to sell at a price which can be increased up to the maximum price in effect at the time of delivery; but no person may, unless authorized by the Office of Price Administration, deliver or agree to deliver at prices to be adjusted upward in accordance with action taken by the Office of Price Administration after delivery. Such authorization may be given when a request for a change in the applicable maximum price is pending, but only if the authorization is necessary to promote distribution or production and if it would not interfere with the purposes of the Emergency Price Control Act of 1942, as amended. The authorization may be given by the Administrator or by any official of the Office of Price Administration to whom the authority to grant such authorization has been delegated. The authorization will be given by order.

SEC. 12. *Applications for exemption of purchases from subsidiaries.* (a) A corporation engaged in the business of manufacturing tobacco products (hereinafter called "parent company") which purchases Georgia and Florida shade grown tobacco of the 1943 crop for its own use from one or more of its subsidiaries, and the subsidiary selling such tobacco to the parent company, may apply jointly to the Office of Price Administration, Washington, D. C., for permission to make such purchases and sales without regard to the maximum prices established by this regulation if:

(1) Purchases and sales for which such permission is sought will be made in accordance with their business practices established during and prior to March 1942, including, but not limited to, purchase by the parent company of all the Georgia and Florida shade grown tobacco of the 1943 crop sold by the subsidiary (with the exception of insignificant portions or byproducts thereof); and

(2) Compliance with the price limitations of this regulation for Georgia and Florida shade grown tobacco of the 1943 crop requires or threatens to require substantial change in their standard accounting practices in use during and since March 1942, as applied to their records of inter-company transactions; and

(3) The Georgia and Florida shade grown tobacco of the 1943 crop to be so purchased and sold (with the exception of insignificant by-products) is to be used by the parent company solely in the manufacture of tobacco products for which maximum prices are established by the General Maximum Price Regulation [3] or other regulations issued by the Office of Price Administration.

(b) The application shall be in writing, subscribed by both the parent company and the subsidiary, and shall set forth all information necessary to substantiate the existence of the conditions required by paragraph (a). After receipt of such application, the Office of Price Administration, or any of its duly authorized officers, may by letter grant the requested permission if in its judgment such action will not interfere with the purposes of the Emergency Price Control Act of 1942, as amended. Such permission, if granted, may be revoked in the same manner at any time.

(c) Permission granted pursuant to this section to make particular purchases and sales of Georgia and Florida shade grown tobacco of the 1943 crop without regard to the maximum prices established by this regulation shall not constitute justification for any increase in maximum prices established for tobacco products manufactured therefrom.

(d) "Subsidiary" means a corporation whose business operations during and since March 1942 were controlled through ownership of voting stock by a parent company engaged in the manufacture of tobacco products, and whose business activities are confined to producing, buying, curing or handling tobacco for its parent company.

PART 1364—FRESH, CURED, AND CANNED MEAT AND FISH PRODUCTS

[MPR 439]

FRESH FISH AND SEAFOOD AT RETAIL

In the judgment of the Price Administrator, it is necessary in order to effectuate the purposes of the Emergency Price Control Act of 1942, as amended, and Executive Orders Nos. 9250 and 9328, that maximum prices be established for the sale by retailers of fresh fish and seafood.

So far as practicable, the Price Administrator has consulted and advised with representative members of the industry which will be affected by the regulation. In the judgment of the Price Administrator, prices established are generally fair and equitable and will effectuate the purposes of the Act. The prices established are not below the average retail prices of fresh fish and seafood in the year 1941.

A statement of the considerations involved in the issuance of the regulation has been issued herewith and filed with the Division of the Federal Register.*

SEC. 3. *How retailers determine their maximum prices for fresh fish and seafood.* (a) Every retailer, in order to determine his maximum selling price for any style or form of each species of fresh fish or seafood set forth in section 2 shall take the same cents per pound mark-up over net delivered cost, which he took on the most sales during the period July 5 to July 10, 1943, inclusive, for the same style and form of the species being priced: *Provided,* That if during that period the retailer fixed his selling price by applying a percentage mark-up over cost, he shall determine his maximum selling price under this regulation by applying the percentage mark-up which he used on most sales during that period.

(b) For any species of fish or seafood listed in section 2 or any style or form of those species, which was not offered for sale during the period July 5 to July 10, 1943, inclusive, the retailer's maximum selling price will be determined by taking the most similar commodity of fresh fish or seafood that he did offer for sale during the period July 5 to July 10, 1943, inclusive, and applying the cents per pound mark-up or the percentage mark-up as set forth in section 3 (a).

(c) Any retailer who did not offer for sale any species of fish or seafood listed in section 2 during the period July 5 to July 10, 1943, inclusive, or any form or style of any species and who cannot price his fresh fish and seafood commodities under section (3) (a) or (3) (b) hereof shall file a written application to the nearest district office of the Office of Price Administration for approval of a permitted retail mark-up on each of said species in the style or form to be sold. The application shall include a statement setting forth the reason why pricing cannot be based on section 3 (a) or (b) and a proposed schedule of mark-ups by species and forms and styles to be sold. Any district office of the Office of Price Administration may establish maximum mark-ups of such an applicant in line with the mark-ups of similar stores.

SEC. 4. *Directions for applying the mark-up rule.* To compute the maximum selling price take the net delivered cost on a per pound basis for each species and apply the permitted mark-up under section 3. Net delivered cost is the amount paid to the supplier less all discounts, except the discount for prompt payment, plus all transportation charges. If more than one purchase is represented in the species to be priced, the retailer, to determine the net delivered cost, may take (a) the average weighted cost of such purchases (total net delivered cost of the purchases divided by the number of pounds bought) or (b) the net delivered cost of the largest purchase involved. No retailer may compute his maximum selling price on a purchase where the net delivered cost is higher than the supplier's ceiling price. Fractions of one-half cent or over shall be considered a cent and fractions of a cent under one-half cent are to be dropped in computing the retailer's maximum selling price per pound. When retailers service and distribute fresh fish and seafood from one or more central warehouses, they shall be permitted to include in their net cost the actual service and warehousing cost. A retailer must calculate maximum prices for the fresh fish and seafood commodities covered by this regulation once every week. This calculation shall be made on Thursday of each week and before any sales of such commodity are made on that day. All maximum prices shall be calculated and stated in cents per pound. In the calculation, costs of fresh fish and seafood, both on hand and in transit, shall be included.

SEC. 5. *Price posting requirement.* The retailer must post a list of his ceiling prices at a place in his store where it can be easily read by customers or prospective customers. Such list must contain a complete list of all species covered in this regulation which are being offered for sale and the form or style in which sold.

SEC. 6. *Additions allowed for deliveries made by the store to its consumers.* (a) If deliveries are made by the retailer to the homes or places of business of his customers of any of the items covered by this regulation, the retailer may add to the total value of the delivery, as a separate charge, the same amount which he charged for such delivery during the period July 5 to July 10, 1943, inclusive.

SEC. 7. *Precedence of community prices over retailers ceilings established by the mark-up method.* (a) The Office of Price Administration may, by order issued pursuant to General Order Number 51, fix in any community dollars-and-cents ceiling prices for some or all of the fishery commodities in this regulation. When such dollars-and-cents prices are fixed, the retailer may not thereafter sell at higher prices than ceiling prices set for the group in which he is classified, if group classifications are set up, and these new ceiling prices shall take the place of the ceiling prices arrived at under this regulation.

SEC. 8. *Where this regulation applies.* The provisions of this regulation shall apply to the forty-eight states of the United States and the District of Columbia.

SEC. 9. *Sales to which this regulation applies.* This regulation applies to all sales of fresh fish or seafood by a retailer, which includes any store, wagon route, establishment, or department which sells for the most part to ultimate consumers who are not commercial, industrial, or institutional users.

SEC. 10. *Relation to other regulations.* The maximum price at which a person may export fresh fish and seafood at retail shall be determined in accordance with the provisions of the Second Revised Maximum Export Price Regulation [1] issued by the Office of Price Administration.

Article II—Record Keeping and Enforcement

SEC. 11. *Records and reports.* (a) Every seller subject to this regulation shall keep in his possession for inspection by the Office of Price Administration, for so long as the Emergency Price Control Act of 1942, as amended, remains in effect, all available sales slips, books of account, invoices and other purchase and sales records of the period July 5th and 10th, 1943, inclusive. He shall also prepare, for all fresh fish and seafood handled by him during this period, whether or not covered specifically by this regulation, a written statement, for inspection by the Office of Price Administration showing (1) the net delivered cost of each species in each form or style bought, which net delivered cost is (i) computed by dividing the total net delivered cost of each species, bought in the same form, by the total number of pounds bought or (ii) taking the net delivered cost of the largest single purchase; (2) the price at which he made most sales of each of the above-mentioned species in the styles or forms in which he made the sales, and (3) the mark-up in each case. The cents-per-pound mark-up shall be the difference between the net delivered cost per pound and the selling price per pound as computed in (1) and (2), but any retailer who employs a percentage mark-up method may state such a mark-up in percentage terms. A suggested form for this statement, with sample entries based on assumed prices using the cents-per-pound mark-up method is provided in Appendix A.

(b) Every seller shall, subject to approval of the Bureau of the Budget in accordance with the Federal Reports Act of 1942, submit such reports to the Office of Price Administration and keep such records in addition to or in place of the records required in paragraph (a) of this section as the Office of Price Administration may from time to time require.

SEC. 12. *Indirect price increases.* No person shall evade any of the provisions of this regulation by any scheme or device, and no person shall indirectly charge or receive for fresh fish or seafood a price higher than the maximum price permitted by this regulation. No person shall, as a condition of selling fresh fish or seafood, require a purchaser to buy any other fish or seafood or any other product.

SEC. 13. *Enforcement.* On and after July 22, 1943, any person violating any provision of this regulation shall be subject to the criminal penalties, civil enforcement actions, suits for treble damages and proceedings for revocation of licenses provided by the Emergency Price Control Act of 1942, as amended.

SEC. 14. *Licensing and registration.* The licensing and registration provisions of sections 15 and 16 of the General Maximum Price Regulation [2] shall apply to every person subject to this regulation. Sections 15 and 16 provide, in brief, that a license is required of all persons selling at retail commodities for which ceiling prices are established. A license to all retailers engaged in resale of fishery commodities during the period July 5 to July 10, 1943, inclusive, is automatically granted so it is not necessary for any such retailer to apply for it. Other retailers will be automatically licensed upon approval of a mark-up method as outlined in section 3 (c). All sellers may later be required to register. The license may be suspended for violation in connection with the sale of any commodity for which ceiling prices are established. No person whose license is suspended may sell any such commodity during the period of suspension.

Article III—Miscellaneous Provisions

SEC. 15. *Petitions for amendment.* Any person seeking an amendment of any provision of this regulation may file a petition for amendment in accordance with the provisions of Revised Procedural Regulation No. 1 [3] issued by the Office of Price Administration.

SEC. 16. *Definitions.* "Style or form" in this regulation means the various stages at which fresh fish or seafood may be processed by producers and wholesalers and by the retailer for the consumer such as scaled, headed, gutted, steaks, slices, fillets, etc., and includes fish sold in the round or drawn on a gross weight basis and processed at the order of the customer without added compensation.

3. Section 19 Table VI (j) is amended to read as follows:

(j) *Sales at retail of mainland and Island meats, poultry and certain dairy products*—(1) *Prices to be marked and posted.* Notwithstanding the provisions of this Maximum Price Regulation 373, on and after the date any commodity becomes subject to this paragraph (j) every person offering to sell any such commodity shall mark the selling price of such commodity on the commodity itself in a manner plainly visible to and understandable by the purchasing public. In addition to this requirement, every retailer shall also place on his meat counter, or other location equally accessible to the public, one or more copies of the maximum prices established herein. Retailers located in Zones 2 and 3 of Hawaii and Zone 2 of Maui may not include in the posted prices the allowed additions specified in subparagraph (3).

(2) *Definitions.* When used in this paragraph (j) the term:

(i) "Sale at retail" means a sale or a selling to ultimate consumers, restaurants, hospitals, and institutions where the sale of commodities covered herein aggregates $100.00 or less to the same person in a period of twenty-four hours. Sales over this amount shall not exceed the maximum prices for sales at wholesale established by this Maximum Price Regulation 373.

(ii) "Zone 2 on the Island of Maui" shall comprise the district of Hana and that portion of the district of Makawao lying south of the south boundary of Ahupuha Kamaole.

(iii) "Zone 2 on the Island of Hawaii" shall comprise the district of North Hilo, Hamakua, and Kau, as defined by Hawaiian Statute.

(iv) "Zone 3 on the Island of Hawaii" shall comprise the districts of North Kohala, South Kohala, North Kona, and South Kona, as defined by Hawaiian Statute.

(3) The maximum prices of items of different grades from those specified shall be the most nearly comparable grade of that item for which a maximum price is established by this paragraph (j).

(4) Unless otherwise provided, the maximum prices of mainland meats or cheese items not listed in the following tables shall be 24 per cent on selling price over the wholesaler's invoice selling price. This maximum price may be arrived at by dividing the invoice cost in cents per pound by 0.76. For instance, assume mainland item "x" costs the retailer 50 cents per pound. Dividing 50 cents by 0.76 equals 65.7 cents. Adjusting this figure to the nearest cent yields a maximum price at retail of 66 cents per pound.

(5) (i) Retailers whose stores are located in Zone 2 on the Island of Hawaii, or in Zone 2 on the Island of Maui, may add 2 per cent to the maximum prices specified in tables A to J. Sales slips must be given to buyers, showing the prices of the commodities sold at or under the maximum prices specified in Tables A to J. The retailer may add to the sum total of the sale 2 per cent of it as a separate computation. This addition is permitted to cover extra transportation costs paid by the retailer in these zones.

(ii) Retailers whose stores are located in Zone 3 on the Island of Hawaii may add 3 per cent to the maximum prices specified in Tables A to J. Sales slips must be given to buyers, showing the prices of the commodities sold at or under the maximum prices specified in Tables A to J. The retailer may add to the sum total of the sale 3 per cent of it as a separate computation. This addition is permitted to cover extra transportation costs paid by the retailer in this zone.

(6) No retailer may store under refrigeration, for buyers' account, any of the commodities covered by this paragraph (j) for periods exceeding 24 hours.

(7) The maximum price for sales of retail cuts of meat, or other commodities specifically covered by this paragraph (j), aggregating between $50.00 and $100.00 shall be 10 per cent less than the maximum price specified in this paragraph (j).

13. Section 41 is amended to read as follows:

SEC. 41. *Table XXVIII: Maximum prices at retail for certain grocery items*—(a) *Records and reports.* Notwithstanding the provisions of section 11 of this Maximum Price Regulation 373, every person making sales of the commodities subject to this section 41 shall keep a "price book", and enter therein, in the case of commodities for which the maximum prices are calculated by a division or multiplication factor (not the commodities for which dollar and cent prices are specified), the net cost, the quantity purchased at such cost, the number of retail units in the customary wholesale unit (e. g. 48 cans to a case), every step in the calculation, including the division or multiplication factor used, and the resulting maximum price per retail unit. Such price book shall be available for inspection by the Office of Price Administration, or any consumer.

(b) *Prices to be marked and posted.* On and after the date any commodity becomes subject to this section 41 every person offering to sell any such commodity shall:

(1) Mark the maximum price of such commodity in a manner plainly visible to, and understandable by, the purchasing public. The maximum price may be marked on the commodity itself or on the shelf, bin, rack, or other holder or container upon or in which the commodity is kept or it may be posted at the place in the business establishment where the commodity is offered for sale: *Provided,* That the maximum price of each commodity offered for sale shall be plainly visible to the purchaser at the place in the business establishment where the commodity is offered for sale, and shall not be obscured by the posted

prices of other commodities, whether by use of price books or catalogs or layers of price lists or otherwise or in any other manner. The maximum price shall be stated as follows: "Ceiling Price $———"; or "Our Ceiling $———".

(2) Post in a place and manner easily accessible to and understandable by the purchasing public the price bulletins issued by this Office which will contain the maximum prices fixed by this regulation.

(c) The maximum prices for the grocery items covered by this section are set forth in the following tables.

These grocery items are divided into categories. In each category maximum dollar and cent prices are specified for certain named items. The maximum prices for all other items in each category shall be computed by dividing or multiplying net cost of the item by the division factor or the multiplication factor specified in the particular category. Where delivery of an item is received at a net cost different from that of an identical item already on hand, the retailer with multiple outlets may use as his net cost for the entire inventory a weighted average net cost of the inventory on hand. Stores which do not possess multiple outlets must price each delivery separately and market the various lots on a first-in first-out basis. Sellers in no event may resort to pricing by means of a multiplication or division factor where a dollar and cent price is specified.

(1) *Example of use of division factor.* Assume the net cost for a case of 24 cans of Brand X is $2.64 and the division factor is .78. Dividing this figure by 24 yields 14.1 cents per can. Adjusting this figure to the nearest cent, in accordance with paragraph (e), results in a maximum price of 14 cents per can.

(2) *Example of use of multiplication factor.* Assume the net cost for a case of 24 cans of Brand Y is $3.78 and the multiplication factor is 1.2. Multiplying $3.78 by 1.2 yields $4.536. Dividing this figure by 24 yields 18.9 cents per can. Adjusting this figure to the nearest cent, in accordance with paragraph (e) results in a maximum price of 19 cents per can.

(d) Net cost means the amount paid by the retailer as shown on the invoice of his supplier, less all discounts except the discount for prompt payment. In the event the item is imported by a retailer directly from the mainland, the net cost shall be the maximum wholesale price computed according to the provisions of section 41a. To this net cost the margins and markups specified in this section may be added. Importing retailers shall be subject to all of the provisions of section 41 (a) with respect to such purchases.

(e) Whenever provision is made in this section 41 for the calculation of a maximum price not otherwise specified in dollars and cents, and such calculation results in a fraction of a cent, then the amount so calculated shall be reduced to the nearest lower cent if the fraction is less than one-half cent, and shall be increased to the nearest higher cent, if the fraction is one-half cent or more.

H., on Form OPA–G–2, the maximum price for all sales made by him of any such commodity where the maximum price for such sale has been established by the provisions of Table B, hereof, and where such maximum price is higher or lower than the seller's previous maximum price for that commodity; *Provided*, That such report need be made only if the wholesaler has on hand one hundred cases or more of such commodity, except that reports as to spices and extracts shall be made regardless of the quantity on hand.

(c) For commodities imported directly from the mainland, not including commodities purchased from the Federal Surplus Commodities Corporation and commodities received from or via any other Island in the Territory, the wholesaler shall calculate his maximum price for each item (that is, for each kind, brand, grade, and container size) of such commodity covered by this regulation as follows:

(1) The wholesaler shall find his "landed cost" for the item he is pricing by adding the amounts permitted in subdivisions (i) through (vi) set forth below. If any of the amounts, or any part thereof, specified in any subdivision has already been included in another subdivision it may not again be added.

(i) An amount equal to the price which the wholesaler agreed to pay the mainland seller before deducting any cash discount, swell allowance or promotional allowance.

(ii) An amount equal to the transportation charges, if any, actually incurred by the wholesaler for transportation from the mainland point at which the wholesaler received delivery to the mainland port of shipment, including Federal transportation tax, terminal charges, and extra charges for shipment of less than carload lots.

(iii) An amount equal to mainland storage charges and insurance in connection therewith actually incurred by the wholesaler, but charges for storage and insurance in connection therewith in excess of six months shall not be included.

(iv) An amount equal to cartage charges actually incurred by the wholesaler for cartage from warehouse to dock in port of shipment.

(v) An amount equal to charges for ocean freight, war risk and marine insurance actually incurred by the wholesaler; and there may be included in this amount Territorial tolls and tonnage tax as shown on the bill of lading. However, the amount by which any cost of war risk insurance exceeds the rates charged by the War Shipping Administration shall not be included, but the type of coverage is at the discretion of the buyer or seller.

(vi) An amount equal to cartage charges in the port of entry in the Territory of Hawaii from dock to warehouse, computed at a rate not in excess of $1.20 per ton, weight or measurement, provided that the commodity is moved from the dock at the wholesaler's expense.

(2) The wholesaler will then divide this "landed cost" by the division factor specified in Table B, for the item he is pricing: *Provided*, That a wholesaler located in the Island of Oahu shall add to his "landed cost" an amount not more than the applicable markup set forth in Table A, for the item he is pricing, in lieu of using the division factor in Table B for such item, if such item is specifically listed in Table A.

(3) In appropriate cases where special service is rendered, the wholesaler may make application to the Office of Price Administration for an additional markup based upon the cost of the service, and the Territorial Director of the Office of Price Administration for the Territory of Hawaii may approve or disapprove an additional margin.

(4) In an identical item (that is, the same kind, brand, grade, and container size) in the wholesaler's inventory on hand has two or more different landed costs, then the "landed cost" for the item may be determined by calculating a weighted average "landed cost" for the entire inventory of that item on hand. Weighted average "landed cost" shall be calculated as follows: each different "landed cost" shall be multiplied by the number of units having such "landed cost." The products of such multiplication shall be added and the sum thereof divided by the total number of the units for which a weighted average "landed cost" is desired. The quotient or result of such division is the weighted average "landed cost." This provision is permis-

sive and not mandatory. The wholesaler need not average the different landed costs for the identical item, but may use each "landed cost" separately.

(5) These maximum prices contemplate distribution by only one wholesaler in the Territory of Hawaii. In the event that in the course of distribution of any commodity covered by this section after arrival, such commodity moves through the hands of more than one wholesaler, then the wholesaler shall distribute between them the margins set forth in tables annexed hereto. In such event the primary wholesaler making the importations shall furnish the wholesaler purchasing from him a statement of the maximum price determined in accordance with this section.

(6) No extra charge may be added for delivery, except as follows:

(i) *Island of Maui.* For delivery in the Hana section of salt and any item bearing a margin of 9 per cent or less as set forth in table B, a wholesaler may add a hauling charge in an amount not in excess of $5.00 per ton, weight or measurment. The Hana section shall comprise all of the district of Hana and that portion of the district of Makawao lying south of the south boundary of the Ahupuha of Kamaole, County of Maui.

(ii) *Island of Hawaii.* For delivery from the City of Hilo to a retail establishment, or the wholesaler's warehouse, located outside of Zone 1, a wholesaler may add an amount not in excess of the trucking charge actually incurred. Zone 1 shall comprise the area of Puna and South Hilo, as defined by the Survey Department of the Commissioner of Public Lands of the Territory of Hawaii.

(7) In the case of a sale to a buyer who does not have a gross income tax license, the seller may add to the maximum price one and one-quarter per cent (1¼%) of it.

(8) Any maximum prices calculated under this regulation shall be based on the wholesaler's customary unit of sale (that is, per case, per box, per bag, per dozen, or the like). All such calculations resulting in a fraction of a cent shall be reduced to the nearest lower cent if the fraction is less than one-half cent, and shall be increased to the nearest higher cent if the fraction is one-half cent or more.

(d) In the case of purchases from the Federal Surplus Commodities Corporation, or purchases from mainland sellers where the price to be paid to such seller includes delivery to the dock in the Territory of Hawaii, the wholesaler shall calculate his maximum price for each item (that is, for each kind, brand, grade, and container size) of a commodity covered by this regulation as follows:

(1) The wholesaler shall find his "landed cost" for the item he is pricing by adding to the net price paid to the mainland seller or the Federal Surplus Commodities Corporation an amount for cartage from the Federal Surplus Commodities Corporation's warehouse or the dock to the wholesaler's warehouse, computed at a rate not in excess of the amounts set forth in paragraph (c) (1) (vi) above.

(2) The wholesaler will then divide this "landed cost" by the division factor specified in Table B, for the item he is pricing: *Provided*, That a wholesaler located in the Island of Oahu shall add to his "landed cost" an amount not more than the applicable markup set forth in Table A, for the item he is pricing, in lieu of using the division factor in Table B for such item, if such item is specifically listed in Table A.

(3) Subparagraphs (3), (4), (5), (6), (7) and (8) of paragraph (c) above are incorporated in this paragraph (d) and shall have the same force and effect as if fully set forth herein.

(e) For commodities received from or via another Island in the Territory, the wholesaler shall calculate his maximum price for each item (that is, for each kind, brand, grade, and container size) of a commodity covered by this section by adding the amounts permitted in subparagraphs (1) through (4) set forth below. If any of the amounts, or any part thereof, specified in any subparagraph has already been included in another subparagraph, it may not again be added.

(1) An amount equal to the maximum price in the Island from which the item is transshipped, as calculated under paragraph (c) above.

(2) An amount equal to cartage charges for cartage from the warehouse to dock in the Island from which the item is transhipped, calculated at the rates set forth in paragraph (c) (1) (vi) above, whether or not such cartage charges are actually incurred.

(3) An amount equal to charges for ocean freight, war risk and marine insurance actually incurred by the wholesaler for transshipment between the Islands, and there may be included in this amount Territorial tolls and tonnage tax as shown on the bill of lading.

(4) An amount equal to cartage charges in the Island on which the wholesaler is located from dock to warehouse, computed at a rate not in excess of the amounts set forth in paragraph (c) (1) (vi) above, *Provided*, That the commodity is moved from the dock at the wholesaler's expense.

The foregoing provisions shall also apply where the owners, operators or those in charge of any ship or ships or objects other than, or in addition to, the colliding ships or objects are at fault in respect of a collision or contact.

In such adjustment, disbursements in foreign currencies shall be exchanged into United States money at the rate prevailing on the dates made and allowances for damage to cargo claimed in foreign currency shall be converted at the rate prevailing on the last day of discharge at the port or place of final discharge of such damaged cargo from the ship. Average agreement or bond and such additional security, as may be required by the carrier, must be furnished before delivery of the goods. Such cash deposit as the carrier or his agents may deem sufficient, as additional security for the contribution of the goods and for any salvage and special charges thereon shall, if required,

be made by the goods, shippers, consignees, or owners of the goods to the carrier before delivery. Such deposit shall, at the option of the carrier, be payable in United States money, and be remitted to the adjuster. When so remitted the deposit shall be held in a special account at the place of adjustment in the name of the adjuster pending settlement of the general average and refunds or credit balances, if any, shall be paid in United States money.

12. *Amended "Jason" clause:* "In the event of accident, danger, damage, or disaster before or after commencement of the voyage resulting from any cause whatsoever, whether due to negligence or not, for which or for the consequence of which the carrier is not responsible by statute, contract, or otherwise, the goods, shippers, consignees, or owners of the goods shall contribute with the carrier in general average to the payment of any sacrifices, losses or expenses of a general average nature that may be made or incurred, and shall pay salvage and special charges incurred in respect of the goods. If a salving ship is owned or operated by the carrier, salvage shall be paid for as fully as if the salving ship or ships belonged to strangers.

13. In any situation whatsoever and wheresoever occurring and whether existing or anticipated before commencement of or during the voyage, which in the judgment of the carrier or master is likely to give rise to risk of capture, seizure, detention, damage, delay or disadvantage to or loss of the ship or any part of her cargo, or to make it unsafe, imprudent, or unlawful for any reason to commence or proceed on or continue the voyage or to enter or discharge the goods at the port of discharge, or to give rise to delay or difficulty in arriving, discharging at or leaving the port of discharge or the usual place of discharge in such port, the carrier may before loading or before the commencement of the voyage, require the shipper or other person entitled thereto to take delivery of the goods at port of shipment and upon their failure to do so, may warehouse the goods at the risk and expense of the goods; or the carrier or master, whether or not proceeding toward or entering or attempting to enter the port of discharge or reaching or attempting to reach the usual place of discharge therein or attempting to discharge the goods there, may discharge the goods into depot, lazaretto, craft or other place; or the ship may proceed or return, directly or indirectly, to or stop at any such port or place whatsoever as the master of the carrier may consider safe or advisable under the circumstances, and discharge the goods, or any part thereof, at any such port or place; or the carrier or the master may retain the cargo on board until the return trip or until such time as the carrier or the master thinks advisable and discharge the goods at any place whatsoever as herein provided or the carrier or the master may discharge and forward the goods by any means at the risk and expense of the goods. The carrier or the master is not required to give notice of discharge of the goods, or the forwarding thereof as herein provided. When the goods are discharged from the ship, as herein provided, they shall be at their own risk and expense; such discharge shall constitute complete delivery and performance under this contract and the carrier shall be freed from any further responsibility. For any service rendered to the goods as herein provided the carrier shall be entitled to a reasonable extra compensation.

14. The carrier, master and ship shall have liberty to comply with any orders or directions as to loading, departure, arrival, routes, ports of call, stoppages, discharge, destination, delivery or otherwise howsoever given by the government of any nation or department thereof or any person acting or purporting to act with the authority of such government or of any department thereof, or by any committee or person having, under the terms of the war risk insurance on the ship, the right to give such orders or directions. Delivery or other disposition of the goods in accordance with such orders or directions shall be a fulfillment of the contract voyage. The ship may carry contraband, explosives, munitions, warlike stores, hazardous cargo, and may sail armed or unarmed and with or without convoy.

15. In addition to all other liberties herein the carrier shall have the right to withhold delivery of, reship to, deposit or discharge the goods at any place whatsoever, surrender or dispose of the goods in accordance with any direction, condition or agreement imposed upon or exacted from the carrier by any government or department thereof or any person purporting to act with the authority of either of them. In any of the above circumstances the goods shall be solely at their risk and expense and all expenses and charges so incurred shall be payable by the owner or consignee thereof and shall be a lien on the goods.

16. *Fire clause.* Neither the carrier nor any corporation owned or employed by, subsidiary to or associated or affiliated with or furnishing wharfage to the carrier shall be liable for any loss or damage to the goods occurring at any time, and even though before loading on or after discharge from the Vessel, by reason of any fire whatsoever, unless such fire shall be caused by its design or neglect.

17. The Vessel in all matters arising under this Charter Party or Bill of Lading issued hereunder shall also be entitled to the like privileges, and rights, and immunities as are contained in sections 3 (6), 4, 11 of the Carriage of Goods by Sea Act of the United States approved April 16, 1936, which, except as may be otherwise specifically provided herein, shall govern before the goods are loaded on and after they are discharged from the vessel and throughout the entire time the goods are in the custody of the vessel.

18. *Limitation of liability.* Any provision of this Charter to the contrary notwithstanding, the Owner shall have the benefit of all limitations of, and exemptions from, liability accorded to the Owner or Chartered Owner of vessels by any statute or rule of law for the time being in force.

19. *Weighing cargo.* Public Weighers' count shall be used in determining outturn of cargo, and if there be any dispute in reference to count, an adjustment of such dispute must be arrived at immediately as the truck passes over the Public Weighers' scale, which must be located near the Government scale, and this adjustment must be made by a representative each of the Shipper, the Vessel, and the Consignee, and the decision arrived at by a majority of these three parties is to be final and binding on all parties hereto. Vessel shall be furnished with as many copies of Public Weighers' certificate as may be required, free of charge.

The Vessel shall be free of all weighing expenses at port of discharge, notwithstanding any custom of the port to the contrary. All arrangements for weighers, samplers and other Customs formalities in connection with the cargo to be made by the Charterer and any delay to the vessel due to their failure to do so shall be at Charterer's expense.

20. *Agents.* Owner to appoint and pay agents at loading and discharging ports.

21. *Strikes.* In the event of a strike or strikes, riot or riots, or any other unavoidable hindrance which may prevent the delivery of cargo, Owner reserves the right to despatch the Vessel with such portion of cargo as may then be on board, or in ballast, if no cargo has been loaded. In either case Charterer not to be liable for dead freight or demurrage or both on cargo which is not loaded up to the time of commencement of such hindrance. Vessel Owner to notify Charterer prior to withdrawal of the Vessel.

22. *Liners.* On mail vessels and on vessels operating on customary scheduled sailings, no demurrage shall be charged at port of loading, but the Owner reserves the right to sail the Vessel without cargo, and the Charterer shall be liable for dead freight if cargo is not tendered in time to enable the Vessel to load and sail on schedule.

23. *Lien.* The Vessel shall have an absolute lien on cargo and upon all subfreight for all amounts due under this charter including freight, dead freight, demurrage and costs (including attorney's fees) of recovering the same, which lien shall continue after delivery of the cargo hereunder.

24. *Lighterage.* Cargo is to be received and delivered alongside the Vessel where she can load and discharge always safely afloat, and proceed and return always safely afloat, within reach of the ship's tackle, and any lighterage in loading or discharging, including lighterage necessary to maintain the rate of placing sugar alongside for loading and for taking away after discharge, is to be at the risk and expense of the cargo.

If such Vessel operating on customary scheduled sailings elects to deliver by lighter instead of at berth designated by the Charterer or his agent, the cargo may be so discharged into lighters at the risk of the cargo but at the expense of the Vessel, and it is mutually understood and agreed that each lighter shall be discharged within five (5) days after same is loaded, and for each and every day's detention of the lighter or lighters beyond the free period, demurrage shall be paid by the cargo at the current rate of the port for each lighter so detained and shall constitute a lien on the goods, but no demurrage shall accrue to the Vessel.

25. *Commission.* Commission upon the gross freight under this Charter is due and payable by the Vessel, upon payment of freights to _____, subject to all of the applicable regulations of the War Shipping Administration relating thereto.

26. *Members of Congress.* No member of or delegate to the Congress, nor Resident Commissioner, shall be admitted to any share or part of this Charter or to any benefit that may arise therefrom, except as provided in Section 116 of the Act approved March 4, 1909.

27. *Approval.* The voyage under this Charter is subject to the approval of the War Shipping Administration and any conditions imposed by said Administration pursuant to the Ship Warrants Act (Public Law 173 77th Congress).

In witness whereof, the parties hereto have executed this Agreement, in triplicate, as of the day and year first above written.

OFFICE OF ECONOMIC STABILIZATION.

PACIFIC ELECTRIC RAILWAY COMPANY

EMERGENCY BOARD WAGE RECOMMENDATIONS

JULY 19, 1943.

With reference to the recommendations of the Emergency Board selected from the National Railway Labor Panel on February 20, 1943, to investigate the facts of the dispute between the Pacific Electric Railway Company and certain of its employees respecting wage increases.

Pursuant to Public Law No. 729, 77th Congress, Second Session, October 2, 1942, Executive Order No. 9328 (8 F.R. 4681) and Executive Order No. 9299 (8 F.R. 1669), it is hereby directed that the Emergency Board's recommendations for increasing the hourly rates of pay for motormen and conductors from 77 to 90¢ on double track operations, from 82 to 95¢ on single track operations, and from 87¢ to $1.00 on one-man car operations, are disapproved insofar as the rates exceed, respectively, 80¢, 85¢ and 90¢. The wage recommendations for switchtenders, general yardmasters and yardmasters are not disapproved.

FRED M. VINSON,
Director,
Office of Economic Stabilization.

OPINION OF THE DIRECTOR

The Emergency Board recommended an increase in the hourly rates of pay for motormen and conductors in passenger service on the Pacific Electric Railway from 77 to 90¢ (82 to 95¢ on single track; 87¢ to $1.00 on one-man cars). The Board recommended increases for switchtenders from 60 to 78½¢ per hour, for general yardmasters from $282.80 to $316 per month, and for yardmasters from $272.80 to $296 per month.

The major transit system of Los Angeles is composed of the Pacific Electric, the Los Angeles Electric Railway Corporation, and the Los Angeles Motor Coach Lines. The Pacific Electric and the Los Angeles Railway each own half of the Motor Coach Company. At present the key rate on the Los Angeles Electric, the bigger of the two railways, is 80¢, and on the Pacific Electric, 77¢. While the Pacific Electric case was before the Emergency Board, the Los Angeles Railway in a nondispute proceeding, which was subject to approval by the War Labor Board, made an application for a 5¢ increase (to 85¢). The regional office referred the application to the National Board. The Emergency Board justified 5¢ of its 13¢ increase on this Los Angeles Railway application. Then after the Emergency Board in this case recommended its 13¢ increase (to 90¢), the Los Angeles Railway amended its application and requested an increase of 10¢ (to 90¢).

The 13¢ increase, as recommended by the Emergency Board, can be broken down into four steps: (1) 3¢ to bring Pacific Electric up to the Los Angeles Railway, (2) 3¢ to give Pacific Electric a differential over Los Angeles, (3) 5¢ to balance the assumed increase for Los Angeles, (4) 2¢ to narrow the difference between freight and passenger service on the Pacific Electric. The first step is sound. The last three steps cannot be justified.

A 3¢ increase on the Pacific Electric will bring its employees to the level of the Los Angeles Railway, which is the larger employer. The resulting 80¢ rate can be regarded as in conformity with the sound and tested going rate for the Los Angeles area. A 3¢ adjustment for the Pacific Electric employees, moreover, roughly approximates the permissible limit under the 15% Little Steel Formula.

The Emergency Board argued for and tried to create a differential in favor of the Pacific Electric over the Los Angeles Railway. The argument was based on the fact that before the Pacific Electric used the same rate for interurban and local service, there had been on the average a 3¢ difference. It was thought that Pacific Electric's competing rate with Los Angeles was its 3¢ higher interurban rate. The record shows, however, that the differential has fluctuated between the two companies. A differential established by governmental action in favor of either company at this time is not justified, in view of the fact that under a relatively free peacetime market, first one company and then the other paid the higher rate.

The Emergency Board predicated 5¢ of the increase on the Los Angeles application. That application is now for 10¢. This Office cannot assume that the National War Labor Board will approve the Los Angeles Railway application to the extent of 5¢, or in fact to any extent.

Lastly, the differential between Pacific Electric's own freight and passenger service has been one of vacillation. On the report before us, it is impossible to establish any proper differential.

This Office can and does approve an 80¢ rate for motormen and conductors engaged in double track operations on the Pacific Electric, an 85¢ one for those engaged in single track operations, and a 90¢ one for those operating one-man cars.

The wage recommendations for switchtenders, general yardmasters, and yardmasters stand in a different light. In the judgment of the Emergency Board these employees are engaged predominantly in work identical with freight service on standard steam roads. The rates recommended for these employees are those for such freight service. These recommendations are not disapproved.

I

Notice is hereby given that an application has been filed with this Commission, pursuant to the Public Utility Holding Company Act of 1935 ("the Act"), by Consolidated Electric and Gas Company ("Consolidated"), a registered holding company, whereby Consolidated seeks approval, pursuant to section 11 (e) of the Act, of a plan for certain actions designed to enable Consolidated and certain subsidiary companies of Consolidated to comply with the provisions of section 11 (b) of the Act, which plan is set forth in said application. All interested persons are referred to said document which is on file in the office of this Commission for a statement of the transactions therein proposed, which are summarized as follows:

Consolidated is a Delaware corporation and its business is exclusively that of a holding company. It is a registered holding company and is a subsidiary of Central Public Utility Corporation, a registered holding company and a subsidiary of Christopher H. Coughlin, W. T. Crawford, and Rawleigh Warner as Voting Trustees under a Voting Trust Agreement dated August 1, 1932 relating to the common stock of said Central Public Utility Corporation, said Trustees being also a registered public utility holding company.

As of December 31, 1942, Consolidated owned, directly or indirectly, forty-four subsidiary operating companies which, excluding certain interurban bus subsidiaries and subsidiaries operating in Spanish and Philippine jurisdictions, operated in 323 communities in 18 states of the United States and in four foreign countries. In addition to these operating subsidiary companies, Consolidated, as of said date, owned all of the equity securities and $8,959,421 of the $12,277,821 debt securities of The Islands Gas and Electric Company ("Islands"), Islands being also exclusively a holding company and holding securities of certain of the foreign indirect subsidiaries of Consolidated.

As of December 31, 1942 (and as of May 31, 1943), the capitalization of Consolidated was as follows:

Debt securities*	Principal amount outstanding December 31, 1942	Principal amount outstanding May 31, 1943

Southern Cities Utilities Company: Thirty-Year 5% First Lien and Collateral Trust Bonds, Series A, due April 1, 1958 (assumed)	6,979,000	6,979,000
Collateral Trust Bonds: 6% Series, due August 1, 1957	4,194,000	4,194,000

B Series	1,707,500	1,707,500
Total	$32,510,000	$32,295,500

*Consolidated is also the guarantor of a 6% demand note of Islands in the principal amount of $2,500,000 payable to International General Electric Company, Inc., such guaranty being unconditional and extending to payment both of principal and interest.

Capital Stocks	*Par or Stated Value*

Class A Non-Cumulative Participating—Entitled to a Preference Dividend of $1.75 a Share and Preference in Liquidation of $25 a Share—Authorized, Issued and Outstanding, 1,480,000 Shares of $1 Par Value Each	1,480,000
Preferred — $6 Cumulative — No Par Value—Authorized, 400,000 Shares; Issued, 183,012 Shares (37 Shares held in Treasury); Outstanding, 182,975 Shares	18,297,300

At December 31, 1942, the dividend arrearages on the Preferred Stock totalled $11,316,981.55.

Consolidated has heretofore filed an application with this Commission (identified by this Commission's File No. 54-40) for approval of a plan for certain actions also designed to enable the Consolidated holding company system to comply with the provisions of section 11 (b) of the Act. It is stated that the present plan contemplates the prior or simultaneous consummation of the earlier plan, hereinabove identified, the application for approval of which is still pending before this Commission. Such prior plan, among other things, provides for the elimination of the preferred stock, Class A stock, and common stock of Consolidated and the issuance and delivery in lieu of such stocks of new common stock of a single class, 94.5% thereof to be distributed ratably to the holders of the presently outstanding preferred stock, and the remaining 5.5% of such new common stock to be distributed to the holders of the outstanding Class A stock of Consolidated.

The plan presently proposed provides for the satisfaction of all of the outstanding funded debt of Consolidated, including the $2,500,000 note of Islands guaranteed by Consolidated, by the delivery to the holders of the securities evidencing such debt of the common stocks of certain operating subsidiary companies of Consolidated and the common stock of certain new holding companies to be created initially as subsidiaries of Consolidated. Such common stocks are to be distributed to all holders of funded debt securities of Consolidated in accordance with the respective principal amounts thereof and without distinction between the different issues of such debt securities. It is stated that the number of shares so to be distributed will be supplied by amendment and that such stocks will be issued in or changed into that number of shares which, consistent with the size and capital of each company, will facilitate distribution. However, no certificates for fractional shares are to be issued, but in lieu thereof it is proposed that scrip certificates representing rights to such fractional shares be issued, such certificates to be exchangeable for full shares within a limited period, when accompanied by other certificates so that all so presented aggregate one or more whole shares, or, if not exchanged within such limited period, exchangeable thereafter for a pro rata share of the cash proceeds from the sale of the shares represented by such scrip.

The operating companies, the common stocks of which are to be distributed among the holders of the debt securities of Consolidated are:

Atlanta Gas Light Company.
Central Illinois Electric and Gas Co.
Central Indiana Gas Company.
Compania Electrica de Santo Domingo, C. por A.
Compagnie d'Eclairage Electrique des Villes de Port-au-Prince et du Cap Haitien.

The outstanding debt securities of the two last named companies (presently owned by Islands) will be converted into common stock prior to such distribution, and any such debt securities not converted will be cancelled.

The new subsidiary holding companies, the common stocks of which are to be distributed among the holders of the debt securities of Consolidated, and the subsidiaries (indented) to be owned by such new subsidiary holding companies, are:

Penn-Maryland Gas Co.:
Athens and Sayre Gas Company.
Bangor Gas Company.
Chambersburg Gas Company.

Gas Light Company of Waverly (The).

[1] Earnings of each company are adjusted to reflect charges based on capitalization at Dec. 31, 1942, Federal income and excess profits taxes on the basis of separate corporate returns and rates contained in the 1942 Revenue Act, and elimination of material nonrecurring items affecting earnings.

It is stated that the Penn-Maryland Gas Co. will constitute a holding company under the Act and it is intended that such company, within a reasonable time after the consummation of the Plan, will effect the sale, for cash, of the subsidiaries held in such company or will liquidate or distribute its assets to its stockholders. It is stated that Virginia-Carolina Gas Co. will also constitute a holding company under the Act, but that Consolidated believes that the properties to be controlled by Virginia-Carolina Gas Co. will constitute an integrated public-utility system under the Act.

The securities of the following subsidiary operating companies, viz:

Florida Public Utilities Company.
Hoosier Gas Corporation.
Houghton County Electric Light Company.
Iron Range Light and Power Company.
Maine Public Service Company and its subsidiary, Maine and New Brunswick Electrical Power Company, Limited.
Mobile Gas Service Corporation.
Manila Gas Corporation.
Porto Rico Gas & Coke Company.
Union Electrica de Canarias, S. A.

will be placed in a new holding company which will be named "Consolidated Stockholders Liquidating Co." ("Liquidating Company") and the stock of the Liquidating Company will be distributed to the new common stockholders of Consolidated. It is stated that the Liquidating Company will constitute a holding company under the Act, but it is intended that such company, within a reasonable time after the consummation of the plan, will either effect the sale, for cash, of the subsidiaries held in such holding company or will liquidate and distribute its assets to its stockholders.

The remaining subsidiaries of Consolidated will then be as follows:

Carolina Coach Company, and its subsidiary, Carolina Coach Company of Virginia.
Lynchburg Transit Company.
Roanoke Railway and Electric Company.
Safety Motor Transit Corporation.
Southern Cities Ice Company.
Gas y Electricidad, S. A.

Of these ten companies, six are said not to be public-utility companies, as defined in the Act, and the remaining four operate outside the United States. On the basis of these facts, Consolidated will file an application for an exemption from the provisions of the Act.

The plan presently filed by Consolidated presupposes the consummation of certain transactions prior to the consummation of the plan. These transactions are the following:

(a) Consolidated is now a party to an agreement for the sale by it of its investment in Peoples Gas Company, a Texas Corporation, for approximately $1,246,000. Consolidated proposes to use such proceeds to acquire and retire approximately $1,500,000 principal amount of its assumed Southern Cities Utilities Company bonds (File No. 70–723).

(b) Consolidated proposes to acquire and retire $1,000,000 principal amount of its outstanding debt securities with free cash now in the treasury of Consolidated and with cash to be received by it during the calendar year 1943 out of the earnings of its subsidiaries.

(c) Consolidated will retire through sinking fund operations in the remainder of 1943, $30,000 principal amount of its debt securities.

(d) Islands has outstanding in the hands of the public $783,500 principal amount of its Twenty-five Year 5½% Sinking Fund Secured Gold Bonds, Series A, due March 1, 1953, which it proposes to redeem and retire.

(e) The Salem Gas Light Company, a subsidiary company of Consolidated, expects to effect the sale of all of its property for a very nominal consideration in cash and the assumption by the purchaser of its outstanding liabilities.

(f) Islands now owns a substantial amount of debt securities of Compania Electrica de Santo Domingo, C. por A., and Compagnie d'Eclairage Electrique des Villes de Port-Au-Prince et du Cap Haitien. Since the plan provides that only common stocks of these operating subsidiaries be distributed, it will be necessary to issue common stocks in exchange for these debt securities.

(g) Islands will be eliminated, either by way of total liquidation or merger with and into Consolidated, with the assumption by Consolidated of the outstanding 6% Demand Note in the principal amount of $2,500,000 of Islands payable to International General Electric Company, Inc.

II

As hereinabove stated, an earlier plan was filed with this Commission by Consolidated, pursuant to section 11 (e) of the Act to enable the holding company system of that company to comply with section 11 (b) of the Act, which plan (identified by the Commission's File No. 54–40) was summarized in a notice of filing and order for hearing issued by this Commission on December 27, 1941 (Holding Company Act Release No. 3225).

By the notice and order for hearing last mentioned, this Commission also (a) instituted proceedings with respect to Consolidated and with respect to its immediate parent, Central Public Utility Corporation, under sections 11 (b) (1) and 11 (b) (2) of the Act and set a date for hearing in regard thereto, and (b) consolidated said proceedings with the proceedings upon the application of Consolidated for approval of said earlier plan filed pursuant to section 11 (e) of the Act (File No. 54–40):

Thereafter Christopher H. Coughlin, W. T. Crawford, and Rawleigh Warner, Voting Trustees under a Voting Trust Agreement dated August 1, 1932, relating to the common stock of Central Public Utility Corporation (said Trustees having registered as a holding company) filed an application or declaration with the Commission seeking authorization for the delivery by such Trustees of the common stock of Central Public Utility Corporation to the record holders of the voting trust certificates issued therefor pursuant to said trust agreement, or, if such authorization should be denied, for approval by the Commission of a plan pursuant to section 11 (e) of the Act, providing, among other things, for the surrender by such voting trustees of the common stock of Central Public Utility Corporation to that corporation for cancellation, the removal of the agent and depository under said trust agreement and the termination of said agreement (said application or declaration being designated by the Commission's File No. 54–43).

On June 15, 1942 (Holding Company Act Release No. 3615) the Commission issued its notice of filing of the application or declaration last mentioned, its order reconvening the hearings upon the section 11 (e) application of Consolidated theretofore instituted, as above mentioned, and the hearings upon said proceedings so instituted by the Commission pursuant to sections 11 (b) (1) and 11 (b) (2) of the Act in regard to Central Public Utility Corporation and Consolidated, and instituting a proceeding pursuant to said sections of the Act last mentioned in respect to said named Trustees, as such, and consolidating all of said several proceedings for purposes of hearing, subject to certain reservations relative to future severance of such proceedings as in said order set forth.

Public hearings have been held, after appropriate notice, and from time to time, upon the said applications, declarations and proceedings so consolidated.

III

It appearing to the Commission that common questions of law and of fact are involved in that application of Consolidated pursuant to section 11 (e) of the Act most recently filed of the several proceedings hereinabove mentioned, said application being identified by the Commission's File No. 54–78, in the proceedings upon the application of Consolidated, hereinabove mentioned and identified by the Commission's File No. 54–40, in the proceedings instituted by the Commission in respect of Central Public Utility Corporation and Consolidated, hereinabove mentioned and identified by the Commission's File No. 59–40, in the proceedings upon the application of Christopher H. Coughlin, and others, as Voting Trustees, hereinabove mentioned and identified by the Commission's File No. 54–53, and in the proceedings instituted by the Commission pursuant to sections 11 (b) (1) and 11 (b) (2) of the Act in respect of said Christopher H. Coughlin, and others, as Trustees, hereinabove mentioned and identified by the Commission's File No. 59–49;

It is ordered, That the said several proceedings listed in the preceding paragraph hereof and in the caption of this notice and order be, and the same are hereby, consolidated for hearing, and for all other purposes,

Provided, That the Commission reserves jurisdiction hereafter to sever for hearing, in whole or in part, or for disposition, in whole or in part, any issues presented by said several proceedings, applications and declarations so consolidated.

It is further ordered, That a hearing on said matters so consolidated be held on the 3rd day of August, 1943 at 10 a. m., e. w. t., in the offices of the Securities and Exchange Commission, 18th and Locust Streets, Philadelphia, Pennsylvania. On such day the hearing room clerk in Room 318 will advise as to the room in which such hearing will be held.

It is further ordered, That Willis E. Monty or any other officer or officers of the Commission designated by it for that purpose shall preside at such hearing. The officer so designated to preside at such hearing is hereby authorized to exercise all powers granted to the Commission under section 18 (c) of the Act and to a Trial Examiner under the Commission's Rules of Practice.

It is further ordered, That any other person desiring to be heard in connection with these proceedings or proposing to intervene therein shall file with the Secretary of the Commission on or before July 29th, 1943, his request or application therefor as provided by Rule XVII of the Commission's Rules of Practice.

It is further ordered, That the Secretary of the Commission shall serve notice of the hearing hereby convened by mailing a copy of this order to all parties to the several proceedings hereby consolidated and that notice of said hearings be given to all other persons by publication of this order in the FEDERAL REGISTER.

It is further ordered, That, without limiting the scope of the issues presented in said several proceedings and otherwise to be considered, particular attention shall be directed at the hearing to the following matters and questions:

1. Whether the proposed allocation of common stock of subsidiary companies of Consolidated among the holders of the debt securities of Consolidated is fair and equitable to persons affected thereby, and particularly (a) whether said proposed allocation is fair and equitable as among the holders of such debt securities and (b) as between the holders of such debt securities and the holders of the several classes of stock of Consolidated;

2. Whether the creation of the new subholding companies as proposed in the plan of Consolidated will be detrimental to the carrying out of section 11 of the Act, and whether the acquisition by such new subsidiary holding companies of the securities of operating companies as proposed in said plan will meet the requirements of section 10 (c) (2) of the Act;

3. Whether the plan for which approval is presently sought, by that application designated under the Commission's File No. 54–78, is necessary to effectuate the provisions of section 11 (b) of the Act with respect to the holding company system of which Consolidated is a part;

4. In what respect, if any, the proposed plan should be modified or amended in order that the same may conform to the provisions of section 11 (b) of the Act and be fair and equitable to the persons affected thereby, and what terms and conditions, if any, should be imposed in any order approving such plan, if such order be entered, in the public interest or for the protection of investors or consumers, and

5. The several issues summarized and set forth in the notices of and orders for hearing heretofore entered in the several proceedings hereby consolidated.

By the Commission.

Secretary.

This proceeding having been heard by the Federal Trade Commission upon the complaint of the Commission and the substitute answer of respondent, in which answer respondent admits all the material allegations of fact set forth in said complaint and states that he waives all intervening procedure and further hearings as to said facts, and expressly waives the filing of briefs and oral argument; and the Commission having made its findings as to the facts and conclusion that said respondent has violated the provisions of subsection (c) of section 2 of an Act of Congress entitled "An Act to supplement existing laws against unlawful restraints and monopolies, and for other purposes," approved October 15, 1914 (the Clayton Act), as amended by an Act of Congress approved June 19, 1936 (the Robinson-Patman Act) (U.S.C. PART 3274—MACHINE TOOLS AND INDUSTRIAL SPECIALTIES

[Conservation Order M-319-a]

BONDED AND COATED ABRASIVE PRODUCTS

The fulfillment of requirements for the defense of the United States has created a shortage in the supply of certain critical materials required for the manufacture of bonded and coated abrasive products for defense, for private account, and for export; and the following order is deemed necessary and appropriate in the public interest and to promote the national defense:

§ 3274.92 *Conservation Order M-319-a*—(a) *Definitions.* For the purpose of this order:

(1) "Bonded abrasive product" means any abrasive product (excluding coated abrasive products) intended for the purpose of abrading, in which abrasive grain is held in a fixed position by any bonding agent;

(2) "Rubber bonded abrasive product" means any bonded abrasive product in which crude, reclaimed or synthetic rubber is used as a bonding agent;

(3) "Coated abrasive product" means any non-rigid abrasive product which consists of a flexible sheet or sheet-like backing on one or both surfaces of which there is attached by an adhesive a coating of one or more layers of abrasive grain.

(4) "Abrasive grain" means:

(i) Any silicon carbide or fused aluminum oxide which has been classified as to particle size by mechanical, hydraulic, pneumatic, or other methods.

(ii) Abrasive optical powders, abrasive flours, blasting grain, reclaimed grain, refractory grain, firesand, and other manufactured abrasive and refractory grain specialties, whether or not classified as to particle size.

The term does not include unfused or levigated alumina or natural abrasives such as emery, garnet, corundum and flint.

(5) "Reclaimed grain" means:

(i) Any abrasive grain recovered from wheel stubs or other baked or fired abrasive or refractory stock including lathe room turnings and dressings. The term does not include green shavings.

(ii) Any abrasive grain recovered from coated abrasive products;

(iii) Any abrasive grain previously used in grain form or on wheels in blasting, grinding, or polishing operations.

(6) "Aluminum oxide wheel grain" means any abrasive grain manufactured from fused aluminum oxide which is basically suitable for use in vitrified or resinoid bonded grinding wheels;

(7) "Producer" means any person who is engaged in the manufacture of bonded or coated abrasive products;

(8) "Importer" means any person who imports bonded or coated abrasive products from sources outside the forty-eight states of the United States, and the District of Columbia;

(9) "Ultimate purchaser" means any person who purchases bonded or coated abrasive products for use and not for resale.

(b) *Limitation on manufacture and sale of bonded abrasive products.* (1) On and after August 1, 1943, no producer or importer shall manufacture or sell any bonded abrasive product which contains abrasive grain manufactured from fused aluminum oxide (other than reclaimed grain) of any grit size 80 or coarser, which he knows or has reason to believe is intended for use as one of the bonded abrasive products listed on Schedule A-1.

(2) Similarly, on and after August 1, 1943, no producer or importer shall manufacture or sell any bonded abrasive product containing aluminum oxide wheel grain (other than reclaimed grain) of any grit size 80 or coarser, which he knows or has reason to believe is intended for use as one of the bonded abrasive products listed on Schedule A-2.

(3) Any producer or importer may, however, sell any bonded abrasive product which he knows or has reason to believe was manufactured prior to August 1, 1943.

(c) *Limitation on manufacture and sale of rubber bonded abrasive products.* In addition to the limitations contained in paragraph (b), the following limitations shall apply to the manufacture and sale of rubber bonded abrasive products:

(1) On and after August 1, 1943, no person shall manufacture, buy, or sell rubber bonded abrasive products other than those listed in Schedule B-1, except as provided in the following paragraph (c) (2):

(2) Any person may also manufacture, buy, or sell any rubber bonded abrasive product required to perform any of the operations listed on Schedule B-2; *Provided, however*, That no person shall fill any order from an ultimate purchaser for a rubber bonded abrasive product other than the products listed on Schedule B-1 unless such order is accompanied by a certification by the ultimate purchaser, signed manually or as provided in Priorities Regulation No. 7, substantially as follows:

The rubber bonded abrasive products specified on this purchase order are required by the undersigned to perform one or more of the operations listed on Schedule B-2 of Conservation Order M-319-a.

Name and address of ultimate purchaser

By _____
Authorized signature

(3) The grade of rubber compound to be used in any rubber bonded abrasive products is governed by the provisions of List 13 of Appendix II to Rubber Order R-1.

(d) *Use of rubber cement.* The use of rubber cement as a tie gum for mounting abrasive blocks, discs, or wheels is not restricted by this order.

(e) *Limitation on manufacture and sale of coated abrasive products.* On and after August 1, 1943, no producer or importer shall coat or sell any coated abrasive product containing abrasive grain manufactured from fused aluminum oxide (other than reclaimed grain) of any grit size 80 or coarser, which he knows or has reason to believe will be used for any of the purposes listed on Schedule C. Any producer or importer may, however, sell any coated abrasive product which he knows or has reason to believe was manufactured prior to August 1, 1943.

(f) *Limitation on inventories.* No person shall accept delivery of any bonded or coated abrasive product if the delivery will give him an inventory greater than that which he will need under his current practices during a period of sixty days, or greater than a minimum practicable working inventory, whichever is smaller. However, the following types of orders shall not be subject to this provision:

(1) Purchase orders placed by the Army, Navy, or Maritime Commission for bonded or coated abrasive products required for bases or supply depots outside the forty-eight states of the United States and the District of Columbia, or for bases or supply depots within the United States which are maintained for emergency purposes, or to supply such bases or supply depots outside the United States.

(2) Any purchase order specifically excepted from this restriction by the War Production Board.

(g) *Reports.* All persons affected by this order shall execute and file with the War Production Board such reports and questionnaires as the War Production Board shall from time to time request, subject to the approval of the Bureau of the Budget, pursuant to the Federal Reports Act of 1942.

(h) *Applicability of regulations.* All transactions affected by this order are subject to applicable provisions of the regulations of the War Production Board as amended from time to time.

(i) *Violations.* Any person who wilfully violates any provision of this order, or who, in connection with this order, wilfully conceals a material fact or furnishes false information to any department or agency of the United States, is guilty of a crime, and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using material under priorities control, and may be deprived of priorities assistance.

(j) *Appeals.* Any appeal from the provisions of this order shall be made by filing a letter in triplicate, referring to the particular provisions appealed from, and stating fully the grounds of the appeal.

(k) *Communications.* All reports to be filed, appeals and other communications concerning this order should be addressed to War Production Board, Tools Division, Washington, D. C., Reference: M-319-a.

Maximum Price Regulation No. 214 is amended in the following respects:

1. Section 1421.3 is amended to read as follows:

§ 1421.3 *Adjustable pricing.* Any person may agree to sell at a price which can be increased up to the maximum price in effect at the time of delivery; but no person may, unless authorized by the Office of Price Administration, deliver or agree to deliver at prices to be adjusted upward in accordance with action taken by the Office of Price Administration after delivery. Such authorization may be given when a request for a change in the applicable maximum price is pending, but only if the authorization is necessary to promote distribution or production and if it will not interfere with the purposes of the Emergency Price Control Act of 1942, as amended. The authorization may be given by the Administrator or by any official of the Office of Price Administration to whom the authority to grant such authorization has been delegated. The authorization will be given by order, except that it may be given by letter or telegram when the contemplated revision will be the granting of an individual application for adjustment.

2. Section 1421.8 is amended to read as follows:

§ 1421.8 *Petitions for amendment and applications for adjustment.* (a) Any producer who has entered into or proposes to enter into a contract for the sale of high alloy castings, who believes that the maximum price for such high alloy casting as established by this regulation impedes or threatens to impede the production of high alloy castings which are essential to the war program and which are or will be the subject of a contract for production essential to the war program may apply for, and the Price Administrator may grant, adjustment of the maximum price. The application for adjustment pursuant to this paragraph shall be made on Form No. 314:1 set out in Appendix D, incorporated herein as § 1421.18, or on a copy of said form made by applicant, and separate forms shall be used for each high alloy casting of different design or specification. Applications for such adjustment must be filed in accordance with Revised Procedural Regulation No. 1[2] issued by the Office of Price Administration.

(b) Any person seeking an amendment of any provision of Maximum Price Regulation No. 214 may file a petition for amendment in accordance with the provisions of Revised Procedural Regulation No. 1.

3. Section 1421.13 (a) (3) is amended to read as follows:

(3) "High alloy casting" means any heat-resistant casting or corrosion-resistant casting, rough or machined, which has a ferrous and/or nickel base and which contains more than 8% alloy, and also means any chrome iron abrasion-resistant casting, rough or machined, which has a ferrous base and which contains more than 8% alloy. This definition does not include wear-resistant castings containing 10% or more manganese and commonly known as "Hadfield manganese" steel castings.

4. Section 1421.13 (a) (4) is amended to read as follows:

(4) "Heat-resistant casting" means chrome, nickel-chrome or chrome-nickel high alloy casting, which normally operates at a metal temperature of 900° Fahrenheit or higher, except castings used up to 1200° Fahrenheit operated under conditions of high pressure and corrosion.

5. Section 1421.13 (a) (5) is amended to read as follows:

(5) "Corrosion-resistant casting" means any chrome, nickel-chrome or chrome-nickel high alloy casting, which normally operates in contact with corrosive agents at temperatures less than 900 Fahrenheit, including castings used up to 1200° Fahrenheit under conditions of high pressure and corrosion.

6. Section 1421.13 (a) (9) is amended to read as follows:

(9) "Machining" means any operation beyond the normal foundry processes performed for the purpose of providing casting surfaces or dimensions to conform to specifications of the purchaser.

7. Footnote 9 of § 1421.15 (a) (1) (ii) is amended to read as follows:

Example: Assume the highest price in the base period was established by a sale of 8 25-lb. heat-resistant castings, 67% (65%-69% tolerance) nickel and 17% (15%-19% tolerance) chromium analysis, at $1.00 per lb. An order is received after the effective date of this Maximum Price Regulation No. 214 for another 8 castings of the same design but of an analysis of 35% (34%-36% tolerance) nickel and 15% (13%-17% tolerance) chromium. This is 32% less nickel and 2% less chromium than the base period sale. The applicable per lb. differential (§ 1421.16 (b)) is .5¢ for nickel and .2¢ for chromium for each 1% difference in content. The maximum price for the rough castings on the new order is 83.6¢ per lb computed as follows:

32 × 5¢ = 16.0¢ deduction for nickel
2 × .2¢ = .4¢ deduction for chromium

16.4¢ per lb. total deduction
$1.00 − 16.4¢ = 83.6¢ per lb.

8. Section 1421.15 (a) (2) is amended to read as follows:

(2) *Extras.* There may be added to the maximum price of the rough casting an amount for extras, other than machining, not in excess of the amount customarily charged by such producer on similar sales during the base period, but only where such extras are furnished and have not already been included in the maximum price for the rough casting. Where a producer had no customary base period extra where castings were subject to rejection by non-destructive examination, the maximum extra which may be charged shall be such charge as may be approved by the Office of Price Administration, Washington, D. C. upon submission by the producer of a proposed charge together with data substantiating the fairness and equity of such charge.

9. In the headings of the tables in § 1421.16 (a) (1) and (2) and in § 1421.16 (b) the words "number of castings per pattern" are amended to read "Number of castings per pattern per order."

10. Section 1421.16 (a) (3) (i) is amended to read as follows:

(i) *Nickel and/or chromium:*
Nickel, 0.8¢ per lb. for each 1% difference.
Chromium, 0.6¢ per lb. for each 1% difference.

Provided, That on chrome, or chrome-nickel alloys where the chromium content is in excess of 8% and the nickel content, if any, is less than 3% and no other alloying elements are present, no deductions need be made from the base price in the schedules in subparagraphs (1) and (2) above on account of nickel difference from the basic analysis.

11. The alloy designation "GG-7MC" in footnote 10 to § 1421.16 (a) (3) is amended to read "GG-7MC".

12. Footnote 11 to § 1421.16 (b) is amended to read as follows:

[11] Example:

Alloy designation	Chromium	Nickel
	Percent	*Percent*
11S	8-12	29-32

	Cents
Chromium, deduct	3.0
Nickel, add	9.5
Add to base price	6.5

13. The list of price differentials for nickel-chromium alloy content differences in § 1421.16 (b) is amended to read as follows:

Nickel and/or chromium:
Nickel, 0.5¢ per lb. for each 1% difference.
Chromium, 0.2¢ per lb. for each 1% difference.

Provided, That on chrome, or chrome-nickel alloys where the chromium content is in excess of 8% and the nickel content, if any, is less than 3% and no other alloying elements are present, no deductions need be made from the base price in the schedules in paragraphs (a) (1) and (a) (2) above on account of nickel difference from the basic analysis.

14. Section 1421.17 (a) (2) is amended to read as follows:

(2) *Special specification extras.* An extra charge of 5¢ per pound may be added to the pound price for castings that are subject to United States Navy specifications 46-S-27A or 46-S-27 (INT).

15. A new subparagraph (5) is added to § 1421.17 (a) to read as follows:

(5) *Non-destructive examination.* When castings are subject to rejection by non-destructive examination there may be added an amount not in excess of the selling producer's customary base period extra on similar sales. Where the selling producer had no customary base period extra, the maximum extra which may be charged shall be such charge as may be approved by the Office of Price Administration, Washington, D. C., upon submission by the producer of a proposed charge together with data substantiating the fairness and equity of such charge.

16. Section 1421.17 (b) is amended to read as follows:

(b) The following are the maximum charges for machining where furnished and applicable:

(1) *Where performed by an independent machine shop.* (i) Where machining of high alloy castings is let out to independent machine shops by a producer who customarily let out such machining on March 31, 1942, the machining charge which may be added shall not exceed the price paid or payable by such producer to the independent machine shop for the machining plus such additional charge, if any, as would have been customarily made by such producer on March 31, 1942; *Provided*, That each producer who customarily let out machining on high alloy castings to independent machine shops on March 31, 1942 shall file with the Iron and Steel Branch, Office of Price Administration, Washington, D. C., on or before August 17, 1943 a statement of his customary method on March 31, 1942 of computing charges for such machining. This filing need not be made if his customary method on March 31, 1942 was the same as between October 1 and October 15, 1941 and he has already filed with the Office of Price Administration his method on the latter date. (ii) Where a producer did not customarily let out machining of high alloy castings to independent machine shops on March 31, 1942 and, at any time on or after August 17, 1943, does let out such machining, to an independent machine shop, his charge for such machining may not exceed the price paid or payable by him to the independent machine shop for such machining: *Provided*, That if the Office of Price Administration has approved for such producer an additional charge for machining let out to independent machine shops, such charge may be added. In order to obtain approval of an additional charge the producer must submit to the Iron and Steel Branch of the Office of Price Administration, Washington, D. C. a proposed ad-

ditional charge together with data substantiating the fairness of the proposed charge. Where such proposed additional charge and the substantiating data have been submitted, the Office of Price Administration shall, in writing, approve or disapprove such charge, or may approve such charge as it may deem fair and equitable, within thirty days from the time the proposed additional charge is received by said Iron and Steel Branch. If no action is taken within these thirty days, the proposed charge shall be deemed approved. Pending approval or disapproval as above, the producer may use the proposed charge subject to adjustment in accordance with the determination of the Office of Price Administration.

(2) *Where performed by the producer.* (i) If a producer had machine-hour rates in effect on March 31, 1942 for the machining of high alloy castings sold by him, the maximum charge which may be added shall not exceed the net charge, computed by use of said machine-hour rates, which the producer customarily would have made on March 31, 1942 to the purchaser. (ii) Where a producer had no machine-hour rates in effect on March 31, 1942 the maximum charge which may be added for machining of high alloy castings sold by him shall be determined by application of the methods of estimating costs and prices, labor rates, overhead rates, material and other costs and profit margins in effect for such producer on March 31, 1942. "Labor rates in effect on March 31, 1942" are the labor rates prevailing on that date in the producer's machine shop for each classification of labor: *Provided*, That where such producer employs labor of a classification not employed on March 31, 1942, he shall apply the rate prevailing on that date for such classification in the locality in which the machining is to be performed or, if such classification was not used in that locality on March 31, 1942, he shall apply the rate prevailing on that date for the nearest skill in his locality as accurately as he is able to determine the same with reasonably diligent inquiry. (iii) Where a producer did not customarily on March 31, 1942 machine high alloy castings sold by him, or where he has acquired new machines since March 31, 1942 for which maximum charges are not established by (i) or (ii) above, the maximum charge which may be added in such cases for machining shall be not in excess of such charge as is determined in accordance with a price determining method approved for such producer by the Office of Price Administration. Where such producer wishes to add a charge for machining in such cases he must submit to the Iron and Steel Branch of the Office of Price Administration, a proposed price determining method for ascertaining such a charge together with data substantiating it. The Office of Price Administration shall, in writing, approve or disapprove such price determining method or may approve such price determining method as it may deem fair and equitable within thirty days from the date such proposed price determining method is received by said Iron and Steel Branch. If no action is taken within these thirty days the proposed price determining method shall be deemed approved. Pending approval or disapproval as above, the producer may use the proposed price determining method subject to adjustment in accordance with the determination of the Office of Price Administration.

17. Footnote 2 of § 1421.19 is amended to read as follows:

[2] If the practice of your foundry is to allocate shop overhead to departments, report overhead by departments. If, however, "General Shop Overhead" is not broken down by departments, report only as "General Shop Overhead". If shop overhead by departments is used as well as "General Shop Overhead" not directly applicable to departments, report both by departments and also by "General Shop Overhead".

18. The verification in Form 314:2 in § 1421.19 is revoked and a certification is added to Form 314:2 to read as follows:

⅞ PERCENT TREASURY CERTIFICATES OF INDEBTEDNESS OF SERIES D-1944

JULY 22, 1943.

I. OFFERING OF CERTIFICATES

1. The Secretary of the Treasury, pursuant to the authority of the Second Liberty Bond Act, as amended, invites subscriptions, at par and accrued interest, from the people of the United States for certificates of indebtedness of the United States, designated ⅞ percent Treasury Certificates of Indebtedness of Series D-1944, in exchange for Treasury Certificates of Indebtedness of Series B-1943, maturing August 1, 1943. In addition, $900,000,000, or thereabouts, of the new certificates are offered for subscription for their own account by commercial banks, which are defined for this purpose as banks accepting demand deposits.

II. DESCRIPTION OF CERTIFICATES

1. The certificates will be dated August 2, 1943, and will bear interest from that date at the rate of ⅞ percent per annum, payable on a semiannual basis on February 1 and August 1, 1944. They will mature August 1, 1944, and will not be subject to call for redemption prior to maturity.

2. The income derived from the certificates shall be subject to all Federal taxes, now or hereafter imposed. The certificates shall be subject to estate, inheritance, gift or other excise taxes, whether Federal or State, but shall be exempt from all taxation now or hereafter imposed on the principal or interest thereof by any State, or any of the possessions of the United States, or by any local taxing authority.

3. The certificates will be acceptable to secure deposits of public moneys. They will not be acceptable in payment of taxes.

4. Bearer certificates with interest coupons attached will be issued in denominations of $1,000, $5,000, $10,000, $100,000 and $1,000,000. The certificates will not be issued in registered form.

5. The certificates will be subject to the general regulations of the Treasury Department, now or hereafter prescribed, governing United States certificates.

III. SUBSCRIPTION AND ALLOTMENT

1. Subscriptions will be received at the Federal Reserve Banks and Branches and at the Treasury Department, Washington. Subscribers must agree not to sell or otherwise dispose of their subscriptions, or of the securities which may be allotted thereon, prior to the closing of the subscription books. Banking institutions generally may submit exchange subscriptions for account of customers, but only the Federal Reserve Banks and the Treasury Department are authorized to act as official agencies. Others than banking institutions will not be permitted to enter subscriptions except for their own account. Cash subscriptions from commercial banks for their own account will be received without deposit but will be restricted in each case to an amount not exceeding the combined capital, surplus and undivided profits, or 5 percent of the total deposits, whichever is greater, of the subscribing bank.

2. The Secretary of the Treasury reserves the right to reject any subscription, in whole or in part, to allot less than the amount of certificates applied for, and to close the books as to any or all subscriptions at any time without notice; and any action he may take in these respects shall be final. Subject to these reservations, subscriptions in payment of which Treasury Certificates of Indebtedness of Series B-1943 are tendered will be allotted in full. All cash subscriptions will be allotted on an equal percentage basis, to be publicly announced. Allotment notices will be sent out promptly upon allotment.

IV. PAYMENT

1. Payment at par and accrued interest, if any, for certificates allotted on cash subscriptions hereunder must be made or completed on or before August 2, 1943, or on later allotment. Any qualified depositary will be permitted to make payment by credit for certificates allotted to it up to any amount for which it shall be qualified in excess of existing deposits, when so notified by the Federal Reserve Bank of its District. Treasury Certificates of Indebtedness of Series B-1943, maturing August 1, 1943, will be accepted at par in payment for any certificates subscribed for and allotted, and should accompany the subscription.

V. GENERAL PROVISIONS

1. As fiscal agents of the United States, Federal Reserve Banks are authorized and requested to receive subscriptions, to make allotments on the basis and up to the amounts indicated by the Secretary of the Treasury to the Federal Reserve Banks of the respective districts, to issue allotment notices, to receive payment for certificates allotted, to make delivery of certificates on full-paid subscriptions allotted, and they may issue interim receipts pending delivery of the definitive certificates.

2. The Secretary of the Treasury may at any time, or from time to time, prescribe supplemental or amendatory rules and regulations governing the offering, which will be communicated promptly to the Federal Reserve Banks.

[Docket No. A-1956]

DISTRICT BOARD 11

MEMORANDUM OPINION AND ORDER MODIFYING TEMPORARY RELIEF HERETOFORE GRANTED AND TERMINATING TEMPORARY RELIEF

In the matter of the petition of District Board No. 11 for the establishment of temporary price classifications and minimum prices for Mine Index No. 1390.

An original petition, pursuant to section 4 II (d) of the Bituminous Coal Act of 1937, was filed with the Division on April 21, 1943 by the above-named party which requested the temporary establishment of price classifications and minimum prices for the coals of the Minnehaha Seventh Vein Mine, Mine Index No. 1390. The petition recited that Mine Index No. 1390 is a new mine being developed in the seventh vein seam which would not be operating on a full schedule for three or four months from the date of the petition because of undelivered equipment, and requested permission to mix temporarily the production of the Minnehaha Seventh Vein Mine in average proportions of 25 percent seventh vein coal with 75 percent sixth vein coal produced by the Minnehaha Sixth Vein Mine in order to dispose of the current production of the coals produced by Mine Index No. 1390.

By order issued April 27, 1943 in the above-entitled matter temporary relief was granted as requested, except that no limitation was imposed upon the proportions in which the coals of the two mines were to be mixed, because of the indefiniteness of the limitation proposed by the petition and because it did not appear that any person would be prejudiced by the absence of such limitation.

Subsequent to the date of the order granting temporary relief in the above-entitled matter, the Bituminous Coal Consumers' Counsel filed a motion requesting that the temporary relief granted by the Order dated April 27, 1943 be modified to provide that the minimum prices established therein be applicable only when the coals of the two mines are mixed in average proportions of 25 percent seventh vein and 75 percent sixth vein; that when such mixtures are sold the invoices properly identify the component coals comprising the mixture; and that the temporary relief terminate four months from the date of filing of the original petition, unless extended by the Director for a further limited period of time.

In support of this motion the Bituminous Coal Consumers' Counsel states, among other matters, that the failure of the said Order to provide a limitation in average proportions of 25 percent seventh vein coal produced by the Minnehaha Seventh Vein Mine mixed with 75 percent sixth vein coal produced by the Minnehaha Sixth Vein Mine, results in the granting of more relief than requested in the original petition, to the prejudice of consumers and that the invoices for the coals of said mixture should properly identify the component coals comprising the mixture, in order that the consumer may have notice of the kind of coal purchased.

Thereafter, petitioner filed a request that the motion of the Bituminous Coal Consumers' Counsel be denied. In support of this request petitioner set forth that the production of coal by the Minnehaha Seventh Vein Mine and the Minnehaha Sixth Veil Mine varies from day to day and that it would be impossible to determine more than by an approximation the amount of the mixture of seventh vein coal and sixth vein coal in any one car, and that since no accurate determination can be made of the percentage of seventh vein coal and sixth vein coal when mixed the invoices for such mixtures could not properly identify the proportions of the component coals. Petitioner further set forth that the code member is diligent in its efforts to secure the equipment necessary to place its Minnehaha Seventh Vein Mine in complete operation, and that a termination of the temporary relief heretofore granted four months from the date of filing of the original petition would merely require repeated extensions of the temporary relief until the necessary equipment is installed at said mine.

It appears that the motion of the Bituminous Coal Consumers' Counsel to limit the mixture of the coals produced by the Minnehaha Seventh Vein Mine with Minnehaha Sixth Vein Mine in average proportions of 25 percent seventh vein and 75 percent sixth vein, respectively, and to terminate the temporary relief heretofore granted four months from the date of filing the original petition should be denied, for the reasons that it would be difficult if not impossible to determine as to each car the proportions of the mixture, and that the termination of the temporary relief on a specific date has been rendered moot in view of the fact that the Bituminous Coal Act of 1937 will cease to be in effect on August 24, 1943.

It appears, however, that even though it may be impracticable to ascertain the proportions of the mixture shipped in each carload, it is feasible for invoices covering mixtures of the coals involved to indicate that the shipment includes both Minnehaha Seventh Vein Mine and Minnehaha Sixth Vein Mine coals.

Now, therefore, it is ordered, That "Supplement R" attached to and made a part of the Order Granting Temporary Relief, issued April 27, 1943, in the above-entitled matter be, and it hereby is, amended by adding thereto the following language: "When coals produced at Mine Index No. 1390 are mixed with the coals produced at Mine Index No. 60 the invoices for such mixture of coal shall indicate the identity and source of the coal."

It is further ordered, That the said order issued in the above-entitled matter on April 27, 1943, shall terminate as of 12:01 a. m., August 24, 1943.

Dated: July 20, 1943.
